Hermeneutic Realism Dimitri Ginev, 2016-08-24 This study recapitulates basic developments in the tradition of hermeneutic and phenomenological studies of science It focuses on the ways in which scientific research is committed to the universe of interpretative phenomena It treats scientific research by addressing its characteristic hermeneutic situations and uses the following basic argument in this treatment By demonstrating that science s epistemological identity is not to be spelled out in terms of objectivism mathematical essentialism representationalism and foundationalism one undermines scientism without succumbing scientific research to procedures of normative democratic control that threaten science s

cognitive autonomy The study shows that in contrast to social constructivism hermeneutic phenomenology of scientific research makes the case that overcoming scientism does not imply restrictive policies regarding the constitution of scientific objects

Bondarenko,2023-05-30 Using historical and anthropological analysis in Post Colonial Nations in Historical and Cultural Context Dmitri M Bondarenko examines nation building in Tanzania Uganda and Zambia He examines the nation and state as concepts and how these are changing globally particularly in regard to the idea that the fundamental characteristic of a nation is a culturally homogeneous community This feature became a cornerstone of the concept of the nation at its formation in the West by the end of the eighteenth century but post colonial migration flows from the Global South to the Global North are increasing multi culturalism in the North In contrast liberated states of Asia and Africa have been multi cultural from earlier on as they inherited the colonial borders in which typically many peoples were united Throughout the book Bondarenko argues that this history of multi culturalism is an advantage to development in the Global South and that it s necessary to depart from the classical Western concept of the nation to simultaneously support citizen unity while preserving cultural diversity *The*

Moral Foundations of Social Institutions Seumas Miller, 2010 Seumas Miller provides an exciting new philosophical theory of contemporary social institutions and the ethical challenges they confront **Scientific Conceptualization and**

Ontological Difference Dimitri Ginev, 2019-07-22 Ginev works out a conception of the constitution of scientific objects in terms of hermeneutic phenomenology Recently there has been a revival of interest in hermeneutic theories of scientific inquiry The present study is furthering this interest by shifting the focus from interpretive methods and procedures to the kinds of reflexivity operating in scientific conceptualization According to the book's central thesis a reflexive conceptualization enables one to take into consideration the role which the ontic ontological difference plays in the constitution of scientific objects The book argues for this thesis by analyzing the formation of objects of inquiry in a range of scientific domains stretching from highly formalized domains where the quest for objects' identities is carried out in terms of objects' emancipation from structures to linguistic and historiographic programs that avoid procedural objectification in their modes of conceptualization The book sets up a new strategy for the dialogue between the theories of scientific inquiry and hermeneutic phenomenology *Confronting Evils* Claudia Card, 2010-07-22 In this contribution to philosophical ethics

Claudia Card revisits the theory of evil developed in her earlier book *The Atrocity Paradigm* 2002 and expands it to consider collectively perpetrated and collectively suffered atrocities Redefining evil as a secular concept and focusing on the inexcusability rather than the culpability of atrocities Card examines the tension between responding to evils and preserving humanitarian values This stimulating and often provocative book contends that understanding the evils in terrorism torture and genocide enables us to recognise similar evils in everyday life daily life under oppressive regimes and in racist environments violence against women including in the home violence and executions in prisons hate crimes and violence against animals Card analyses torture terrorism and genocide in the light of recent atrocities considering whether there can be moral justifications for terrorism and torture and providing conceptual tools to distinguish genocide from non-genocidal mass slaughter *Socializing Metaphysics* Frederick F. Schmitt, 2004-09-01 Human life is conducted within a network of social relations social groups and societies Grasping the implications of that fact starts with understanding social metaphysics Social metaphysics provides a foundation for social theory as well as for social epistemology philosophy of language philosophy of mind action theory ethics and political philosophy This volume will interest anyone concerned with mind action or the foundations of social theory *Socializing Metaphysics* supplies diverse answers from a broad array of voices to the basic questions of social metaphysics What is it for human beings to stand in social relations or form social groups Do these relations and groups bring about something above and beyond the individuals involved Is there any sense to the notion of a human being apart from social relations How can an individual achieve autonomy within a society In what sense are human kinds like race and gender socially constructed The answers are found within **A Functional Theory of**

