Matters Of Life And Death Crisis In Biomedical Ethics:

Matters of Life and Death David Orentlicher, 2001-12-02 Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict

Matters of Life and Death David Orentlicher, 2021-03-09 Philosophical debates over the fundamental principles that should guide life and death medical decisions usually occur at a considerable remove from the tough real world choices made in hospital rooms courthouses and legislatures David Orentlicher seeks to change that drawing on his extensive experience in both medicine and law to address the translation of moral principle into practice a move that itself generates important moral concerns Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict *Matters of Life and Death* is a rich and stimulating contribution to bioethics and law It is the first book to examine closely the broad problems of translating principle into practice And by analyzing specific controversies along the way it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death

Bioethics and the Christian Life David VanDrunen, 2009-10-07 Just about everyone will face a difficult bioethics decision at some point In this book a theologian ethicist and lawyer equips Christians to make such decisions based on biblical truth wisdom and virtue Though a relatively new discipline bioethics has generated extraordinary interest due to a number of socially pressing issues *Bioethics and the Christian Life* places bioethics within the holistic context of the Christian life both developing a general Christian approach to making bioethics decisions and addressing a number of specific controversial areas of bioethics Clear concise and well organized the book is divided into three sections The first lays the theological foundation for bioethics decision making and discusses the importance of wisdom and virtue in working through these issues The second section addresses beginning of

life issues such as abortion stem cell research and infertility treatments The third section covers end of life issues such as living wills accepting and refusing medical treatment and treatment of patients in permanent vegetative states **Current Catalog** National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965 70 Bioethics, Law, and Human Life Issues D. Brian Scarnecchia,2010-06-02 Bioethics Law and Human Life Issues A Catholic Perspective on Marriage Family Contraception Abortion Reproductive Technology and Death and Dying draws on the Magisterial teaching of the Catholic Church to outline a Catholic response to a host of controversial issues related to human life Scarnecchia lays out a Catholic moral theology based on the writings of Pope John Paul II and Thomas Aquinas and he then applies those Christian moral principles to today s most contentious ethical issues including reproductive technology embryo adoption contraception abortion family and same sex marriage and euthanasia and assisted suicide This review of Catholic moral principles brings together an in depth consideration of the central human life issues of our day with abundant reference to the Church s social teaching and to contrasting positions of today s leading ethicists **A Matter of Life and Death** United States. Congress. House. Committee on Veterans' Affairs,2014 *Matters of Life and Death* Tom L. Beauchamp,1993 A collection of original essays by leading moral philosophers written specifically for students with no prior background in ethics Focusing on the major ethical issues of the day the essays cover problems such as abortion euthanasia capital punishment famine war suicide the environment and animal rights Genomics and Bioethics: Interdisciplinary Perspectives, Technologies and Advancements Hongladarom, Soraj,2010-09-30 This book focuses on ethical social cultural and legal implications of genetics genomics and genetic databanking as they relate to concrete cultural and historical traditions Provided by publisher

Fagothey's Right & Reason Austin Fagothey,Milton A. Gonsalves,1989 This book is designed for undergraduate courses in ethics The Right to Be Protected from Committing Suicide Jonathan Herring,2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy
