**We are a People** Paul R. Spickard, W. Jeffrey Burroughs, 2000 As the twentieth century closes ethnicity stands out as a powerful force for binding people together in a sense of shared origins and worldview But this emphasis on a people's uniqueness can also develop into a distorted rationale for insularity inter ethnic animosity or as we have seen in this century armed conflict Ethnic identity clearly holds very real consequences for individuals and peoples yet there is not much agreement on what exactly it is or how it is formed The growing recognition that ethnicity is not fixed and inherent but elastic and constructed fuels the essays in this collection Regarding identity as a dynamic on going formative and transformative process We Are a People considers narrative the creation and maintenance of a common story as the keystone in building a sense of peoplehood Myths of origin triumph over adversity migration and so forth chart a group's history while continual additions to the larger narrative stress moving into the future as a people Still there is more to our stories as individuals and groups Most of us are aware that we take on different roles and project different aspects of ourselves depending on the situation Some individuals who have inherited multiple group affiliations from their families view themselves not as this or that but all at once So too with ethnic groups The so called hyphenated Americans are not the only people in the world to recognize or embrace their plurality This relatively recent acknowledgment of multiplicity has potentially wide implications destabilizing the limited and limiting categories inscribed in for example public policy and discourse on race relations We Are a People is a path breaking volume boldly illustrating how ethnic identity works in the real world Author note Paul Spickard is Professor and Chair of Asian American Studies at UC Santa Barbara and is author of Mixed Blood W Jeffrey Burroughs is Professor of Psychology at Brigham Young University Hawaii

**Contemporary Asian America (second Edition)** Min Zhou, J. V. Gatewood, 2007-10 When Contemporary Asian America was first published it exposed its readers to developments within the discipline from its inception as part of the ethnic consciousness movement of the 1960s to the more contemporary theoretical and practical issues facing Asian America at the century's end. This new edition features a number of fresh entries and updated material. It covers such topics as Asian American activism, immigration, community formation, family relations, gender roles, sexuality, identity, struggle for social justice, interethnic conflict, coalition, and political participation. As in the first edition, Contemporary Asian America provides an expansive introduction to the central readings in Asian American Studies, presenting a grounded theoretical orientation to the discipline and framing key historical, cultural, economic, and social themes with a social science focus. This critical text offers a broad overview of Asian American studies and the current state of Asian America.

*The Multiracial Experience* Maria P. P. Root, 1995-11-21 How might a multiracial concept dismantle our negative construction of race? How do we redefine ethnicity when race is less central to the definition? The Multiracial Experience challenges current theoretical and political conceptualizations of race using the multiracial experience of individuals as a tool for examining these and other questions. Each contribution opens with a personal sketch of the multiracial experience. Topics explored in the book include the differences between race and ethnicity, colour, gender, and sexuality in a multiracial context, and ethnicity and its role in identity formation.

*Race, Racism, and Multiraciality in American Education* Christopher Bodenheimer Knaus, 2006 This research monograph analyses and describes how multiracial undergraduates have come to think about race and racism. The work begins with an overview of the problem of race and racism in education, then discusses the way in which race is typically construed along a continuum of mono-racial thinking. The text is then split into seven distinct case studies based on individuals with multiracial, multicultural, and ambiguous racial identities and their K-12 experience.

Multiracial Identity and Racial Politics in the United States Natalie Masuoka, 2017 Policy makers, academic administrators, scholars, and members of the public are clamoring for indicators of the value and reach of research. The question of how to quantify the impact and importance of research and scholarly output, from the publication of books and journal articles to the indexing of citations and tweets, is a critical one in predicting innovation and in deciding what sorts of research is supported and whom is hired to carry it out. There is a wide set of data and tools available for measuring research, but they are often used in crude ways and each has its own limitations and internal logics.

*Measuring Research: What Everyone Needs to Know* R will provide for the first time an accessible account of the methods used to gather and analyze data on research output and impact. Following a brief history of scholarly communication and its measurement, from traditional peer review to crowdsourced review on the social web, the book will look at the classification of knowledge and academic disciplines, the differences between citations and references, the role of peer review, national research evaluation exercises, the tools used to measure research, the many different types of measurement indicators, and how to measure interdisciplinarity. The book also addresses emerging issues.

within scholarly communication including whether or not measurement promotes a publish or perish culture fraud in research or citation cartels It will also look at the stakeholders behind these analytical tools the adverse effects of these quantifications and the future of research measurement

**Biracial in America** Nikki Khanna, 2011-09-16 Elected in 2008 Barack Obama made history as the first African American president of the United States Though recognized as the son of a white Kansas born mother and a black Kenyan father the media and public have nonetheless pigeonholed him as black and he too self identifies as such Obama s experience as an American with black and white ancestry though compelling because of his celebrity is not unique and raises several questions about the growing number of black white biracial Americans today How are they perceived by others with regard to race How do they tend to identify And why Taking a social psychological approach *Biracial in America* identifies influencing factors and several underlying processes shaping multidimensional racial identities This study also investigates the ways in which biracial Americans perform race in their day to day lives One s race isn t simply something that others prescribe onto the individual but something that individuals do The strategies and motivations for performing black white and biracial identities are explored
