Bancroft,2014-08-13 Late in his life the author came to realize that there was much in his world that was uncertain How should he deal with that In this book he explores how some scientists have tolerated uncertainty and goes on to consider uncertainty in relation to our morals The subjugation of women has been a major moral problem through history characterized by certainty In his view this has fostered many other immoralities e g slavery He then reviews the worlds main religions To what extent have they accepted uncertainty and how have they dealt with sex and women How do individuals cope with religious uncertainty By the end of the book he makes the clear distinction between unknowability reflecting the limitations of our comprehension which we should respect and uncertainty which is more relevant to our day to day experiences which we need to cope with and tolerate For this purpose he proposes models of reality that we could use assessing the extent that they have been helpful and modifying them as necessary He sees this modelism as having general significance and to illustrate this he proposes a radical model for incorporating both women and men into our society a two

team approach Tolerance of uncertainty is of fundamental importance to us all Certainty is often problematic and should be viewed with caution **Philosophy's Moods: The Affective Grounds of Thinking** Hagi Kenaan, Ilit Ferber, 2011-08-13

Philosophy's Moods is a collection of original essays interrogating the inseparable bond between mood and philosophical thinking What is the relationship between mood and thinking in philosophy In what sense are we always already philosophizing from within a mood What kinds of mood are central for shaping the space of philosophy What is the philosophical imprint of Aristotle's wonder Kant's melancholy Kierkegaard's anxiety or Nietzsche's shamelessness Philosophy's Moods invites its readers to explore the above questions through diverse methodological perspectives The collection includes twenty one contributions by internationally renowned scholars as well as younger and emerging voices In pondering the place of the subjective and personal roots that thinking is typically called to overcome the book challenges and articulates an alternative to a predominant tendency in philosophy to view the theoretical content and the affective side of thought as opposed to one another **Catalog of Copyright Entries. Includes Part 1 Number 1 Books and Pamphlets Including Serials and Contributions to Periodicals January June Theory of Decision under Uncertainty Itzhak Gilboa, 2009-03-16 This book describes the classical axiomatic theories of decision under uncertainty as well as critiques thereof and alternative theories It focuses on the meaning of probability discussing some definitions and surveying their scope of applicability The behavioral definition of subjective probability serves as a way to present the classical theories culminating in Savage's theorem The limitations of this result as a definition of probability lead to two directions first similar behavioral definitions of more general theories such as non additive probabilities and multiple priors and second cognitive derivations based on case based techniques **Climate, God and Uncertainty** Arthur C. Petersen, 2023-11-28 Climate God and Uncertainty moves beyond Bruno Latour's thought to understand what climate change means for philosophical anthropology and wider culture What are for example the philosophical implications of climate change and its associated uncertainties Referring mainly to works by Latour William James and Heinrich Rickert Petersen develops transcendental naturalism to reinterpret the interface between science and politics in the context of climate change He highlights for instance issues such as the religious disenchantment of nature the scientific disbelief in a plurality of value laden perspectives and the disregard for non modern worldviews in politics In developing its argument the book makes a methodological intervention on the sort of naturalism that guides both Latour's work and a large part of the academic field called science and religion Praise for Climate God and Uncertainty The challenges of a changing climate raise disturbing questions about being human in the world ones that cannot adequately be answered through scientific inquiry In this original interrogation and extension of the work of Bruno Latour Petersen constructs a philosophical position that takes seriously the realities of a changing natural world the human search to ground our sense of value and the possibility of God Climate God and Uncertainty is an exciting new addition to the small but growing literature on climate change religion and philosophy

Mike Hulme University of Cambridge This innovative and exciting work explores the rich potential of transcendental naturalism as a bridge between science and religion Drawing on the work of William James Heinrich Rickert and Bruno Latour Petersen maps out a fresh approach that goes beyond current accounts of naturalism opening up a deeply satisfying account of our engagement with the natural world Alister McGrath Emeritus Andreos Idreos Professor of Science and Religion University of Oxford How to live with the pervasive reality of uncertainty and a plurality of perspectives in science religion and politics without playing down the sciences and our responsibilities The transcendental naturalism Arthur Petersen articulates in this book respects science while leaving room for other elements wonder judgements and values and the way we construct provisional models of reality These issues are especially acute in the context of climate change when we face the interplay of science and policy Petersen stresses the importance of imagination to articulate meaning and of recognising a plurality of value laden perspectives striving for responsible action and sensitivity to that which may escape planning and policy This book can be read fruitfully in at least two ways as a highly relevant reflection on religion and science in the face of climate change and as a profound philosophical analysis of pluralism and provisionality and hence of living with uncertainty Willem B Drees Professor Emeritus of Philosophy of Religion and Ethics Leiden University and of Philosophy of the Humanities Tilburg University
