Integration Interrupted Karolyn Tyson,2011-02-21 An all too popular explanation for why black students aren't doing better in school is their own use of the acting white slur to ridicule fellow blacks for taking advanced classes doing schoolwork and striving to earn high grades Carefully reconsidering how and why black students have come to equate school success with whiteness *Integration Interrupted* argues that when students understand race to be connected with achievement it is a powerful lesson conveyed by schools not their peers Drawing on over ten years of ethnographic research Karolyn Tyson shows how equating school success with acting white arose in the aftermath of Brown v Board of Education through the practice of curriculum tracking which separates students for instruction ostensibly by ability and prior achievement Only in very specific circumstances when black students are drastically underrepresented in advanced and gifted classes do anxieties about the burden of acting white emerge Racialized tracking continues to define the typical American secondary school but it goes unremarked except by the young people who experience its costs and consequences daily The rich narratives in *Integration Interrupted* throw light on the complex relationships underlying school behaviors and convincingly demonstrate that the problem lies not with students but instead with how we organize our schools **The**

Whiteness Interrupted Marcus Bell, 2021-06-28 In Whiteness Interrupted Marcus Bell presents a revealing portrait of white teachers in majority black schools in which he examines the limitations of understandings of how white racial identity is formed Through in depth

interviews with dozens of white teachers from a racially segregated urban school district in Upstate New York Bell outlines how whiteness is constructed based on localized interactions and takes a different form in predominantly black spaces He finds that in response to racial stress in a difficult teaching environment white teachers conceptualized whiteness as a stigmatized category predicated on white victimization When discussing race outside majority black spaces Bell s subjects characterized American society as postracial in which race seldom affects outcomes Conversely in discussing their experiences within predominantly black spaces they rejected the idea of white privilege often angrily and instead focused on what they saw as the racial privilege of blackness Throughout Bell underscores the significance of white victimization narratives in black spaces and their repercussions as the United States becomes a majority minority society

An Unexpected Minority Edward W. Morris,2006 Racial and ethnic minority groups in the United States have been growing rapidly in recent decades Projections based on census data indicate that in coming years white people will statistically dominate noticeably fewer regions and public spaces How will this reversal of minority status affect ideas about race In spaces dominated by people of color will attitudes about white privilege change Or will deeply rooted beliefs about racial inequality be resilient to numerical shifts in strength In An

Unexpected Minority sociologist Edward Morris addresses these far reaching questions by exploring attitudes about white identity in a Texas middle school composed predominantly of African Americans Latinos and Asians Based on his ethnographic research Morris argues that lower income white students in urban schools do not necessarily maintain the sort of white privilege documented in other settings Within the student body African American students were more frequently the cool kids and white students adopted elements of black culture including dress hairstyle and language to gain acceptance Morris observes however that racial inequalities were not always reversed Stereotypes that cast white students as better behaved and more academically gifted were often reinforced even by African American teachers Providing a new and timely perspective to the significant role that non whites play in the construction of attitudes about whiteness this book takes an important step in advancing the discussion of racial inequality and its future in this country Good White People Shannon Sullivan, 2014-05-08 Winner of the 2016 Society of Professors of Education Outstanding Book Award presented by the Society of Professors of Education 2014 CHOICE Outstanding Academic Title Building on her book *Revealing Whiteness* Shannon Sullivan identifies a constellation of attitudes common among well meaning white liberals that she sums up as white middle class goodness an orientation she critiques for being more concerned with establishing anti racist bona fides than with confronting systematic racism and privilege Sullivan untangles the complex relationships between class and race in contemporary white identity and outlines four ways this orientation is expressed each serving to establish one's lack of racism the denigration of lower class white people as responsible for ongoing white racism the demonization of antebellum slaveholders an emphasis on colorblindness especially in the context of white childrearing and the cultivation of attitudes of white guilt shame and betrayal To move beyond these distancing strategies Sullivan argues white people need a new ethos that acknowledges and transforms their whiteness in the pursuit of racial justice rather than seeking a self righteous distance from it
