

Aesthetics: Philosophy of Art

- *Plato*: art imitates reality. By focusing on mere appearances, art distracts us from the truth and appeals to socially destructive emotions. It provides no real knowledge and undermines personal and social well-being
- *Aristotle*: art does not imitate particular things; rather it identifies universal ideals and values. It also *purges* us of our erotic and aggressive passions (*catharsis*)

Introduction to Philosophy and the Arts takes readers on an engaging and accessible journey that explores a series of fundamental questions about the nature of art and aesthetic value. The book's 12 chapters explore three questions: What makes something a work of art? How should we experience art to get the most out of it? Once we understand art, how should we evaluate whether it is good or bad? Philosophical theory is illustrated with concrete examples: the paintings of Frida Kahlo, the music of Johann Sebastian Bach, the masks of the Nso people, and many others. Classic questions are balanced with cutting edge challenges such as Linda Nochlin's work on the exclusion of women from the artistic canon. The Art Experience presupposes no prior knowledge of philosophy or art and it will be of interest to any reader seeking an accessible and engaging introduction to this field. Along the way, readers learn how philosophical theories can affect our real world experiences with painting, music, theater, and many other art forms.

Key Features: Accessible for any college student; assumes no knowledge of philosophy, art theory, or any artistic medium; Organizes topics conceptually rather than historically, allowing students to more easily grasp the core issues themselves rather than tracing their historical evolution; Offers readers a large number of contemporary examples and a consistent focus on the way theory can affect people's real world experiences with art; Explores questions about bias, for example, whether the artistic canon has excluded some groups unfairly and whether definitions of art are Western biased.

Thinking Art Antoon van den Braembussche, 2009-09-29 In the twentieth century, avant garde movements have pushed the concept of art far beyond its traditional boundaries. In this dynamical process of constant renewal, the prestige of thinking about art as a legitimizing practice has come to the fore. So it is hardly surprising that the past decades have been characterized by a revival or even breakthrough of philosophy of art as a discipline. However, the majority of books on aesthetics fail to combine a systematical philosophical discourse with a real exploration of art practice. Thinking Art attempts to deal with this traditional shortcoming. It is indeed not only an easily accessible and systematic account of the classical, modern, and postmodern theories of art, but also concludes each chapter with an artist's studio in which the practical relevance of the discussed theory is amply demonstrated by concrete examples. Moreover, each chapter ends with a section on further reading in which all relevant literature is discussed in detail. Thinking Art provides its readers with a theoretical framework that can be used to think about art from a variety of perspectives. More particularly, it shows how a fruitful cross fertilization between theory and practice can be created. This book can be used as a handbook within departments of philosophy, history of art, media and cultural studies, cultural history, and of course within art academies. Though the book explores theories of art from Plato to Derrida, it does not presuppose any acquaintance with philosophy from its readers. It can thus be read also by artists, art critics, museum directors, and anyone interested in the meaning of art.

The Philosophy of the Visual Arts Philip Alperson, Professor of Philosophy, Philip A. Alperson, 1992 Most instructors who teach introductory courses in aesthetics or the philosophy of arts use the visual arts as their implicit reference for art in general, yet until now there has been no aesthetics anthology specifically orientated to the visual arts. This text stresses

conceptual and theoretical issues first examining the very notion of the visual arts and then investigating philosophical questions raised by various forms from painting the paradigmatic form to sculpture photography film dance kitsch and other forms on the borders of the visual arts The selections represent both classical and contemporary views and include sections by artists art historians and critics as well as philosophers A singularly important text for courses in the philosophy of arts or aesthetics this anthology is designed to enrich the philosophical and critical examination of our beliefs about the visual arts

Philosophy by Other Means Robert B. Pippin, 2021-05-11 Throughout his career Robert B Pippin has examined the relationship between philosophy and the arts With his writings on film literature and visual modernism he has shown that there are aesthetic objects that cannot be properly understood unless we acknowledge and reflect on the philosophical concerns that are integral to their meaning His latest book Philosophy by Other Means extends this trajectory offering a collection of essays that present profound considerations of philosophical issues in aesthetics alongside close readings of novels by Henry James Marcel Proust and J M Coetzee The arts hold a range of values and ambitions offering beauty playfulness and craftsmanship while deepening our mythologies and enriching the human experience Some works take on philosophical ambitions contributing to philosophy in ways that transcend the discipline s traditional analytic and discursive forms Pippin s claim is twofold criticism properly understood often requires a form of philosophical reflection and philosophy is impoverished if it is not informed by critical attention to aesthetic objects In the first part of the book he examines how philosophers like Kant Hegel and Adorno have considered the relationship between art and philosophy The second part of the book offers an exploration of how individual artworks might be considered forms of philosophical reflection Pippin demonstrates the importance of practicing philosophical criticism and shows how the arts can provide key insights that are out of reach for philosophy at least as traditionally understood

The Principles of Art R.G. Collingwood, 2016-09-21 I do not think of aesthetic theory as an attempt to investigate and expound eternal verities concerning the nature of an eternal object called Art but as an attempt to reach by thinking the solution of certain problems arising out of the situation in which artists find themselves here and now Everything written in this book has been written in the belief that it has a practical bearing direct or indirect upon the condition of art in England in 1937 and in the hope that artists primarily and secondarily persons whose interest in art is lively and sympathetic will find it of some use to them Hardly any space is devoted to criticizing other people s aesthetic doctrines not because I have not studied them nor because I have dismissed them as not worth considering but because I have something of my own to say and think the best service I can do to a reader is to say it as clearly as I can Of the three parts into which it is divided Book I is chiefly concerned to say things which any one tolerably acquainted with artistic work knows already the purpose of this being to clear up our minds as to the distinction between art proper which is what aesthetic is about and certain other things which are different from it but are often called by the same name Many false aesthetic theories are fairly accurate accounts of these other things and much bad artistic practice comes from confusing

them with art proper These errors in theory and practice should disappear when the distinctions in question are properly apprehended In this way a preliminary account of art is reached but a second difficulty is now encountered This preliminary account according to the schools of philosophy now most fashionable in our own country cannot be true for it traverses certain doctrines taught in those schools and therefore according to them is not so much false as nonsensical Book II is therefore devoted to a philosophical exposition of the terms used in this preliminary account of art and an attempt to show that the conceptions they express are justified in spite of the current prejudice against them are indeed logically implied even in the philosophies that repudiate them The preliminary account of art has by now been converted into a philosophy of art But a third question remains Is this so called philosophy of art a mere intellectual exercise or has it practical consequences bearing on the way in which we ought to approach the practice of art whether as artists or as audience and hence because a philosophy of art is a theory as to the place of art in life as a whole the practice of life As I have already indicated the alternative I accept is the second one In Book III therefore I have tried to point out some of these practical consequences by suggesting what kinds of obligation the acceptance of this aesthetic theory would impose upon artists and audiences and in what kinds of way they could be met This book is organized as follows I Introduction Book I Art and Not Art II Art and Craft III Art and Representation IV Art as Magic V Art as Amusement VI Art Proper 1 As Expression VII Art Proper 2 As Imagination Book II The Theory of Imagination VIII Thinking and Feeling IX Sensation and Imagination X Imagination and Consciousness XI Language Book III The Theory of Art XII Art as Language XIII Art and Truth XIV The Artist and the Community XV Conclusion
