A Philosophy of Music Education Bennett Reimer,1970

A Philosophy of Music Education Bennett Reimer,2022-11-01

Bennett Reimer's *A Philosophy of Music Education* asserts that the nature and value of music education are determined primarily by the nature and value of music. Originally published in 1970 with the third edition originally published in 2003, this text relates findings in the field of aesthetics to their implications for the practice of music education, thus emphasizing practical applications that students and future educators can employ in their teaching and learning. It addresses an increasingly diverse world in which music is viewed not as a singular practice but as a multitude of related practices. Reimer believes that music has characteristics that make it recognizably and distinctively a practice or an art, and that these characteristics can be identified to a reasonable and useful degree, but no doubt never definitively, that music is of value to humans and their communities in a variety of ways related to these characteristics, and that the primary mission of music education is to make musical values widely and deeply available. Each chapter includes case studies, Riffs, and questions for discussion, exploration, Etudes that enhance student learning. This reprint edition includes a new introduction by Peter R. Webster that sets Reimer's work in the context of the development of music education pedagogy and illuminates why this remains an important text for today's students. An excellent introductory text for undergraduate or more advanced music education students, *A Philosophy of Music Education* remains the best single introduction to this important and growing field.

Publisher's description: This text advances the philosophy of its previous editions into new territory, recasting it in light of emerging ideas and interests in philosophy in general and in philosophy of music in particular. The foundational concept that the values of music are gained through direct experiences with its meaningful sounds remains intact but is explained and applied in a broader, more inclusive scope with a synergistic philosophical stance as the basis. *The Oxford Handbook of Asian Philosophies in Music Education*. C. Victor Fung, Professor of Music Education. C. Victor Fung, Associate Professor of Music. Leonard Tan, Leonard Tan, 2024-07-19. This volume focuses on the collective wisdom of Asian philosophies and their implications for music education. All twenty chapters are written by highly regarded philosophers and music educators steeped in various Asian traditions. These chapters will include an explanation of a prominent philosophical tradition, evidence in a contemporary music teaching and learning settings, including its inception and historical development, along with an explanation of how the philosophical tradition works in contemporary music education and suggestions for potential directions in the near and distant future. The book is organized into five sections. Section I is based on Chinese philosophical traditions, which have the longest history and are some of the most influential across Asia and beyond. Chapters in Section II present a snapshot of Japanese and Korean views, beginning with the musical practices in the Joseon Period (1392-1910) that are still being practiced in South Korea today, to Western influences in 19th-century Japan. A collection of philosophical

traditions from South and Southeast Asia are contained in Section III ranging from the insights of King Bhumibol Adulyadej King Rama IX of Thailand an accomplished jazz musician to the Balinese notion of taksu a form of supreme energy and divine power crucial for compelling performances in the performing arts We venture into the Islamic and the Middle Eastern world in Section IV where the dance practices of the Hadhrami Arabs in the Malay Archipelago to traditional sharah music are contextualized within Islamic philosophy This section also describes the philosophical ideas of the 12th century Persian philosopher and founder of the Illuminationist Ishraq philosophy Shihab al Din al Suhrawardi arguing that his ideas have much to recommend music education as this approach requires students to listen in deeper ways absorb more abundantly and move beyond arts education to encompass the education of the whole person Section V concludes with a metaphorical view on a New Silk Road in music education in the 21st century where ideas are traded for mutual benefit and the development multicultural philosophies of music education While there are numerous publications on the philosophy of music education rooted in the Western philosophical traditions of ancient Greece the Asian philosophical voice is virtually silent outside of Asia and this volume aims to begin the long process of redressing this imbalance This volume will open readers to the richness of Asian philosophical sources and hopefully stimulate dialogues that could generate new insights and directions for further development cross pollination and application of some of the world s earliest philosophical traditions

The Oxford Handbook of Philosophy in Music Education Wayne D. Bowman, Ana Lucía Frega, 2012-05-25 In *The Oxford Handbook of Philosophy in Music Education* editors Wayne D Bowman and Ana Lucia Frega have drawn together a variety of philosophical perspectives from the profession s most exciting scholars from all over the world Rather than relegating philosophical inquiry to moot questions and abstract situations the contributors to this volume address everyday concerns faced by music educators everywhere Emphasizing clarity fairness rigour and utility above all *The Oxford Handbook of Philosophy in Music Education* will challenge music educators all over the world to make their own decisions and ultimately contribute to the conversation themselves

Patriotism and Nationalism in Music Education David G. Hebert, Alexandra Kertz-Welzel, 2016-05-13 Music has long served as an emblem of national identity in educational systems throughout the world Patriotic songs are commonly considered healthy and essential ingredients of the school curriculum nurturing the respect loyalty and good citizenship of students But to what extent have music educators critically examined the potential benefits and costs of nationalism Globalization in the contemporary world has revolutionized the nature of international relationships such that patriotism may merit rethinking as an objective for music education The fields of peace studies and education for international understanding may better reflect current values shared by the profession values that often conflict with the nationalistic impulse This is the first book to introduce an international dialogue on this important theme nations covered include Germany the USA South Africa Australia Finland Taiwan Singapore and Canada

