Modern Mathematics Dirk De Bock, 2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since

the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends

Handlungsorientiertes Erschließen der Größen Gramm und Kilogramm im dritten Schuljahr G. Stäbe, 2014-04-11 Inhaltsangabe Einleitung Als Begründung für die Auswahl des Themas Handlungsorientiertes Erschließen der Größen Gramm und Kilogramm im dritten Schuljahr möchte ich zu allererst die Beobachtung anführen dass sich meine Schüler besonders in Unterrichtsphasen die durch Handlungsorientierung geprägt sind sehr motiviert zeigen und das Unterrichtsgeschehen aktiv mitgestalten Außerdem stelle ich immer wieder ein erhöhtes Maß an Selbstständigkeit fest wenn bei der Gruppenarbeit als eine mögliche Organisationsform der handlungsorientierten Arbeit nach richtigen Antworten bzw nach Lösungen und Lösungswegen gesucht wird Besonders das Nachfragen das Diskutieren das Hinweisen auf Fehler und das Klären von Missverständnissen läuft oft eigenständig und ungezwungen zwischen den Gruppenmitgliedern ab Eindrucksvoll lie sich dieses Verhalten in meiner Klasse bisher vor allem bei den Themen Längen und Geldwerte sowie bei geometrischen Themen beobachten Ich möchte mich im Rahmen dieser Hausarbeit mit einem Thema befassen das sich der Handlungsorientierung als Unterrichtsprinzip annimmt Die vorgesehene Erschließung der Größen Gramm und Kilogramm lässt die Rufe nach einer handlungsorientierten Aufbereitung laut werden Denn Kinder müssen Gewichte aktiv erfahren um eine Größenvorstellung aufbauen zu können bevor sie dann auf der abstrakten symbolischen Ebene mit Gewichtsgrößen rechnen Die Schüler müssen die Begriffe Gramm und Kilogramm mit konkreten Inhalten verbinden können So können sie im Vorfeld zu einer Aufgabe ein Ergebnis grob abschätzen bzw im Nachhinein den Sinn oder Unsinn eines berechneten Ergebnisses besser einschätzen Ich verspreche mir vom ausgewählten Gewichtsgrößenbereich vielfältige Ansatzpunkte für ein handlungsorientiertes Arbeiten Mein Interesse gilt dabei der Leitfrage wie ein handlungsorientiertes Erschließen des oben genannten Größenbereiches im Unterricht verwirklicht werden kann Für die Beantwortung dieser Leitfrage stellt sich mir zunächst die Aufgabe die Legitimation für eine Handlungsorientierung im Unterricht näher zu erläutern und auf das Verhältnis zwischen Handlungsorientierung und Lerneffizienz einzugehen Um die Leitfrage ausreichend beantworten zu können beschreibe ich mich im theoretischen Teil mit grundlegenden Aspekten der Handlungsorientierung und gehe nach dem Versuch einer Begriffsdefinition der Frage nach warum eine Handlungsorientierung des Unterrichts für Kinder im Grundschulalter wichtig
