Exploring the Mathematical Education of Teachers Using TEDS-M Data Maria Teresa Tatto, Michael C. Rodriguez, Wendy M. Smith, Mark D. Reckase, Kiril Bankov, 2018-08-16 This book uses the publicly available TEDS M data to answer such questions as How does teacher education contribute to the learning outcomes of future teachers Are there programs that are more successful than others in helping teachers learn to teach mathematics How does the local and national policy environment contribute to teacher education outcomes It invites readers to explore these questions across a large number of international settings The importance of preparing future mathematics teachers has become a priority across many nations Across the globe nations have allocated resources and expertise to this endeavour Yet in spite of the importance accorded to teacher education not much is known about different approaches to preparing knowledgeable teachers and whether these approaches do in fact achieve their purpose The Mathematics Teacher Education and Development Study TEDS M is the first and to date the only cross national study using scientific and representative samples to provide empirical data on the knowledge that future mathematics teachers of primary and secondary school acquire in their teacher education programs The study addresses the central importance of teacher knowledge in learning to teach mathematics by examining variation in the nature and influence of teacher education programs within and across countries The study collected data on teacher education programs structure curriculum and opportunities to learn on teacher educators characteristics and beliefs and on future mathematics teachers individual characteristics beliefs and mathematics and pedagogical knowledge across 17 countries providing a unique opportunity to explore enduring questions in the field **The Mathematics Education of Prospective Secondary Teachers Around the World** Marilyn E. Strutchens, Rongjin Huang, Leticia Losano, Despina Potari, Márcia Cristina de Costa Trindade

Cyrino, João Pedro da Ponte, Rose Mary Zbiek, 2016-10-22 This volume shares and discusses significant new trends and developments in research and practices related to various aspects of preparing prospective secondary mathematics teachers from 2005 2015 It provides both an overview of the current state of the art and outstanding recent research reports from an international perspective The authors completed a thorough review of the literature by examining major journals in the field of mathematics education and other journals related to teacher education and technology The systematic review includes four major themes field experiences technologies tools and resources teachers knowledge and teachers professional identities Each of them is presented regarding theoretical perspectives methodologies and major findings Then the authors discuss what is known in the field and what we still need to know related to the major topics **International Perspectives on Teacher Knowledge, Beliefs and Opportunities to Learn** Sigrid Blömeke, Feng-Jui Hsieh, Gabriele

Kaiser, William H. Schmidt, 2013-09-09 This book reviews the Teacher Education and Development Study Learning to Teach Mathematics which tested 23 000 primary and secondary level math teachers from 16 countries on content knowledge and asked their opinions on beliefs and opportunities to learn *Constructing Knowledge for Teaching Secondary Mathematics*

Orit Zaslavsky, Peter Sullivan, 2011-04-11 Teacher education seeks to transform prospective and or practicing teachers from neophyte possibly uncritical perspectives on teaching and learning to more knowledgeable adaptable analytic insightful observant resourceful reflective and confident professionals ready to address whatever challenges teaching secondary mathematics presents This transformation occurs optimally through constructive engagement in tasks that foster knowledge for teaching secondary mathematics Ideally such tasks provide a bridge between theory and practice and challenge surprise disturb confront extend or provoke examination of alternatives drawn from the context of teaching We define tasks as the problems or activities that having been developed evaluated and refined over time are posed to teacher education participants Such participants are expected to engage in these tasks collaboratively energetically and intellectually with an open mind and an orientation to future practice The tasks might be similar to those used by classroom teachers e g the analysis of a graphing problem or idiosyncratic to teacher education e g critique of videotaped practice This edited volume includes chapters based around unifying themes of tasks used in secondary mathematics teacher education These themes reflect goals for mathematics teacher education and are closely related to various aspects of knowledge required for teaching secondary mathematics They are not based on the conventional content topics of teacher education e g decimals grouping practices but on broad goals such as adaptability identifying similarities productive disposition overcoming barriers micro simulations choosing tools and study of practice This approach is innovative and appeals both to prominent authors and to our target audiences **Policy, Practice, and Readiness to Teach Primary and Secondary Mathematics in 17**

Countries Maria Teresa Tatto, John Schwille, Sharon Louise Senk, 2012 TEDS M represents the first large scale international comparative study of the preparation of primary and lower secondary specifically mathematics teachers IEA considers TEDS M a landmark study in terms of its examination within both national and international contexts of country level policies relating to the preparation of future teachers of mathematics The authors of this report look closely at how these policies are played out in the participating countries varied teacher education programs and instructional practices and speculate on the implications of these programs and practices for student learning in schools They also suggest how TEDS M might contribute to ongoing research into teacher education The Mathematics Teacher Education Partnership W. Gary Martin, Brian R.

