Shayler,2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment The book accepts that the journey will be made but does not specify precisely when Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission objectives This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo Skylab Salyut Mir Shuttle and ISS Viking Luna Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate When the decision is finally made to go to Mars it will be made in the knowledge that most of the world knows why we are going and what benefits mankind will see for the effort The authors primary objective is to begin this understanding Astronomy Now ,1990 **The Encyclopedia of Space** Nicholas Booth,1990-04 Covers the major achievements of the space frontier and covers technical details on important missions **Bulletin - Association of Canadian Map Libraries** Association of Canadian Map Libraries,1987 *Humans in Spaceflight* Huntoon,Arnauld E Nicogossian,1997-03-31 This third volume in the Space Biology and Medicine series addresses the major issues concerning humans in space such as metabolism the immune system neurosensory and sensory motor functions gravitational biology radiation pharmacokinetics and much more It is composed of two parts Effects of Microgravity and Effects of Other Spaceflight Factors As in the previous two volumes the contributing authors are experts in their respective fields History ,1988 **Books** ,1988 **Kosmicheskai[a] biologii[a] i medit[s]ina: kn. 1-2.
