*Race, Self-Employment, and Upward Mobility* Timothy Mason Bates, 1997 Refuting traditional notions about entrepreneurship and opportunity scholar Timothy Bates finds that across all racial and ethnic lines self employment and upward mobility mainly are open to those who are educated skilled and with significant financial resources Bates s analysis is based largely on the massive Characteristics of Business Owners survey compiled by the U S Census Bureau *Toward the Meeting of the Waters* Winfred B. Moore, Jr., Orville Vernon Burton, 2009 Choice Outstanding Academic Title A provocative look into civil rights progress in the Palmetto State from activists statesmen and historians *Toward the Meeting of the Waters* represents a watershed moment in civil rights history bringing together voices of leading historians alongside recollections from central participants to provide the first comprehensive history of the civil rights movement as experienced by black and white South Carolinians Edited by Winfred B Moore Jr and Orville Vernon Burton this work originated with a highly publicized landmark conference on civil rights held at the Citadel in Charleston The volume opens with an assessment of the transition of South Carolina leaders from defiance to moderate enforcement of federally mandated integration and includes commentary by former governor and U S senator Ernest F Hollings and former governor John C West Subsequent chapters recall defining moments of white on black violence and aggression to set the context for understanding the efforts of reformers such as Levi G Byrd and Septima Poinsette Clark and for interpreting key episodes of white resistance Emerging from these essays is arresting evidence that although South Carolina did not experience as much violence as many other southern states the civil rights movement here was more fiercely embattled than previously acknowledged The section of retrospectives serves as an oral history of the era as it was experienced by a mixture of locally and nationally recognized participants including historians such as John Hope Franklin and Tony Badger as well as civil rights activists Joseph A De Laine Jr Beatrice Brown Rivers Charles McDew Constance Curry Matthew J Perry Jr Harvey B Gantt and Cleveland Sellers Jr The volume concludes with essays by historians Gavin Wright Dan Carter and Charles Joyner who bring this story to the present day and examine the legacy of the civil rights movement in South Carolina from a modern perspective *Toward the Meeting of the Waters* also includes thirty seven photographs from the period most of them by Cecil Williams and many published here for the first time *Race, Self-employment, and Upward Mobility* Timothy Mason Bates, 1997 This very interesting and informative book examines the role of self employment in the upward mobility of African Americans and Asian immigrants in American society Choice **The Economics of Self-Employment and Entrepreneurship** Simon C. William B Gartner, Kelly G. Shaver, Nancy M Carter, Paul D Reynolds, 2004-06-21 This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics PSED the most comprehensive scientifically representative study to date of nascent entrepreneurs The book is unique because the study identified individuals in the process of creating new businesses to understand how at its very source people move from considering the option of starting a new business to its actual founding This has never been done before in the history of entrepreneurship research I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where entrepreneurs come from and how they move from their initial idea to new venture founding Claudia Bird Schoonhoven University of California Irvine This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics PSED an unprecedented research program involving more than a hundred researchers from 10 countries This Handbook is must reading for anyone interested in entrepreneurship research Andrew H Van de Ven Carlson School of Management University of Minnesota Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well being much of it concentrated in new economic sectors such as information technology Yet even though entrepreneurship has been shown to provide many benefits it is surprising that there has not been a systematic study of the entrepreneurial process The Handbook of Entrepreneurial Dynamics The Process of Business Creation fills this gap by offering theories ideas and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics PSED The PSED is a research program that was initiated to provide systematic reliable and generalizable data on important features of the new business creation process The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses the activities and characteristics that comprise the nature of the business start up process and the proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business

formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs  
Explores all of the processes of new business formation The Hidden Cost of Being African American Thomas M.

Shapiro,2004-02-05 Thomas Shapiro reveals how the lack of family assets inheritance home equity stocks bonds savings  
accounts and other investments along with continuing racial discrimination in crucial areas like homeownership dramatically  
impact the everyday lives of many black families reversing gains earned in schools and on jobs and perpetuating the cycle of  
poverty in which far too many find themselves trapped *Hispanic-Latino Entrepreneurship* J. Mark Munoz,Michelle Ingram

