Guide to Information Sources in Mathematics and Statistics Martha A. Tucker,Nancy D. Anderson,2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free

Early Periodical Indexes Robert Balay,2000-12-20 Balay s Early Periodical Indexes is the most comprehensive guide available to the indexing of periodical literature from the 16th century until the end of the 19th century limited in scope to European languages The material itself is widely scattered difficult to find and until now without a systematic way to identify it This extraordinarily useful tool lists and describes titles in a wide range of disciplines including indexes published prior to 1900 that are restricted to periodicals such as Poole s those published later such as Wellesley as well as serial and topical bibliographies citing publications in all formats and Balay explains the relationships among them Electronic databases both Web based and CD ROMs are included Indexes are by author title topical subjects and dates of coverage This landmark resource should be a familiar sight in every research library
