Philosophy An Orthodox Christian Understanding:

Philosophy Apostolos Makrakēs, 1977-01-01 Philosophy: an Orthodox Christian understanding Apostolos Makrakēs, 1977 **How Greek Philosophy Corrupted the Christian Concept of God** Richard R. Hopkins, 2023-02-14

This insightful book brings profound new insights to the Trinitarian doctrines of orthodox Christianity. With clear and precise documentation, the book shows how these doctrines migrated into early Christianity from Greek philosophy. The various aspects of Trinitarian belief are isolated, linked to their Greek sources, and carefully analyzed to show they differ radically from biblical teaching. The Writings of early Church Fathers portrayed in their historical context show that during the second century, theological concepts taught in Platonism were adopted as Christianity struggled to end Roman persecution. Emperor Marcus Aurelius, a famous Stoic philosopher, was putting Christians to death because their belief did not conform to the Hellenized religion of the day. The book shows that the early church fathers sought to save their people's lives by redefining the Christian God in Greek terms. Their efforts brought metaphysics to Christianity and ushered in concepts like the Trinity. After presenting the historical setting in which these philosophical errors were embraced as Christian doctrine, the book compares orthodox Christian theology today called classical theism to biblical teachings. The book identifies how Greek philosophy has influenced major attributes of God taught in classical theism. The book constitutes a major challenge to those who accept the tenants of classical theism but do not know the many aspects of their doctrine that are based on Greek philosophy.

Theology and Philosophy in Eastern Orthodoxy Christoph Schneider, 2021-11-25. Even in the twenty-first century, critical and creative engagement with modern and postmodern philosophy is a rarity in Orthodox circles. The collection of essays presented here by Christoph Schneider makes a significant contribution to overcoming this deficit. Eight scholars from six different countries working on the intersection between Orthodox thought and philosophy present their research in short and accessible form. The topics covered range from political philosophy to phenomenology, metaphysics, philosophy of self, logic, ethics, and philosophy of language. The authors do not all promote one particular approach to the relationship between Orthodox theology and philosophy. Nevertheless, taken together, their work demonstrates that Orthodox scholarship is not confined to historical research about the Byzantine era but can contribute to and enrich contemporary intellectual debates.

Robert Spaemann's Philosophy of the Human Person Holger Zaborowski, 2010-02-04. The German philosopher Robert Spaemann provides an important contribution to a number of contemporary debates in philosophy and theology, opening up possibilities for conversation between these disciplines. He engages in a dialogue with classical and contemporary positions and often formulates important and original insights which lie beyond common alternatives. In this study, Holger Zaborowski provides an analysis of the most important features of Spaemann's philosophy and shows the unity of his thought. The question "Who is a person?" is of increasing significance. Are all human beings persons? Are there animals that can be considered

persons What does it mean to speak of personal identity and of the dignity of the person Spaemann provides an answer to these questions Every human being he argues is a person and therefore has his nature in freedom In order to understand the person Spaemann explains we have to think about the relation between nature and freedom and avoid the reductive accounts of this relation prevalent in important strands of modern thought Spaemann develops a challenging critique of modernity incorporating analysis of modern anti modernisms and showing that these are also subject to a dialectical development perpetuating the problematic shortcomings of many features of modern reasoning If we do not want to abolish ourselves as persons Spaemann reasons we need to find a way of understanding ourselves that evades the dialectic of modernity Thus he reminds his readers of self evident knowledge insights that we have once already known but tend to forget Philosophies of Christianity Balázs M. McIntosh, 2018-03-08 John McIntosh attempts to describe more accurately and completely the spectrum of Evangelicalism Anglican that three successive principals of Moore Theological College appropriated and taught

in the period Each was an outstanding graduate of Oxford Cambridge and Dublin respectively The study traces the circumstances of their appointment and seeks to define the convictions they held against the background of challenges and changes to their Christian faith they faced in their day A close examination of their published and unpublished literary oeuvre clears away misunderstandings and even misrepresentations of their thought and influence In so doing it explains how it was that those Evangelicals in the diocese who adhered more closely to their Reformation tradition finally prevailed decisively over those who were Protestant but liberal

Religion and Innovation Donald A. Yerxa, 2015-12-17 It is often assumed that religion is the backward looking servant of tradition and the status quo utterly opposed to the new This refrain in so much of recent polemical writing has permeated the public mind and can even be found in academic publications But recent scholarship increasingly shows that this view is a gross simplification that in fact religious beliefs and practices have contributed to significant changes in human affairs political and legal social and artistic scientific and commercial This is certainly not to say that religion is always innovative But the relationship between religion and innovation is much more complex and instructive than is generally assumed Religion and Innovation includes contributions from leading historians archaeologists and social scientists who offer findings about the relationship between religion and innovation The essays collected in this volume range from discussions of the transformative power of religion in early societies to re examinations of our notions of naturalism secularization and progress to explorations of cutting edge contemporary issues Combining scholarly rigor with clear accessible writing Religion and Innovation Antagonists or Partners is essential reading for anyone interested in the history of religion and the ongoing debates about its role in the modern world and into the future

