Process and the Authentic Life Jason W. Brown, 2013-05-02 The thesis advanced in this book is that feeling and cognition actualize through a process that originates in older brain formations and develops outward through limbic and cortical fields through the self concept and private space into as the world An iteration of this transition deposits acts objects feelings and utterances Value is a mode of conceptual feeling that depends on the dominant phase in this transition from desire through interest to object worth Among the topics covered are subjective time and change the epochal nature of objects and their temporal extensibility and the evolution of value from inorganic matter into organic form The theory of microgenesis informs this work According to this theory acts and objects evolve in milliseconds through phases that replicate patterns in forebrain evolution The progression in the actualization of the mind brain state is from archaic to recent in brain formation from unity to diversity from past to present and from mind to world An account is given of the diversity of felt experience avoiding the reductionist moves characteristic of biological materialism and the inherent dualism of psychoanalytic and related theories This book is intended for any reader interested in the psychology of the inner life and philosophy of mind including philosophers psychologists psychiatrists and others with an interest in problems of value and moral feeling

Experimental Cinema in the Digital Age Malcolm Le Grice,2019-07-25 Michael Le Grice a pioneer of structural film in the 1970s and whose first video and computer works were exhibited in the late 1960s provides a collection of his most notable essays The essays shed light on the work of other artists and film makers and documents a period especially the 70s when artists film was at the centre of polemical debate about the nature of avant garde and the future of radical or experimental film The book contributes to the contemporary debates about film video art and new technology **Towards a neuroscience of social interaction** Ulrich Pfeiffer,Bert Timmermans,Kai Vogeley,Chris Frith,Leonhard Schilbach, The

burgeoning field of social neuroscience has begun to illuminate the complex biological bases of human social cognitive abilities. However, in spite of being based on the premise of investigating the neural bases of interacting minds, the majority of studies have focused on studying brains in isolation using paradigms that investigate offline social cognition, i.e. social cognition from a detached observer's point of view, asking study participants to read out the mental states of others without being engaged in interaction with them. Consequently, the neural correlates of real-time social interaction have remained elusive and may paradoxically represent the dark matter of social neuroscience. More recently, a growing number of researchers have begun to study online social cognition, i.e. social cognition from a participant's point of view, based on the assumption that there is something fundamentally different when we are actively engaged with others in real-time social interaction as compared to when we merely observe them. Whereas for offline social cognition, interaction and feedback are merely a way of gathering data about the other person that feeds into processing algorithms inside the agent, it has been proposed that in online social cognition, the knowledge of the other, at least in part, resides in the interaction dynamics between the agents. Furthermore, being a participant in an ongoing interaction may entail a commitment toward being responsive, created by important differences in the motivational foundations of online and offline social cognition. In order to promote the development of the neuroscientific investigation of online social cognition, this Frontiers Research Topic aims at bringing together contributions from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context. Specifically, this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms. Here, an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds. For this Research Topic, we therefore solicit reviews, original research articles, opinion, and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so. While focusing on work in the neurosciences, this Research Topic also welcomes contributions in the form of behavioral studies, psychophysiological investigations, methodological innovations, computational approaches, developmental, and patient studies. By focusing on cutting-edge research in social neuroscience and related fields, this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social.

On the Politics of Ugliness Sara Rodrigues, Ela Przybylo, 2018-08-29 Ugliness or unsightliness is much more than a quality or property of an individual's appearance; it has long functioned as a social category that demarcates access to social, cultural, and political spaces and capital. The editors and authors in this collection harness intersectional and interdisciplinary approaches in order to examine ugliness as a political category that is deployed to uphold established notions of worth and entitlement. *On the Politics of Ugliness* identifies and challenges the

harmful effects that labels and feelings of ugliness have on individuals and the socio political order It explores ugliness in relation to the intersectional processes of racialization colonization and settler colonialism gender making ableism heteronormativity and fatphobia On the Politics of Ugliness asks that we fight against visual injustice and imagine new ways of seeing

The Allure of Things: Process and Object in Contemporary Philosophy Roland Faber,Andrew Goffey,2014-05-22 The Allure of Things Process and Object in Contemporary Philosophy contests the view that metaphysics is something to be overcome By focusing on process and object oriented ontology OOO and rejecting the privileging of human existence over the existence of non human objects this collection explores philosophy s concern with things themselves Interest in Latour Stengers Whitehead Harman and Meillassoux has prompted a resurgence of ontological questions outside the traditional subject object framework of modern critical thought This new collection consequently proposes a pragmatic and pluralist approach to modes of existence Drawing together an international range of leading scholars The Allure of Things fully covers the similarities between OOO and process philosophy and is an essential addition to the literature on metaphysics
