Philosophy Goes To School:

Philosophy Goes to School Matthew Lipman, 2010 Lipman examines the impact his program has had and may yet have on the process of education in philosophy *The Pursuit of Wisdom and Happiness in Education* Sean Steel, 2014-05-21 Explores the nature and role of wisdom in education Modern scholarship has struggled to come to terms with the meaning of wisdom and its significance in the field of education This book examines the importance of pursuing wisdom in schools by turning to ancient and medieval sources for clarification concerning the nature of wisdom Sean Steel argues that our current emphasis on the development of rigorous critical analytic thinking skills on assessment and on accountability in education has negatively impacted the ability of schools to foster an environment in which both students and teachers might pursue wisdom Although in recent times efforts have been made to incorporate the pursuit of wisdom into schools through Philosophy for Children P4C and contemplative education programming such initiatives have missed their mark Steel therefore recommends not more accountability in education for the purpose of ensuring global competitiveness but rather the institutional promotion of periods of leisure or scholē in the school day Drawing upon his own experiences as a teacher who has tried to encourage students to search for wisdom the author discusses some of the challenges and pitfalls of wisdom seeking He also offers examples of various wisdom seeking activities that might bear fruit in the classroom

Philosophy in Schools Felicity Haynes, 2017-10-02 In 1972 Matthew Lipman founded the Institute of Advancement for Philosophy for Children IAPC producing a series of novels and teaching manuals promoting philosophical inquiry at all levels of schooling The programme consisted of stories about children discussing traditional topics of ethics values logic reality perception and politics as they related to their own daily experiences Philosophy for Children has been adapted beyond the IAPC texts but the process remains one of an open community of inquiry in which teachers promote respect conceptual clarity critical judgement and active listening without imposing their own ideas Philosophy in Schools describes the successes and difficulties in implementing this community of inquiry model The book covers topics including the formation of non didactic courses in ethics the difficulties of fitting a post compulsory philosophy course into a standard curriculum framework and the political assumptions of adopting this model in a low socio economic school The contributions also ask deeper questions about how a genuine community of inquiry model is incompatible with conventional models of schooling with their positioning of the discipline of philosophy in the curriculum This book was originally published as a special issue of *Educational Philosophy and Theory*

Resources in Education , 1997 *On Becoming Responsible* Michael S. Pritchard, 1991

Pritchard provides a deliberate and convincing argument for a starting point for the discussion of moral development on in which self regard and empathy provide equally essential groundings for individual morality Drawing essential elements from the work of Reid Strawson Rawls Kohlberg and Gilligan he builds a comprehensive framework for tracing moral development from childhood one that allows human morality to be grounded in both reason and emotion and that recognizes the importance to morality of justice and rights as well as caring and responsibility *Reasonable Children* Michael S.

Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education **Routledge International Handbook of Social Psychology of the Classroom** Christine M.

Culture and identity The Routledge International Handbook of Social Psychology of the Classroom provides a review of current theories related to the social psychology of the classroom including how these theories apply to classrooms and learners Current evidence clearly shows that areas explored by social psychology and brought together for the first time in this volume can have a very significant impact on classroom learning and student achievement J Hattie Visible Learning A Synthesis of over 800 Meta Analyses Relating to Achievement Routledge 2009 This handbook is a must for all academics whose research relates to the social psychology of the classroom It is also an invaluable resource for teachers and teacher education students who want to understand why they are effective instructors and yet still encounter students in their classes who are not responding as expected

Philosophy For, With, and Of Children Monica B. Glina, 2014-09-26 On one level Philosophy for Children P4C exists takes place and is understood as a set of relatively theory neutral practices we share a story or other kind of stimulus that is both meaningful and philosophically problematic we raise questions about it that will help us inquire into what is problematic we inquire together as a community of philosophical inquiry mostly through a process of dialogue we explore ways to experiment with these dialogical judgments in writing in works of art in action and in life and we self assess our own thinking and our work as a community of inquiry in order to collectively self correct On another level P4C exists takes place and is understood as a set of theory laden and agenda laden practices that are undertaken as means to certain kinds of desired outcomes These are the program s aims and objectives and they come from three places the core practices inherent in P4C those that have become obvious to practitioners or have developed out of extensive practice and those that have developed out of philosophical and empirical research in philosophy and education including epistemology learning theory argumentation theory and the politics of discourse and political theory This last kind of work presents the challenge to P4C to find out if there is such a thing as a core theory that justifies the core practices and if so whether the integrity offered by such a theory is either shored up or compromised by being pulled in any of these other directions The diversity of curriculum materials pedagogical protocols and grounding theories P4C has spawned signifies not merely different approaches to but different conceptions of what it means to teach philosophy to children or to engage children in philosophical practices The chapters in Philosophy For With and Of Children present a broad range of directions for P4C and illustrate the considerable diversity of agendas that can be brought to it as well as the ways in which these agendas sometimes complement and sometimes undermine one another