Theology as Ascetic Act Nathan G. Jennings, 2010 Nathan G Jennings s captivating study explores the ascetical logic of the various practices that Christians call theology By establishing ascetic practice as coherent within the logic of Christian thought Jennings argues that Christian theology itself as an embodied Christian practice is a type of and participant in Christian asceticism Jennings establishes that the implications of such an understanding of Christian theology can be brought to bear on modern Christian scholarship in profound and transformative ways With engagements and references that span a vast terrain from Patristic authors to modern systematic theologians Theology as Ascetic Act Disciplining Christian Discourse is a significant contribution to both modern Christian thought and the study of asceticism

[Commentary on Kierkegaard's Concluding Unscientific Postscript](#) Niels Thulstrup, 2014-07-14 In the first comprehensive commentary on Soren Kierkegaard s Concluding Unscientific Postscript the eminent Kierkegaard specialist Niels Thulstrup clarifies the book s intricate allusions

to the thought and literature of its own and past ages A central work both in Kierkegaard's authorship and in the history of philosophy the Postscript breaks completely with a long tradition of religious and philosophical thought In his introduction and commentary presented here in translation from the Danish Professor Thulstrup explains this break and the unique relationship of the work to Kierkegaard's other books Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Eclipse of Grace Nicholas Adams, 2013-02-19 Eclipse of Grace offers original insights into the roots of modern theology by introducing systematic theologians and Christian ethicists to Hegel through a focus on three of his seminal texts Phenomenology of Spirit Science of Logic and Lectures on the Philosophy of Religion Presents brilliant and original insights into Hegel's significance for modern theology Argues that theologically Hegel has been misconstrued and that much more can be gained by focusing on the logic that he develops out of an engagement with Christian doctrines Features an original structure organized as a set of commentaries on individual Hegel texts and not just presenting overviews of his entire corpus Offers detailed engagement with Hegel's texts rather than relying on generalizations about Hegelian philosophy Provides an illuminating accessible and lucid account of the thinking of the major figures in modern German philosophy and theology

The Theological Vision of Reinhold Niebuhr's "The Irony of American History" Scott R. Erwin, 2013-06-13 Reinhold Niebuhr remains at the center of a national conversation about America's role in the world and commentators with divergent political and religious positions draw upon his 1951 work The Irony of American History in support of their views In this study Scott R Erwin argues that an appreciation of Niebuhr's theological vision is necessary for understanding the full measure of Irony An appreciation of Niebuhr's theology is important because the majority of individuals reading Irony today fail to acknowledge the central role that his Christian beliefs played in its formulation Niebuhr described his theological vision as being in the battle and above it and in more extensive terms explained it to be a combination of moral resoluteness about the immediate issues with a religious awareness of another dimension of meaning and judgment It was this perspective that led Niebuhr in Irony to assert that America must both take morally hazardous action in combating the aggression of the Soviet Union and engage in critical self evaluation to prevent the country from assuming the most odious traits of its Cold War foe Niebuhr developed this theological vision over the course of the 1930s and 1940s through engagement with Christian doctrine as most readily seen in his academic works such as The Nature and Destiny of Man and engagement with current history as seen in his many journalistic writings during this period By focusing primarily on Niebuhr's writings between 1931 and 1951 Erwin traces the development of his Christian interpretation of human nature and history establishes

how it informed his theological vision and reveals how that theological vision underlay his writings on current affairs Such excavation is necessary given the fact that Niebuhr became less explicit about the theological nature of his later writings Indeed rather than clearly advance his theological vision in Irony Niebuhr chose to communicate it implicitly through the historical figure of Abraham Lincoln In multiple writings over the course of his career Niebuhr referred to the sixteenth president as both America s greatest statesman and theologian and ultimately portrayed him as the personification of his own religious beliefs Erwin demonstrates that the study of both Niebuhr s theological vision and his application of this vision throughout his life is instructive as the contemporary generation engages with global problems

The Concept of Person in Judaism, Christianity and Islam Georges Tamer,2023-11-06 The sixth volume of the series Key Concepts of Interreligious Discourses investigates the roots of the concept of person in Judaism Christianity and Islam and its relevance for the present time The concept of person lies at the core of central ideas in the modern world such as the value and development of personal identity the sanctity of human person and the human rights based on that In societies that are shaped by a long Christian tradition these ideas are associated often with the belief in the creation of man in the image of God But although Judaism shares with Christianity the same Biblical texts about the creation of man and also the Qur n knows Adam as the first human being created by God and his representative on earth the focus on the concept of person is in each one of these religions a different one So the crucial question is how did the concept of person evolve in Judaism Christianity and Islam out of the concept of human being What are the special features of personhood in each one of these traditions The volume presents the concept of person in its different aspects as anchored in Judaism Christianity and Islam It unfolds commonalities and differences between the three monotheistic religions as well as the manifold discourses about the meaning of person within these three religions
