fought in the late 1940s and 1950s with Second World War armoured vehicles like the T 34 and the Sherman through to the designs common in the 1960s and 1970s like the T 55 Centurion Challenger and M60 Patton to the confrontation between the M1 Abrams and the T 72 during the Gulf War in 1991 Technical and design developments are important elements throughout the story but so are dramatic changes in tactics and armaments which mean the tank has an increasingly uncertain role in modern warfare

1950 and AMX 30 From 1963 the Bundeswehr was equipped with the homegrown Leopard 1 and 2 The US M60 series and M1 Abrams came into service from 1980 These and more MBTs and variants are covered in expert detail in this superbly illustrated book The 758th Tank Battalion in World War II Joe Wilson, Jr.,2018-07-24 In 1941 the U S Army activated the 758th Tank Battalion the first all black armored unit By December 1944 they were fighting the Axis in Northern Italy from the Ligurian Sea through the Po Valley and into the Apennine Mountains where they helped breach the Gothic Line the Germans last major defensive line of the Italian Campaign After the war the 758th was deactivated but was reformed as the 64th Tank Battalion keeping their distinguished insignia a tusked elephant head over the motto We Pierce They entered the Korean War still segregated but returned fully integrated though discrimination continued internally Through the years they fought with almost every American tank the Stuart the Sherman the Pershing the Patton and today s Abrams Victorious over two fascist and racist regimes many black servicemen returned home to what they hoped would be a more tolerant nation Most were bitterly disappointed segregation was still the law of the land For many disappointment became a determination to fight discrimination with the same resolve that had defeated the Axis **The Whirlwind War** Frank N. based on its 1991 Gulf War victory against a minor military player Washington believed its own propaganda about crippling sanctions on Russia about the viability of its Ukrainian proxy army and the economic and military weakness of Russia spelling doom for the American empire and its rules based order By 2023 the Kiev regime could no longer exist without the West's support both financial and in war materiel By 2024 Russia will have not just exhausted Ukraine but also demilitarized NATO as a whole exposing the industrial and military impotence of the US and its European vassals The United States military as a whole and the USAF in particular have no resources or means to close the ever widening gap in capability between American and Russian Air Defenses insofar as such systems as the S 500 are already being produced serially in Russia with their immense range of more than 500 kilometers against aerial targets not to mention their full integration with Russia's Air Force and Air Defense The air space of Russia is becoming increasingly prohibitive to penetration by any combination of USAF and NATO forces The US has fallen behind and it won't be able to catch up
