SOMEONE WAS ARMING FOR CONQUEST!

Matter Of Metalaw

Steven J. Dick

Matter Of Metalaw:

A Matter of Metalaw George Harry Stine, Lee Correy, 1986 When a Metalaw Investigation Team vanishes on a secret assignment Peter Starbuck and his starship crew are sent to investigate **Contact with Extraterrestrial Intelligence and Human Law** Michael Bohlander, 2023-08-07 It is statistically unlikely that humans are the only intelligent species in the universe Nothing about the others will be known until contact is made beyond a radio signal from space that merely tells us they existed when it was sent That contact may occur tomorrow in a hundred years or never If it does it will be a high risk scenario for humanity It may be peaceful or hostile Relying on alien altruism and benign intentions is wishful thinking We need to begin identifying as a planetary species and develop a global consensus on how to respond in either scenario

Astrobiology, Discovery, and Societal Impact Steven J. Dick, 2018-05-03 The search for life in the universe once the stuff of science fiction is now a robust worldwide research program with a well defined roadmap probing both scientific and societal issues This volume examines the humanistic aspects of astrobiology systematically discussing the approaches critical issues and implications of discovering life beyond Earth What do the concepts of life and intelligence culture and civilization technology and communication mean in a cosmic context What are the theological and philosophical implications if we find life and if we do not Steven J Dick argues that given recent scientific findings the discovery of life in some form beyond Earth is likely and so we need to study the possible impacts of such a discovery and formulate policies to deal with them The remarkable and often surprising results are presented here in a form accessible to disciplines across the sciences social sciences and humanities **Precedent and Statute** Orlin Yalnazov, 2018-11-02 Should laws be made in courts or in parliaments Orlin Yalnazov proposes a new approach to the problem He conceptualizes law as an information product and law making as an exercise in production Law making has inputs and outputs and technology is used to transform one into the other Law may depending on input and technology take on different forms it can be vague or it can be certain The technologies between which we may choose are precedent and statute Differences between the two being sizeable our choice has significant repercussions for the cost of the input and the form of the output The author applies this framework to several problems including the comparison between the common and the civil law comparative civil procedure and EU law Perhaps most critically he offers a critique of the efficiency of the common law hypothesis **Future and Fantastic Worlds**

Sheldon Jaffery, 1987-01-01 Future and Fantastic Worlds embodies an unusual approach to the field of bibliographic research including over 700 annotations of every DAW book published through mid 1987 with indexes by author artist and title providing a massive guide to modern SF writers and their works with much background data Interspersed throughout the book are numerous wry irreverent and amusing observations offered by the late and highly respected researcher in this extremely valuable genre tool **Laws and Lawmakers** Marc Lange, 2009-07-09 What distinguishes laws of nature from ordinary facts What are the lawmakers the facts in virtue of which the laws are laws How can laws be necessary yet

contingent Lange provocatively argues that laws are distinguished by their necessity which is grounded in primitive subjunctive facts while also providing a non technical and accessible survey of the field *Because Without Cause* Marc Lange,2017 Not all scientific explanations work by describing causal connections between events or the world s overall causal structure In addition mathematicians regard some proofs as explaining why the theorems being proved do in fact hold This book proposes new philosophical accounts of many kinds of non causal explanations in science and mathematics

Metaphysics and Science Stephen Mumford,Matthew Tugby,2013-06-27 This collection brings together the latest new work within an emerging philosophical discipline the metaphysics of science A new definition of this line of philosophical enquiry is developed and leading academics offer original essays on four key topics at the heart of the subject laws causation natural kinds and emergence **Solar Kill** Charles Ingrid,1987 First book in the Sand Wars tetralogy Solar Kill tells of a soldier left to fight a losing battle against mankind s alien foe in an alien altered suit of armor which could transform him into a merciless killing machine It is the story of his desperate struggle to survive and his determination to claim justice for the lives and worlds wrongfully destroyed Science Fantasy Voices and Visions of Cosmic Religion William W. Mountcastle,1996 This book offers a new approach to comparative religion suggested by science fantasy interpretations of traditional religious teachings Each chapter focuses on a basic religious theme God Mediators Ideal Community and Human Destiny that becomes part of a projected future theology that has been shaped by ideas from many religions and the extraterrestrial imperative Contents Religious Pluralism and the Extraterrestrial Imperative Science Fantasy Visions of God Extraterrestrial Messiahs from Inner Space Interplanetary Kingdoms for God Human Destiny and Sacred Science The Emerging Shape of Cosmic Religion Bibliography
