

Recall that we have used
"multiplication" of the counting
numbers to define addition that works
perfectly. This is an important
technical point about Peano's Axioms. We
are using this strategy and hope, with our
appeal to the Generalized Associative Law,
convince you that the Generalized
Associative Law holds for all groups.
We are assuming associativity. We are
using the distributive law. Hopefully
you will find this is a good idea and
be convinced we have proved the
Proposition. Please review.