Government, Law, and Institutions Kalu N. Kalu, 2019-07-12 This book examines the notion that while states may differ in

terms of ideology economic system and institutional architecture their role as an organizing framework for system wide political action and international relations is contingent on a series of competing and oftentimes mutually exclusive factors This work clarifies factors that contribute to our understanding of the critical roles of systemic and sub systemic elements of society and how they reinforce the reciprocal problems of human and social organizations and the institutionalization processes that help to constrain them Special Objects Maria J. García-Encinas,Fernando Martínez-Manrique,2025-03-05 This book proposes a different perspective on actual queries within the field of ontology Focusing on non standard objects it offers original answers to classic problems in metaphysics such as individuation reference existence and non existence The chosen ontological fields are for this purpose ontologies that essentially involve human social practices such as intentional objects fictions mental illnesses or social entities Even though the papers can be read independently readers will discover a number of original intersections that provide fresh points of entry to contemporary metaphysical issues By dealing with entities that are not so frequently addressed in related works the book also contributes to broaden their perspective on ontology Both scholars and students will find it particularly useful to have a survey about non standard abstract entities that can provide new topics for their research **The Epistemology of Group Disagreement** Fernando Broncano-Berrocal,J.

Adam Carter,2020-11-23 This book brings together philosophers to investigate the nature and normativity of group disagreement Debates in the epistemology of disagreement have mainly been concerned with idealized cases of peer disagreement between individuals However most real life disagreements are complex and often take place within and between groups Ascribing views beliefs and judgments to groups is a common phenomenon that is well researched in the literature on the ontology and epistemology of groups The chapters in this volume seek to connect these literatures and to explore both intra and inter group disagreements They apply their discussions to a range of political religious social and scientific issues The Epistemology of Group Disagreement is an important resource for students and scholars working on social and applied epistemology disagreement and topics at the intersection of epistemology ethics and politics

Punishment and Retribution Leo Zaibert,2016-04-15 Discussions of punishment typically assume that punishment is criminal punishment carried out by the State Punishment is however a richer phenomenon and it occurs in many contexts This book contains a general account of punishment which overcomes the difficulties of competing accounts Recognizing punishment s manifoldness is valuable not merely in contributing to conceptual clarity but in that this recognition sheds light on the complicated problem of punishment s justification Insofar as they narrowly presuppose that punishment is criminal punishment most apparent solutions to the tension between consequentialism and retributivism are rather unenlightening if we attempt to apply them in other contexts Moreover this presupposition has given rise to an unwieldy variety of accounts of retributivism which are less helpful in contexts other than criminal punishment Treating punishment comprehensibly helps us to better understand how it differs from similar phenomena and to carry on the discussion of its justification fruitfully

Religious Liberty Daniel N. Robinson, Richard N. Williams, 2016-09-08 These essays focus on the intellectual and philosophical roots of religious liberty and the confrontations with the authority of secular law The book is aimed at researchers graduate students and undergraduates in constitutional law political science government constitutional religion and public affairs courses as well as courses on the First Amendment

What People Believe When They Say That People Believe Todd Jones, 2010-10-26 In modern life we often hear people say things like Catholics don't believe in using birth control There are many reasons that we want to know what groups of people such as Catholics are thinking and doing But it's hard to understand which social situations are being described by such statements It's also difficult to understand what speakers believe when they make such statements even when the speakers are social scientists In this work cognitive scientist and philosopher Todd Jones looks at the different things that social scientists and ordinary speakers mean when they make statements ascribing beliefs or actions to groups rather than individuals Such statements are often denigrated as mere stereotypes or generalizations Yet they are also used by people to strategize about what actions to take and even for social scientific explanations In this work Jones takes a detailed look at the different things these kinds of statements about groups can mean and the various social structures they correspond to He also looks at how such statements can and can't be used to successfully explain the behavior of individuals or groups While many people broadly dismiss such statements about groups Jones gives a careful discussion of the problems and possibilities such statements have
