Philosophy And Religion For Univ Of Pitt:

Aesthetics as a Religious Factor in Eastern and Western Christianity William Peter van den Bercken, Jonathan Sutton, 2005 This volume contains selected papers of a conference in 2004 at Utrecht University on aesthetics as a religious factor in Eastern and Western Christianity They discuss the role of aesthetics in the presentation and expression of Christian faith in Catholic and Orthodox tradition During its history Christianity has produced many works of art church architecture iconography painting music and literary texts And in Orthodoxy beauty has always been the main form of religious expression more than verbal presentation of Christian teaching which is embedded in the aesthetic context of liturgy In Christian theology beauty has often been seen as a form of divine revelation related to the mystery of incarnation The relation between aesthetics and religious belief has acquired new relevance in our secularised world Today the visible products of Catholic and Orthodox aesthetics are for many people the main means through which they come into contact with Christianity and many people without affinity to religion are attracted by the beauty of Christian art inside and outside the church In modern religious studies the experience of beauty is recognised as a factor in explaining religious feelings The papers are divided in four sections 1 Comparative aspects of Orthodox and Catholic aesthetics 2 Religious aesthetics in Russian literary culture 3 Applied aesthetics in church art 4 Art theoretical ideological and religious philosophical aspects **Directory of American Scholars: Philosophy, religion and law**, 1999 A Practical Guide to Electronic Resources in the Humanities Ana Dubnjakovic, Patrick Tomlin, 2010-09-25 From full text article databases to digitized collections of primary source materials newly emerging electronic resources have radically impacted how research in the humanities is conducted and discovered This book covering high quality up to date electronic resources for the humanities is an easy to use annotated guide for the librarian student and scholar alike It covers online databases indexes archives and many other critical tools in key humanities disciplines including philosophy religion languages and literature and performing and visual arts Succinct overviews of key emerging trends in electronic resources accompany each chapter The only reference guide to electronic resources written specifically for the humanities Addresses all major humanities disciplines in one convenient guide Concise format ideal for students librarians and humanities researchers *Debating Christian Religious Epistemology* John M. Rethinking the Concept of Law of Nature Yemima Ben-Menahem, 2022-06-13 This book subjects the traditional concept of law of nature to critical examination There are two kinds of reasons that invite this reexamination one deriving from philosophical concerns over the traditional concept the other motivated by theoretical and practical changes in science One of the philosophical worries is that the idiom of law of nature especially when combined with the notion of laws governing individual events and processes is no longer as intelligible as it used to be in the theistic context in which the formulation of laws became central to science The traditional concept is also challenged in various ways by contemporary scientific theories such as quantum mechanics chaos theory and the general theory of relativity It is no longer clear that there are any universal laws laws do not always guarantee predictability and the border between physical and mathematical considerations is constantly shifting The most difficult challenge perhaps is to come up with a scientific explanation of the origin of laws Wrestling with these intriguing problems the papers in this volume broaden both our understanding of the natural order and our desiderata of scientific explanation **John Gerstner and the Renewal of Presbyterian and Reformed Evangelicalism in Modern America** Jeff McDonald, 2017-11-09 John Gerstner 1914-96 was a significant leader in the renewal of Presbyterian and Reformed evangelicalism in America during the second half of the twentieth century Gerstner's work as a church historian sought to shape evangelicalism but also northern mainline Presbyterianism In order to promote evangelical thought he wrote taught lectured debated and preached widely In pursuing his aims he promoted the work of the great colonial theologian Jonathan Edwards He also defended and endorsed biblical inerrancy and the Old Princeton theology Gerstner was a sharp critic of theological modernism and what he considered its negative influence on the church Part of Gerstner's fame was his active participation in mainline Presbyterianism and in so many of the smaller Presbyterian denominations and in the wider evangelical movement His renewal efforts within the United Presbyterian Church USA later PCUSA were largely a failure but they did contribute to the surprising resurgence of Presbyterian and Reformed evangelicalism Evangelical marginalization in the mainline led Gerstner and other evangelicals to redirect their energy into new evangelical institutions groups and denominations Gerstner's evangelical United Presbyterian Church of North America UPCNA background influenced the young scholar and the legacy of the UPCNA's heritage can be detected in the popular forms of the Presbyterian and Reformed evangelical movement that exist today Moreover he was significant for the revival of Reformed teaching beyond the bounds of Presbyterianism This book establishes Gerstner's significance in American church history and provides a thorough analysis of the evangelical movement he sought to reinvigorate

Pseudo-Objects Bruno Leclercq, Sebastien Richard, Denis Seron, 2015-04-24 The development of science logic mathematics and psychology in the 19th century made it necessary to introduce a growing number of new entities of which classical empiricism and strong extensionalism were unable to give a wholly satisfying account One of the major issues confronting the 20th century philosophers was to identify which of these entities should be rationally accepted as part of the furniture of the world and which should not and to provide a general account of how the latter are nevertheless subject to true predication The 13 original essays collected in this volume explore some of the main approaches to this issue in the 20th century including Brentano Meinong Husserl Carnap Frege Twardowski Kotarbinski Nicolai Hartmann and realist phenomenologists **Securing Religious Liberty** Jesse H. Choper, 1995-05-15

Although the Constitution of the United States states that there shall be no laws that either establish or prohibit religion the application of the Religion Clauses throughout United States history has been fraught with conflict and ambiguity In this book a leading constitutional scholar proposes a set of guidelines meant to provide for the consistent application of the First Amendment's Religion Clauses Choper's guidelines are designed to provide maximum protection for religious freedom without granting anyone an advantage inflicting a disadvantage or causing an unfair burden Though not calling for the wholesale overturning of judicial precedents or established social practices the standards he proposes would result in significant and controversial modifications to existing doctrines and customs Choper argues for instance that while vocal prayer and Bible reading in public schools should continue to be prohibited we can and should allow for silent prayer and objective courses in creation science His standards would also among other things eliminate the tax exemption on property used exclusively for religious purposes while allowing parochial schools to receive public funds for the non religious component of their education
