**Mainstreaming Equality in the European Union** Teresa Rees, 2006-06-19. Mainstreaming Equality in the European Union provides a critical overview and evaluation of the potential role of the EU in perpetuating or breaking down gender segregation in the EU labour force. Teresa Rees draws upon feminist theoretical frameworks in assessing Equal Opportunities policies and the role of training in the labour market. The same economic imperatives which put women's training on the agenda have heightened interest in designing training which attracts women into mainstream provision. How Users Matter Nelly Oudshoorn, Trevor Pinch, 2005-08-12. Users have become an integral part of technology studies. The essays in this volume look at the creative capacity of users to shape technology in all phases from design to implementation. Using a variety of theoretical approaches including a feminist focus on users and use in place of the traditional emphasis on men and machines, concepts from semiotics and the cultural studies view of consumption as a cultural activity, these essays examine what users do with technology and in turn what technology does to users. The contributors consider how users consume, modify, domesticate, design, reconfigure and resist technological development and how users are defined and transformed by technology. The essays in part I show that resistance to and non use of a technology can be a crucial factor in the eventual modification and improvement of that technology; examples considered include the introduction of the telephone into rural America and the influence of non users of the Internet. The essays in part II look at advocacy groups and the many kinds of users they represent particularly in the context of health care and clinical testing. The essays in part III examine the role of users in different phases of the design, testing and selling of technology. Included here is an enlightening account of one

company's design process for men's and women's shavers which resulted in a Ladyshave for users assumed to be technophobes Taken together the essays in *How Users Matter* show that any understanding of users must take into consideration the multiplicity of roles they play and that the conventional distinction between users and producers is largely artificial

**Virtual Gender** Alison Adam, Eileen Green, 2005-08-03 As yet there has been relatively little published on women's activities in relation to new digital technologies *Virtual Gender* brings together theoretical perspectives from feminist theory the sociology of technology and gender studies with well designed empirical studies to throw new light on the impact of ICTs on contemporary social life A line up of authors from around the world looks at the gender and technology issues related to leisure pleasure and consumption identity and self Their research is set against a backdrop of renewed interest in citizenship and ethics and how these concepts are recreated in an on line situation particularly in local settings With chapters on subjects ranging from gender switching on line computer games and cyberstalking to the use of the domestic telephone this stimulating collection challenges the stereotype of woman as a passive victim of technology It offers new ways of looking at the many dimensions in which ICTs can be said to be gendered and will be a rich resource for students and teachers in this expanding field of study
