Philosophy of religion and the scientific turn

Aku Visala¹ & Olli-Pekka Vainio¹

ABSTRACT Traditionally, analytic philosophy of religion has focused almost solely on specifically philosophical questions about religion. These include the existence of God and divine attributes, religious language, and the justification of religious beliefs, just to mention a few. Recently, many scholars in the field have begun to engage more directly with scientific results. We suggest that this is a promising direction for philosophy of religion to take. Nevertheless, we want to warn philosophy of religion against the excessive focus on methodology that has preoccupied the “science and religion dialogue” in theology. Instead of attempting to formulate a general methodology for all possible engagements between philosophy of religion and the sciences, philosophers of religion would do well to focus on local and particular themes. Since there is no single method in philosophy and since scientific disciplines that have religious relevance vary in their methods as well, progress can be made only if philosophical tools are employed to analyse particular and clearly demarcated questions.

Philosophy And The Turn To Religion:

Philosophy and the Turn to Religion Hent de Vries, 1999-07-23 Only by confronting such uncanny and difficult figures de Vries claims can one begin to think and act upon the ethical and political imperatives of our day Richard Rorty Stanford University MLN *Between Philosophy and Theology* Dr Christophe Brabant, Prof Dr Lieven Boeve, 2013-06-28 Long past the time when philosophers from different perspectives had joined the funeral procession that declared the death of God a renewed interest has arisen in regard to the questions of God and religion in philosophy The turn to secularization has produced its own opposing force Although they declared themselves from the start as not being religious thinkers such as Derrida Vattimo Zizek and Badiou have nonetheless maintained an interest in religion This book brings some of these philosophical views together to present an overview of the philosophical scene in its dealings with religion but also to move beyond the outsider's perspective Reflecting on these philosophical interpretations from a fundamental theological perspective the authors discover in what way these interpretations can challenge an understanding of today's faith Bringing together thinkers with an established reputation Kearney Caputo Ward Desmond Hart Armour along with young scholars this book challenges a range of perspectives by putting them in a new context *Phenomenology and the Post-Secular Turn* Michael Staudigl, Jason W. Alvis, 2018-10-05 Are we living in a post secular age and can phenomenology help us better understand the discontents of secularism From Habermas claim that the secular hypothesis has failed for democratic reasons to the fact that religion far from its predicted dwindling is as strong as ever or even stronger than before some have concluded that secularism as we know it is over Others have questioned whether we have ever truly been secular if the concept applies only to European societies or whether the very notion of religiosity is merely a weapon of pacification in the hands of Western universalism The post secular notion thus lingers between sociological fact and philosophical theory and it is the latter that we need to investigate if we want to confront the challenges that any return of religion entails Although phenomenology has furnished manifold devices to rethink religious experience in a post metaphysical way its investigations often remain individualistic and beholden to unproductive dichotomies This volume assembles investigations into secularism's discontents by addressing religion's role in forming the fabric of contemporary societies and unveiling new constellations of faith and reason beyond many beloved modernist dichotomies e.g. theism atheism myth Enlightenment fundamentalism tolerance that often go under investigated This book was originally published as a special issue of the International Journal of Philosophical Studies **After God** John Panteleimon Manoussakis, 2006 Who or what comes after God In the wake of God as the last fifty years of philosophy has shown God comes back again otherwise Heidegger's last God Levinas's God of Infinity Derrida's and Caputo's tout autre Marion's God without Being Kearney's God who may be Sharing the common problematic of the otherness of the Other the essays in this volume represent considered responses to the recent work of Richard Kearney John Panteleimon Manoussakis holds a Ph.D. in philosophy from Boston College He is the author of *Theos Philosophoumenos*

in Greek Athens 2004 and co editor of Heidegger and the Greeks with Drew Hyland He has also translated Heidegger's *Aufenthalte*