Teaching Music Differently Tim Cain, Joanna Cursley, 2017-07-14 Teaching Music Differently explores what music teachers do and why It offers insightful analysis of eight in depth studies of teachers in a range of settings the early years a special school primary and secondary schools a college a prison a conservatoire and a community choir and demonstrates that pedagogy is not simply the delivery of a curriculum or an enactment of a teaching plan Rather a teacher s pedagogy is complex nuanced and influenced by a multitude of factors Exploring the theories teachers hold about their own teaching it reveals that even when teachers are engaged with the same subject their teaching varies substantially It analyses the differences in terms of agency the knowledge and skills that teachers bring to teaching their expectations shaped by their life histories the ways in which they relate to their students and the subject and their ideas about the content they teach what is important what is interesting what is difficult for students to grasp It also explores the constraints that are imposed upon the teachers by curriculum policy institutions society and the students themselves Together with discussion of key ideas for understanding the case studies historical influences on music pedagogy and the main discourses around music teaching

Teaching Music Differently invites all music education professionals to consider their own responses to pedagogical discourses and to use these discourses to further the development of the profession as a whole *The Teaching of Instrumental Music* Richard Colwell, Michael Hewitt, 2015-08-20 This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula This text focuses on the core competencies required for teacher certification in instrumental music The first section of the book focuses on essential issues for a successful instrumental program objectives assessment and evaluation motivation administrative tasks and recruiting and scheduling including block scheduling The second section devotes a chapter to each wind instrument plus percussion and strings and includes troubleshooting checklists for each instrument The third section focuses on rehearsal techniques from the first day through high school College Music Curricula for a New Century Robin D. Moore, 2017-04-03 Critiques and calls for reform have existed for decades within music education but few publications have offered concrete suggestions as to how things might be done differently Motivated by a desire to do just that College Music Curricula for a New Century considers what a more inclusive dynamic and socially engaged curriculum of musical study might look like in universities Editor Robin Moore creates a dialogue among faculty administrators and students about what the future of college music instruction should be and how teachers institutions and organizations can transition to new paradigms Including contributions from leading figures in ethnomusicology music education theory composition professional performance and administration College Music Curricula for a New Century addresses college level curriculum reform focusing primarily on performance and music education degrees and offer ideas and examples for a more inclusive dynamic and socially engaged curriculum of applied musical study This book will appeal to thoughtful faculty looking for direction on how to enact reform to graduate students with investment in shaping future music curricula and to administrators who know change is on the horizon and seek wisdom and practical advice for implementing change College Music Curricula for a New Century reaches far beyond any musical subdiscipline and addresses issues pertinent to all areas of music study Training the Composer Barrett Ashley Johnson, 2010-10-12 While many teachers of music composition have influenced both the aesthetic and eventual success of their students few have equaled the contributions of Arnold Schoenberg and Nadia Boulanger in the twentieth century A larger volume of a more comprehensive collection including all music composition teachers of the era would serve a certain purpose However the unique aspect of the current text examines in detail and herein presented for the first time in print many of the teaching materials and approaches of these two famed musicians Selection of these two teachers for comparison was made owing to the musical position so famously attributed to each Schoenberg's predilection to the German School Boulanger's favoritism to the French Stravinsky aesthetic In making the case for both Schoenberg and Boulanger the Author has chosen two differing philosophies of music education practice of the late twentieth century and early twenty first century those of Bennett Reimer and David Elliott The Author examines the

materials and methods of each Schoenberg and Boulanger in light of each Reimer's and Elliott's case for music education philosophy. Among the subjects discussed are the nature of musical creativity, the process and methods of teaching creativity, music and the teacher-student dynamic, to name a few. In closing, the Author has presented his own suggestions for teachers or would-be teachers of music composition in a seven-step process leading to an effective pedagogy of the subject.

School Music Education and Social Change in Mainland China, Hong Kong and Taiwan Wai-chung Ho, 2011. The Routledge Companion to Music, Mind, and Well-being Penelope Gouk, James Kennaway, Jacomien Prins, Wiebke Thormahlen, 2018-12-07. In recent decades, the relationship between music, emotions, health, and well-being has become a hot topic. Scientific research and new neuroimaging technologies have provided extraordinary new insights into how music affects our brains and bodies, and researchers in fields ranging from psychology and music therapy to history and sociology have turned their attention to the question of how music relates to mind, body, feelings, and health, generating a wealth of insights as well as new challenges. Yet this work is often divided by discipline and methodology, resulting in parallel yet separate discourses. In this context, *The Routledge Companion to Music, Mind, and Well-being* seeks to foster truly interdisciplinary approaches to key questions about the nature of musical experience and to demonstrate the importance of the conceptual and ideological frameworks underlying research in this field. Incorporating perspectives from musicology, history, psychology, neuroscience, music education, philosophy, sociology, linguistics, and music therapy, this volume opens the way for a generative dialogue across both scientific and humanistic scholarship. The Companion is divided into two sections. The chapters in the first, historical, section consider the varied ways in which music, the emotions, well-being, and their interactions have been understood in the past, from Antiquity to the twentieth century, shedding light on the intellectual origins of debates that continue today. The chapters in the second, contemporary, section offer a variety of current scientific perspectives on these topics and engage wider philosophical problems. The Companion ends with chapters that explore the practical application of music in healthcare, education, and welfare, drawing on work on music as a social and ecological phenomenon. Contextualising contemporary scientific research on music within the history of ideas, this volume provides a unique overview of what it means to study music in relation to the mind and well-being.
