Philosophy Of The Commentators 200 600 Ad Logic And Metaphysics:

The Philosophy of the Commentators, 200-600 AD: Logic and metaphysics Richard Sorabji, 2005 The third volume of this invaluable sourcebook covers three main subject areas the metaphysics of Aristotle's logical works logic and the higher metaphysics of Neoplatonism The Philosophy of the Commentators, 200-600 AD: Psychology (with ethics and religion) Richard Sorabji, 2005 This is the first work to draw on the four hundred years of transition from ancient Greek philosophy to the medieval philosophy of Islam and the West During this period philosophy was often written in the form of commentaries on the works of Plato and Aristotle Many ideas wrongly credited to the Middle Ages derive from these centuries such as that of impetus in dynamics and intentional objects in philosophy of mind The later Neoplatonist commentators fought a losing battle with Christianity but inadvertently made Aristotle acceptable to Christians by ascribing to him belief in a Creator God and human immortality The commentators provide a panorama of up to a thousand years of Greek philosophy much of which would otherwise be lost They also serve as the missing link essential for understanding the subsequent history of Western philosophy Volume 1 deals with psychology which for the Neoplatonist commentators was the gateway to metaphysics and theology It was the subject on which Plato and Aristotle disagreed most and on which the commentators went furthest beyond them in their search for synthesis Ethics and religious practice fall naturally under psychology and are included in this volume All sources appear in English translation and are carefully linked and cross referenced by editorial comment and explanation Bibliographies are provided throughout The Philosophy of the Commentators, 200-600 AD: Logic and The Philosophy of the Commentators, 200-600 AD: Logic metaphysics Richard Sorabji, 2004 No Marketing Blurb and metaphysics, 2005 The physics of the commentators was innovative the Neoplatonists thought that the world of space and time was causally ordered by a nonspatial nontemporal world and this view required original thinking Of the sixth century Neoplatonists Simplicius considered his teacher s ideas on space and time to be unprecedented and Philoponus revised Aristotelianism to produce a new physics built around the Christian belief in God's Creation of the world The thinkers of the Middle Ages borrowed from Philoponus and other commentators the proofs of a finite past the idea of degrees of latitude in change and mixture and in dynamics the idea of impetus and the defense of motion in a vacuum Back cover

The Philosophy of the Commentators, 200-600 AD Richard Sorabji,2012 This is a sourcebook that draws upon the 400 years of transition from ancient Greek philosophy to the medieval philosophy of Islam and the West Philosophy was then often written in the form of commentaries on the works of Plato and Aristotle Many ideas wrongly credited to the Middle Ages derive from this period e g that of impetus in dynamics and intentional objects in philosophy of mind The later Neoplatonist commentators fought a losing battle with Christianity but inadvertently made Aristotle acceptable to Christians by ascribing to him belief in a Creator God and human immortality They also provided a panorama of up to 1000 years of preceding Greek philosophy much of it otherwise lost They serve as the missing link essential for understanding the history

of Western philosophy Psychology was for the Neoplatonist commentators the gateway to metaphysics and theology It was the subject on which Plato and Aristotle disagreed most and the subject on which the commentators went furthest beyond them in their search for an amalgamation Ethics and religious practice fall naturally under psychology and are included in this volume All sources appear in English translation and are carefully linked and cross referenced by editorial comment and explanation Bloomsbury Publishing The Philosophy of the Commentators, 200-600 AD: Physics Richard Sorabji, 2005 Physics in Neoplatonist thought the subject which occupies the second volume of this sourcebook was innovative the world of space and time was causally ordered by a nonspatial nontemporal world and this view required The Ancient Commentators on Plato and Aristotle Miira Tuominen, 2016-09-17 In late antiquity the original thinking works of Plato and Aristotle were subject to intense study which eventually led to the development of a new literary form the philosophical commentary Until recently these commentaries were understood chiefly as sources of information for the masters Plato and Aristotle they commented upon However in recent years it has become increasingly acknowledged that the commentators themselves Aspasius Alexander Themistius Porphyry Proclus Philoponus Simplicius and others even though they worked in the Platonist Aristotelian framework contributed to this tradition in original innovative and significant ways such that their commentaries are philosophically important sources in their own right This book provides the first systematic introduction to the philosophy of the commentators their way of doing philosophy and the kind of philosophical problems they found interesting Although there was no philosophy of the commentators in the sense of a definite set of doctrines Tuominen shows how the commentary format was nevertheless a vehicle for original philosophical theorizing and argues convincingly that the commentators should take their place alongside other philosophers of antiquity in the history of western philosophy

Ammonius: Interpretation of Porphyry's Introduction to Aristotle's Five Terms Michael Chase, 2019-09-05 One of his six introductions to philosophy widely used by students in Alexandria Ammonius lecture on Porphyry was recorded in writing by his students in the commentary translated here Along with five other types of introductions three of which are translated in the Ancient Commentators on Aristotle volume Elias and David Introductions to Philosophy with Olympiodorus Introduction to Logic it made Greek philosophy more accessible to other cultures These introductions became standard in Ammonius school and included a popular set of five or more definitions of philosophy some of them drawn from commentaries on quite different works Ammonius lecture expounded the most celebrated and discussed previous introduction written by Porphyry 200 years earlier which was devoted to five main technical terms of Aristotle's logic Ammonius was sympathetic to Porphyry because they both sought to harmonise the views of Plato and Aristotle with each other arguing in different ways that the two philosophers did not disagree about the nature of universals Porphyry's introduction was a hugely influential work for centuries after its composition and this commentary by Ammonius served to maintain its position at the centre of later schools of philosophy This English translation of Ammonius work is the latest volume in the Ancient Commentators on

account that will be at the forefront of philosophical debates for years to come There has never been a book remotely like this one in its profusion of ancient references on ideas about human identity and selfhood Readers unfamiliar with the subject also need to know that Sorabji breaks new ground in giving special attention to philosophers such as Epictetus and other Stoics Plotinus and later Neoplatonists and the ancient commentators on Aristotle on the last of whom he is the world s leading authority Anthony A Long Times Literary Supplement Mathematical Commentaries in the Ancient World Karine Chemla, Glenn W. Watts, 2019-06-21 Jesus as Divine Suicide makes the argument the death of Jesus follows established and well known models of self sacrificing individuals a model readily available to Roman and Jewish audiences Paul in his letter to the church in Galatia uses this model to present a premeditated self chosen death meant to bring about a change in the cosmos Watts understanding the emotional attachment to the word is careful to construct his argument based on a plethora of examples within Paul's reach if not the reach of Jesus The concept of devotio is explored using recent scholarship and examples are drawn from Jewish and Roman sources with the intention to show that not only did Paul use it but that it may help to solve some of the questions scholars have raised as to who gave Paul his language of the death of Jesus Watts goes on to argue the gruesome act of a self caused death would have not only been allowed even by Jewish sources but also would have had theological speculation supplied by the history of the devotion so that with minimal description Paul is able to use the act as a way to make his argument for his gospel in Galatians