The New Phenomenology J. Aaron Simmons, Bruce Ellis Benson, 2013-08-01 The *New Phenomenology* A Philosophical Introduction is the first available introduction to the group of philosophers sometimes associated with the so called theological turn in contemporary French thought This book argues that there has not been a turn to theology in recent French phenomenology but instead a decidedly philosophical reconsideration of phenomenology itself Engaging the foundational works of Emmanuel Levinas and Michel Henry as well as later works by Jacques Derrida Jean Luc Marion and Jean Louis Chretien the book explores how these thinkers offer a coherent philosophical trajectory the *New Phenomenology* Contending that New Phenomenology is of relevance to a wide range of issues in contemporary philosophy the book considers the contributions of the new phenomenologists to debates in the philosophy of religion hermeneutics ethics and politics With a final chapter looking at future directions for research on possible intersections between new phenomenology and analytic philosophy this is an essential read for anyone seeking an overview of this important strand of contemporary European thought

The Book of Job Leora Batnitzky, Ilana Pardes, 2014-12-12 The *Book of Job* has held a central role in defining the project of modernity from the age of Enlightenment until today The *Book of Job* Aesthetics Ethics and Hermeneutics offers new perspectives on the ways in which Job's response to disaster has become an aesthetic and ethical touchstone for modern reflections on catastrophic events This volume begins with an exploration of questions such as the tragic and ironic bent of the *Book of Job* Job as mourner and the Joban body in pain and ends with a consideration of Joban works by notable writers from Melville and Kafka through Joseph Roth Zach Levin and Philip Roth

God and the Other J. Aaron Simmons, 2011-04-12 In this book the author suggests how Continental philosophy of religion can intersect with political philosophy environmental philosophy and theories of knowledge

Transforming the Theological Turn Martin Koci, Jason Alvis, 2020-10-14 Continental philosophers of religion have been engaging with theological issues concepts and questions for several decades blurring the borders between the domains of philosophy and theology Yet when Emmanuel Falque proclaims that both theologians and philosophers need not be afraid of crossing the Rubicon the point of no return between these often artificially separated

disciplines he scandalised both camps Despite the scholarly reservations the theological turn in French phenomenology has decisively happened The challenge is now to interpret what this given fact of creative encounters between philosophy and theology means for these disciplines In this collection written by both theologians and philosophers the question Must we cross the Rubicon is central However rather than simply opposing or subscribing to Falque's position the individual chapters of this book interrogate and critically reflect on the relationship between theology and philosophy offering novel perspectives and redrawing the outlines of their borderlands

The Question of Theological Truth, 2012-01-01 In today's world the boundaries within which Christian theologians operate are becoming ever more permeable and Christian theology is increasingly influenced and challenged by multiple outside factors In Western Europe two such factors stand out in particular the so called turn to religion in continental philosophy and religious diversity Theologians working with contemporary continental philosophers and theologians engaging the multireligious world tend to work quite separately from one another The aim of the present book is therefore to initiate a conversation between these two groups of theologians The question of truth was chosen because it is both a key issue in contemporary philosophical debates in the continental and analytic traditions and one that arises in complex and problematic ways in the praxis of and theoretical reflection on interreligious dialogue Some of the pressing questions that are addressed by the contributors to this volume are What is truth What is theological truth How does the issue of truth arise from interreligious encounter To what extent can or should the nature of truth be discussed explicitly during interreligious dialogue Or should the question of truth be rather postponed in the interest of successful interreligious encounter Is there a hermeneutical concept of truth and if so how can it be of help for theological reflection on the question of truth and on the role and place of truth in the context of dialogue between religions

The Future of Creation Order Govert J. Buijs, Annette K. Mosher, 2019-04-16 This book investigates humanities social sciences and politics from the perspective of the concept of creation order It is the second volume in a series that provides a unique and topical overview of attempts to assess the current health of the concept of creation order within Reformational philosophy when it is compared with other perspectives Divided into a section on fundamental reflections and a section on normative practices it discusses issues such as redemption beauty nature love justice morality and ethics It concludes with discussions on a practice based theory to explain religion in international relations and a normative model for the practice of cooperation in development This series reflects the role that the branch of Christian philosophy called Reformational philosophy plays in the discussion on the status of laws of nature Ever since its inception almost a century ago the concepts of order and law principle structure have been at the heart of this philosophy One way to characterise this tradition is as a philosophy of creation order Firmly rejecting both scholastic metaphysics and Deism Reformational philosophers have maintained the notion of law as holding for reality Questions have arisen about the nature of such law is it a religious or philosophical concept does law just mean orderliness How does it

