Wohl, 2009-06-08 This beautifully written and deeply personal collection of essays paints a progressive view of the American West as seen by a geologist Ellen Wohl traces her twenty years of living and conducting research in the natural landscapes of the West as she investigates the conflict between environmental history and widely held romanticized views of the region Wohl grew up in Ohio subscribing to a common perception of the American West as an unchanged frontier Moving to Arizona she became enthralled with how the landscapes and ecosystems of the West have undergone change both through geologic time and during the historical era of European settlement These essays tell of her early training as a geomorphologist and provide a memorable account of her research in the rivers of the West As the lessons accrue Wohl gives us the benefit of her experience and shows how years of studying and living in the Colorado Rockies have enhanced her understanding of landscape change through time Building on the literary tradition of Joseph Wood Krutch Terry Tempest Williams and John McPhee Wohl provides an up to date portrait of the West and brings a new urgency to the call for conservation of the region s land water and resources *Expository Discourse in Children, Adolescents, and Adults* Marilyn A. Nippold, Cheryl M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution

to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders
