education How and why do educators do what we do And in what way can and ought education be distinctively Christian  
These are a few of the probing questions for which this book seeks answers Among other contributions Currivean's book

considers what education is chapter 1 what philosophy of education is chapter 2 and what the ultimate goal of education is  
chapter 3 Additionally this book provides a never before Christian overview of twelve philosophies of education chapters 4-15  
Each of those chapters provides an introduction of a particular philosophy of education and some of that philosophy's  
exemplars Each of those chapters also contributes a constructive Christian critique Chapter 16 highlights a biblical

**Corporeal Turn** Maxine Sheets-Johnstone, 2015-10-22 The purpose of *The Corporeal Turn* is to document in a single text the  
impressive array of investigations possible with respect to the body and bodily life and to show that whatever the specific  
topic being examined it is a matter of fathoming and elucidating complex and subtle structures of animate meaning The  
corporeal turn is envisioned as an ever expanding continuous and open ended spiral of inquiry in which deeper and deeper  
understandings are forged understandings that in each instance themselves call out for deeper and deeper inquiries The first  
thirteen essays have already been published as distinct articles The two new essays constituting the final two chapters are  
testimony to this open ended spiral of inquiry      *American Book Publishing Record Cumulative, 1950-1977* R.R. Bowker

National Library of Medicine Current Catalog National Library of Medicine (U.S.), **History of Psychiatry and Medical Psychology** Edwin R. Wallace, John Gach, 2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book's chapters e g Mora's Marx's D B Weiner's examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
