Racial Conflict In Rhodesia A Socio Historical Study:

Racial Conflict in Rhodesia Graham Charles Kinloch,1978 **The Collapse of Rhodesia** Josiah Brownell,2010-10-27 In the years leading up to Rhodesia's Unilateral Declaration of Independence in 1965 its small and transient white population was balanced precariously atop a large and fast growing African population This unstable political demography was set against the backdrop of continent wide decolonisation and a parallel rise in African nationalism within Rhodesia The Collapse of Rhodesia provides a controversial reexamination of the final decades of white minority rule Josiah Brownell argues that racial population demographics and the pressures they produced were a pervasive but hidden force behind many of Rhodesia's most dramatic political events including UDI He concludes that the UDI rebellion eventually failed because the state was unable to successfully redress white Rhodesia's fundamental demographic weaknesses By addressing this vital demographic component of the multifaceted conflict this book is an important contribution to the historiography of the last years of white rule in Rhodesia *The Comparative Understanding Of Intergroup Relations* Graham Kinloch,2019-07-09 This book deals with major types of intergroup relations the advantages and limitations of the comparative approach and comparative views of intergroup relations It examines these relations particularly within the US highlighting different types of contact and consequences within the society *The International Journal of African Historical Studies* ,1980 **Case Studies on**

Built on the Ruins of Empire Blake Whitaker,2022-06-07 During the Cold War the British government oversaw the transition to independence of dozens of colonies Often the most challenging aspect of this transition was the creation of a national army from colonial forces In *Built on the Ruins of Empire* Blake Whitaker examines this process in Kenya and Zambia and how it set the course for the creation of the army in Zimbabwe He also looks at three themes as they intersect in African military history British decolonization race relations and the Cold War While the transition to independence was a difficult process in places such as Ghana and Nigeria it was compounded by the racial tensions in Kenya Zambia and Zimbabwe All three were settler colonies home to a sizable community of white Europeans who controlled the levers of power and economic prosperity *Built on the Ruins of Empire* focuses on the difficulties that arose in creating a cohesive and apolitical military force in these racially charged Cold War environments and demonstrates that the challenges faced by the British training missions in Kenya and Zambia taught London important lessons about the emerging postcolonial world Whitaker uniquely analyzes the successes and failures of the British military assistance programs and their quest to solidify British influence while examining how Britain's position and influence in the wider world was fading just as Zimbabwe was achieving independence **Peasant Consciousness and Guerilla War in Zimbabwe** Terence O. Ranger,T. O.

Ranger,1985-01-01 *Minorities and the State in Africa* , *The Economies of Africa and Asia in the Inter-war Depression* (Routledge Revivals) Ian Brown,2014-11-13 The great inter war depression has long been seen as an unprecedented

economic disaster for the peoples of the non European world This book with its detailed assessment of the impact of the depression on the economies of Africa and Asia challenges the orthodox view and is essential reading for those with a teaching or research interest in the modern economic history of those continents Established specialists in the modern economic history of parts of Africa or Asia put forward a number of revisionist arguments They show that some economies were left essentially unscathed by the depression and that for many export dependent peasant communities which did face a severe drop in cash income as world commodity prices collapsed from the late 1920s there was a range of important responses and reactions by which they could defend their economic welfare For many peasant communities the depression was not a disaster but an opportunity

Veenhoven,2024-09-16 **Labour and Economic Change in Southern Africa c.1900-2000** Rory Pilossof,Andrew Cohen,2021-06-03 This book explores the social and economic development of Zimbabwe Zambia and Malawi over the course of the twentieth century These three countries have long shared and interconnected pasts All three were drawn into the British Empire at a similar time and the formation of the ill fated Federation of Rhodesia and Nyasaland formally linked these countries together for a decade in the mid twentieth century This formal political relationship created dynamics that resulted in yet closer economic and social links After Federation the economic realities of industry transport and labour supplies meant that these three countries continued to be intricately interconnected Yet despite these connected pasts comparative work on the economic histories of Malawi Zambia and Zimbabwe and how these change over time is rare This book addresses the gap by providing the first comprehensive collection of labour and census data across the twentieth century for these three countries The different economic models and performances of these states offer good comparison allowing researchers to look at different models of development and how these played out over the long term The book provides data on population growth and change industrial and occupational structure and the various shifts in what the economically active population did It will be useful for historians economists development studies scholars and non governmental organisations working on twentieth century and contemporary southern Africa

Zimbabwe Deborah Helen Potts,Deborah Potts,1993 *The Changing Racial Regime* Matthew Holden,2017-11-30 The National Political Science Review is the official publication of the National Conference of Black Political Scientists The Review s purpose as described by Matthew Holden in his introduction is to lead to new information insights and findings into the social and political status of African Americans The volume is not exclusionist or narrow It integrates essays that could stand alone as they initially were written according to the method and theory of the author in question As presented here however they also lend themselves to a broader treatment of race and the political

order The present volume combines essays expressly focused on African Americans Africa and the African diaspora At the same time it contains essays about broad generic subjects such as budgeting and interest groups written with no explicit racial relevance Holden integrates these essays under the theme of the changing racial regime The integrating concept is the old word regime which political scientists have used in many situations before to define such more or less persistent though not necessarily permanent orders of precedence If no significant benefits and no significant burdens could be forecast by knowledge of the social identity called race then the regime could be seen as non racial In American experience the regime was at one time purposeful and sustained white advantage The white race and its preferential standing was central to virtually all institutional practice public and private The significant contemporary question is the degree of change in the racial regime Some proceed with the assumption that a large degree of change has occurred in the American political system The view of other contributors is that the system still sustains racial stratification In its very internal dialogue this volume presents a panorama of current work by political scientists African American and other on the character of the American political system Contributors include Cedric Robinson Charles Henry Edward J Muller Marjorie Lewis Katherine A Hinckley and Bette S Hill Nancy Haggard Gilson and Vernon Johnson The Changing Racial Regime is an essential resource for political scientists black studies specialists and scholars and policy analysts of race relations in the United States

Muslim-Christian Conflicts Suad Joseph, 2019-10-10 What does religion mean in people's daily lives In what ways is it a component of ethnic identity How do religious identities and structures relate to other social identities and structures and to political and economic institutions and behavior How can Muslim-Christian relations be understood in the context of the emergence of the world capitalist system These are some of the questions addressed by the authors of this volume Their collective goal growing out of a desire to understand the continuing war in Lebanon is to study the circumstances under which religious differences become politically salient
