Liberalism, Education and Schooling T.H. McLaughlin, 2017-03-27 A tribute collection of essays edited by author's colleagues and friends Bioethics Stephen Holland, 2016-12-27 This book provides a clear and comprehensive introduction to contemporary bioethics It also presents provocative philosophically informed arguments on current bioethical issues Holland engages with debates ranging from the more familiar such as euthanasia advance decisions to refuse treatment and new reproductive technologies to the philosophical implications of recent developments in genetics including prenatal genetic therapy genetic enhancement and human cloning The book is built around four crucial themes The first is moral status what are the implications of the moral status of human embryos or animals for our biomedical practices The second theme life death and killing looks at the ethics of ending or failing to lengthen human life Holland then explores various questions of personal identity raised in contemporary bioethical debates Finally he presents and develops a version of the argument from nature which continues to be influential in bioethics in order to make sense of the objection that some biomedical innovations are unnatural Structuring the discussions in this way creates an engaging introduction to bioethics that is an ideal textbook for students whilst offering much to stimulate colleagues in the field This second edition has been thoroughly and comprehensively updated to reflect the most recent advances in bioethics and includes an entirely new chapter on the ethical treatment of patients in the minimally conscious state **Well-Being and Fair Distribution**

Matthew Adler, 2011-12-01 *In Well Being and Fair Distribution Beyond Cost Benefit Analysis* author Matthew D Adler provides readers with a comprehensive philosophically grounded argument for the use of social welfare functions as a framework for governmental policy analysis a framework that is welfarist but not utilitarian and sensitive to the distribution of human well being *Well Being and Fair Distribution* addresses a range of relevant theoretical issues including the nature of well being and the possibility of interpersonal welfare comparisons the moral value of equality and how that bears on the form of the social welfare function social choice under uncertainty and the integration of individual responsibility into the social welfare function approach Adler also explores issues of implementation by looking at how survey data and other sources of evidence might be used to calibrate both a well being metric and a social welfare function and discussing whether distributive goals are ever best pursued through regulation rather than the tax system In working through this range of theoretical and practical issues *Well Being and Fair Distribution* draws from a wide variety of literatures including philosophical scholarship on equality prioritarianism responsibility well being and personal identity over time the social choice literature within economics applied economic literatures concerning the measurement of inequality and poverty legal and policy analytic scholarship on cost benefit analysis environmental justice and the choice between regulation and taxation and the burgeoning field of happiness studies *The Philosopher's Index: Subject index*, 1980 **Essays Anglican and**