Spain,2014-12-19 The Hispanic Latino community is large expanding and an important contributor to the U S economy  
Numbering over 50 million Hispanic Latinos currently represent about 16% of the population Hispanic Latinos engage in a  
diversity of jobs that help keep the American economic engine running The practice of entrepreneurship has been on the rise  
with over 23 million business in the United States categorized as Hispanic owned generating over 345 billion in sales This  
book examines the entrepreneurial mindset of Hispanic Latinos in the United States With limited literature on the subject the  
authors created a pioneering book that captures the viewpoints of real life Hispanic Latino entrepreneurs Using a 15 item  
questionnaire the authors obtained information on entrepreneurial intent goals and business strategies utilized This book  
highlights real world business experiences including challenges relating to entrepreneurial pursuits and the importance of  
hardwork discipline and a positive mindset in the success of an enterprise Can the Poor Save? Michael

Sherraden,2017-09-08 Many policymakers argue that the best poverty policy not only provides cash to the poor for  
subsistence but also incentives and structures that encourage long term social and economic improvement As part of this  
they make the case for Individual Development Accounts IDAs a new policy proposal designed to help the poor save and to  
build assets This book explores IDAs to determine their effectiveness IDAs are matched savings accounts targeted on low  
income low wealth individuals Savings in IDAs are used for home ownership post secondary education small business  
development and other purposes Do IDAs work If they do for whom And does how an IDA is designed determine savings  
outcomes This volume is the first analysis of matched savings by the poor to use data from monthly bank statements It comes  
at a critical time as debate rages over the merits of individual social security accounts IDAs also respond to policy that is  
becoming more asset based and less inclusive of the poor The authors argue for the efficacy of IDAs to counter this tendency  
They find that while savings outcomes vary among participants no characteristics such as low income or public assistance  
preclude saving They examine effects of IDA design the match rate savings targets and the use of automatic transfer on  
savings results and analyze factors that influence varying rates of saving and spending over time They conclude that financial  
education and other support services though costly improve savings performance To address the issue of cost they suggest a  
two tier system of IDA design one with broad access and simple services and the other with targeted access and intensive  
services Can the Poor Save offers a wealth of lessons to those interested in saving and asset accumulation among the poor It

not only breaks new ground in the scientific study of savings behavior but also offers concrete evidence based recommendations to improve policies designed to encourage the poor to save and how to make such policies more inclusive

*Economic Survival Strategies of Turkish Migrants in London* Olgu Karan, 2017-03-14 In *Economic Survival Strategies of Turkish Migrants in London* Karan shows how this collectively created social capital gradually acquired cultural capital as the migrants' children became familiar with the English language and as the experience of running businesses in London was shared among the migrants Alongside these processes he sees the emergence of a new form of ethnic identification to our people the *T rkıyeli* based on the sharing of common experiences And this identification he finds is shared by both Kurdish and Turkish communities as well as by those with religious and non religious beliefs The book provides detailed insights into these migrant experiences while also considering the theoretical explanations It is a really welcome contribution for everyone concerned with the problems and challenges of integration and of identify today Professor Steve Jefferys London Metropolitan University UK This study is about economic survival in the Turkish and Kurdish communities of North London with some interesting comparisons to the longer established Turkish Cypriot community It is to be welcomed that the study spans macro and micro levels Also to be welcomed is that it eschews the idea that identity and culture is fixed and unchanging providing some fascinating and important examples to the contrary and that it moves beyond essentially culturalist approaches to entrepreneurship and even more so mainstream individualist ones Professor Theo Nichols Cardiff University UK Dr Karan noticed that two ethnic communities in conflictual relationships with each other in home country Turkey are marshalling collective resources in a very cooperative way across ethnic boundaries and forming small business ventures and thus contributing to the empowerment and upgrading of their households and communities Professor Bahattin Ak it Maltepe University Istanbul Turkey This book based on semi structured interviews and other material shows how the collapse of the textile industry in London pushed members of the Kurdish and Turkish communities to become business owners in catering and retail Having relatively limited education and knowledge in the English language together with discrimination in the mainstream labor made the transition attractive In addition UK's legal framework and strong sense of solidarity within the groups made it possible to set up a business However competition is fierce and authorities hardly supportive To stay in business owners their family members and hired co ethnics have to engage in long working hours leading to social isolation Most business owners are men and relations within the family are patriarchal I found this scholarly and well written book a valuable and welcomed contribution to the literature on how ethnic minorities in rich countries make their living Bjorn Gustafsson Senior Professor Department of Social Work University of Gothenburg
