Insect Bioecology and Nutrition for Integrated Pest Management Antônio Ricardo Panizzi, José R. P. Parra, 2012-03-08 The field of insect nutritional ecology has been defined by how insects deal with nutritional and non nutritional compounds and how these compounds influence their biology in evolutionary time In contrast Insect Bioecology and Nutrition for Integrated Pest Management presents these entomological concepts within the framework of integrated pest management IPM It specifically addresses bioecology and insect nutrition in modern agriculture Written for graduate students and professionals in entomology this book covers neotropical information in three sections General Aspects Basic bioecology and insect nutrition artificial diets insect plant interactions insect symbionts the interface of chemical ecology with the food and insect cannibalism Specific Aspects Specific feeding guilds of insects including ants social bees leaf chewers seed suckers seed chewers root feeders gall makers detritivorous feeders pests of storage grains fruit flies aphids endo and ectoparasitoids predators crisopids and hematophagous insects Applied Aspects Host plant resistance and the design of IPM programs in the context of insect bioecology and nutrition Much of the research on which these chapters were written was done in Brazil and based on its neotropical fauna The complexity and diversity of the neotropics provides enough data that readers from all zoogeographical regions can readily translate the information in this book to their specific conditions The book s value as an entry point for further research is enhanced by the inclusion of approximately 4 000 references Sustainability of Southern African Ecosystems under Global Change Graham P. von Maltitz, Guy F.

Midgley, Jennifer Veitch, Christian Brümmer, Reimund P. Rötter, Finn A. Viehberg, Maik Veste, 2024-01-05 This open access book about the sustainability of marine and terrestrial ecosystems in southern Africa provides a synthesis of the research program Science Partnerships for the Adaptation to Complex Earth System Processes SPACES II 2018 2022 It addresses the scientific social and economic issues related to climate change its potential impacts on the various ecosystems adaptations and management interventions for enhancing systems resilience in Southern Africa It is written by numerous scientists from African states and Germany and summarizes the latest research findings which are of great relevance for a better understanding of climate change impacts adaptations and vulnerabilities as well as for developing management options and policy options to reduce the associated risks This is crucial considering that the projected African population increase is exceptional Furthermore climate change is assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts heat waves and flooding Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna The surrounding oceans form in turn a bottle neck within the ocean s global thermohaline circulation act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive Considering these important aspects the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership The book is aimed at students teachers and scientists in the fields of terrestrial and marine ecology environmental nature and landscape planning agriculture environmental and resource management biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations nature conservationists and policy makers of related disciplines

The Economics of Integrated Pest Management of Insects David W Onstad, Philip Crain, 2019-09-02 The book begins by establishing an economic framework upon which to apply the principles of IPM Then it looks at the entomological applications of economics specifically economic analyses concerning chemical biological cultural and genetic control tactics as well as host plant resistance and the cost of sampling Lastly it evaluates whether the control provided by a traditional IPM system is sufficient or if changes to the system design would yield greater benefits World Edible Nuts Economy S.
