*Reasonable* Michael Heyd, 1995 This book analyses the theological medical and scientific critique of enthusiasm claims to direct divine inspiration in early modern Europe and the contribution of that critique to a more secular culture on the eve of the Enlightenment      *Leibniz: Representation, Continuity and the Spatiotemporal* D.A. Anapolitanos, 2013-03-09

Anapolitanos critically examines and evaluates three basic characteristics of the Leibnizian metaphysical system Leibniz's version of representation the principle of continuity and space-time and the phenomenally spatio-temporal Chapter I discusses representation especially as it refers to the connection between the real and the phenomenal levels of Leibniz's system Chapter II examines the principle of continuity including continuity as a general feature of every level of Leibniz's metaphysics The position adopted is that the problem of the composition of the continuum played a central role on the development of Leibniz's non-spatial and non-temporal monadic metaphysics The machinery developed is then used to offer a new interpretation of Leibniz metaphysics of space and time The notion of indirect representation is used to construct appropriate models that clarify the nature of the correspondence between the real and the phenomenal levels in the case of the relations spatially between and temporally between as well as in the cases of spatial and temporal density Finally Leibniz's solution to the problem of the continuum is discussed arguing that it is not entirely satisfactory A non-anachronistic alternative is proposed compatible with Leibniz's metaphysics of substance      **Bookseller and the Stationery Trades'**