relate to laws of nature Have they always existed or do they emerge during the process of evolution *Faith and Reason* Brian Besong, Jonathan Fuqua, 2019-05-20 Too smart to believe in God The twelve philosophers in this book are too smart not to and their finely honed reasoning skills and advanced educations are on display as they explain their reasons for believing in Christianity and entering the Roman Catholic Church Among the twelve converts are well known professors and writers including Peter Kreeft Edward Feser J Budziszewski Candace Vogler and Robert Koons Each story is unique yet each one details the various perceptible ways God drew these lovers of wisdom to himself and to the Church In every case reason played a primary role It had to because being a Catholic philosopher is no easy task when the majority of one's colleagues thinks that religious faith is irrational Although the reasonableness of the Catholic faith captured the attention of these philosophers and cleared a space into which the seed of supernatural faith could be planted in each of these essays the attentive reader will find a fully human story The contributions are not merely collections of arguments they are stories of grace **What Is Religion?** Jeppe Sinding Jensen, 2019-06-19 Starting from the premise that religion is a human endeavour that can be analysed and compared across time and cultures What Is Religion brings the most up to date scholarship to bear on humankind's most enduring creation Religious belief is one of the most pervasive and ubiquitous characteristics of human society Religion has influenced human lives since prehistoric times shaping the world views of cultures from isolated tribes to vast empires The book opens with a brief history of the idea of religion then divides the study of religion into four essential topics types representations practices and institutions and concludes with a final eye opening chapter on religion today Packed with case studies from a wide range of religions past and present What Is Religion offers a very current comprehensive yet intellectually challenging overview of the history theories practices and study of religion Thoroughly updated throughout this second edition provides an accessible wide ranging engaging and concise book for undergraduate students in the study of religion It is also invaluable for students of anthropology history psychology sociology and theology as well as anyone interested in how and why humans became and continue to be religious *God after Metaphysics* John Panteleimon Manoussakis, 2007-05-23 While philosophy believes it is impossible to have an experience of God without the senses theology claims that such an experience is possible though potentially idolatrous In this engagingly creative book John Panteleimon Manoussakis ends the impasse by proposing an aesthetic allowing for a sensuous experience of God that is not subordinated to imposed categories or concepts Manoussakis draws upon the theological traditions of the Eastern Church including patristic and liturgical resources to build a theological aesthetic founded on the inverted gaze of icons the augmented language of hymns and the reciprocity of touch Manoussakis explores how a relational interpretation of being develops a fuller and more meaningful view of the phenomenology of religious experience beyond metaphysics and onto theology *The New Visibility of Religion* Graham Ward, Michael Hoelzl, 2008-10-09 Since the late 1980s sociologists have been drawing our attention to an international surge in the public visibility of religion This has increasingly challenged two

central aspects of modern western European culture first the assumption that as we became more modern we would become more secularised and religion would disappear and secondly that religion and politics should occupy radically differentiated spheres in which private conviction did not exert itself within the public realm The new visibility of religion is not simply a matter of what Keppel famously called The Revenge of God that is the resurgence of Christian Islamic and Jewish fundamentalism Religion is permeating western culture in many different forms from contemporary continental philosophy the arts and the media to the rhetoric of international politicians This collection of essays brings together a unique collection of voices from theology aesthetics social and political science philosophy and cultural theory in an exploration of four major aspects of this new visibility of religion the revision of the secularisation thesis the relationship between religion and violence the new re enchantment of reality and the return of metaphysics The exploration is conducted through essays by and interviews with figures at the forefront of reflecting upon this major cultural shift and its implications It is distinctively multidisciplinary examining the phenomenon of the rise of religion in Western Europe from a number of interrelated perspectives