Lawler, Alyson E. Lischka, Wendy M. Smith, 2020-01-01 This book provides an overview of a body of work conducted over the past seven years related to the preparation of secondary mathematics teachers by the Mathematics Teacher Education Partnership MTE Partnership a national consortium of more than 90 universities and 100 school systems The MTE Partnership is organized as a Networked Improvement Community NIC which combines the disciplined inquiry of

improvement science with the power of networking to accelerate improvement by engaging a broad set of participants The MTE Partnership is addressing key challenges in secondary mathematics teacher preparation including Supporting the development of content knowledge relevant to teaching secondary mathematics Providing effective clinical experiences to teacher candidates Recruiting secondary mathematics teacher candidates ensuring program completion and their subsequent retention in the field as early career teachers Supporting overall transformation of secondary mathematics teacher preparation in alignment with these challenges Ensuring a focus on equity and social justice in secondary mathematics teacher recruitment preparation and induction This book outlines existing knowledge related to each of these key challenges as well as the work of Research Action Clusters RACs formed to address the challenges Each RAC includes participants from multiple institutions who work collaboratively to iteratively develop test and refine processes and products that can help programs more effectively prepare secondary mathematics teacher candidates The book describes promising approaches to improving aspects of secondary mathematics teacher preparation developed by the RACs including specific products that have been developed which will inform the work of others involved in secondary mathematics teacher preparation In addition reflections on the use of the NIC model provides insights for others considering this research design Particular references to the Standards for Preparing Teachers of Mathematics Association of Mathematics Teacher Educators 2017 are included throughout the book

Teacher Education Matters William H. Schmidt, Sigrid Blömeke, Maria Teresa Tatto, 2011-01-20 Based on a major international teacher education research project the Mathematics Teaching in the 21st Century Study MT21 this book investigates the preservice preparation of middle school mathematics teachers in the United States South Korea Taiwan Germany Bulgaria and Mexico The study was funded by the National Science Foundation and the participating countries William Schmidt co author of the influential TIMSS study on student test results in science and math and Maria Teresa Tatto director of the Teacher Education and Development study or TEDS M led a collaborative team of international researchers in this study Using the results of more than 2 500 surveys the authors examine the differential contribution of the six countries teacher education models to the knowledge skills and dispositions of their future mathematics teachers Case studies and detailed analyses of the teacher education curriculum across the participating countries provide rich contextual information to explain the survey findings This study is the first to examine the resource allocation and economic support in teacher education vis vis other mathematics related professions and it shows that differential investment patterns are consistent with the level of teaching knowledge found in each country s new teachers The book includes a chapter on policy implications with a special focus on teacher preparation in the United States

The Learning and Development of Mathematics Teacher Educators Merrilyn Goos, Kim Beswick, 2021-04-07 Research in mathematics teacher education as a distinctive field of inquiry has grown substantially over the past 10 15 years Within this field there is emerging interest in how mathematics teacher educators MTEs themselves learn and develop Until recently

there were few published studies on this topic and the processes by which mathematics teacher educators learn and the forms of knowledge they require for effective practice had not been systematically investigated. However, researchers in mathematics education are now beginning to investigate the development of MTE expertise and associated issues. This volume draws on the latest research and thinking in this area and is therefore timely to stimulate future development and directions. It will survey the emerging field of inquiry in mathematics education, combining the work of established scholars with perspectives of newcomers to the field, with the aim of influencing development of the field, invite cross-cultural comparisons in becoming a mathematics teacher educator by highlighting issues in the development of MTEs in different countries, and examine the roles of both mathematics educators and mathematicians in preparing future teachers of mathematics. The primary audience will be university-based mathematics teacher educators and MTE researchers and postgraduate research students who are seeking academic careers as MTEs. Additional interest may come from teacher educators in disciplines other than mathematics and education policy makers responsible for accreditation and quality control of initial teacher education programs.
