A Mind and its Time Joshua L. Cherniss, 2013-03-28 A

Mind and its Time offers the most detailed account to date of the genesis and development of Isaiah Berlin's political thought, philosophical views and historical understanding. Drawing on both little known published material and archival sources, it locates Berlin's evolving intellectual interests and political positions in the context of the events and trends of interwar and post-war intellectual and political life. Special emphasis is placed on the roots of Berlin's later pluralism in philosophical and cultural debates of the interwar period, his concern with the relationship between ethics and political conduct, and his evolving account of liberty. Berlin's distinctive liberalism is shown to have been shaped by his response to the cultural politics of interwar period and the political and ethical dilemmas of the early Cold War era, and to what Berlin saw as a dangerous embrace of an elitist technocratic, scientific and managerial intellectual and political stance by liberals themselves. At the same time, Berlin's attitude toward what he called positive liberty emerges as far more complicated and ambivalent than is often realized. Joshua L. Cherniss reveals the multiplicity of Berlin's influences and interlocutors, the shifts in his thinking, and the striking consistency of his concerns and commitments. In shedding new light on Berlin's thought and offering a better understanding of his place in the development of liberal thought in the twentieth century, he makes fresh contributions both to understanding the intellectual history of the twentieth century and to discussions of liberty and liberalism in political theory.

The Power of Love and Democracy in the Philosophies of Martin Luther King, Jr. and Cornel West Timothy L. Lake, 2025-09-18 This book locates an ethic of love as central to the democratic philosophies of Martin Luther King Jr. and Cornel West. While much has been written about King's moral vision, social activism, and theology, there has been no book-length treatment of the implications of his thinking for democratic theory. Additionally, Cornel West is the leading African American public intellectual of our time, but the range of his cultural criticism and academic scholarship obscures his intellectual and social projects. This project synthesizes West's vast corpus and places him within the modern African American intellectual tradition he shares with Du Bois, King, Maulana Karenga, the creator of Kwanzaa, and others. Deeply grounded in the African American intellectual and philosophical traditions in which King and West are rooted, as well as the Western mainstream political philosophical traditions in which they were educated, this book offers a penetrating interpretation and comparative analysis of their thought on the ideals of democracy and of their critiques of American democracy. It also reflects on the nature and values of democracy, exploring how love is inseparable from justice in a democratic society.

The Power of Language in the Making of International Law Stephane Beaulac, 2004-04-01 The purpose of this book is to enter into the history of the mental social phenomena that are the word sovereignty and the myth of Westphalia. Given the circularity of language, the project proposes to examine the reality-creating role of language as an organic instrument of social power within humanity. In semiotic terms, the complex structures of words and also myths form part of sign systems in which they can both represent and create reality. These are the passive and active functions of

language which explain that words and myths not only represent and describe reality but may also play a leading part in creating and transforming reality thus demonstrating and being used to carry fabulous power within humanity The Peace of Westphalia is analysed to show that in spite of what actually took place in 1648 Westphalia has had an incredible social effect in international law standing for the proposition that it signalled the beginning of a new era based on state sovereignty However it is argued that Westphalia constitutes a myth an aetiological myth which has provided a way for society to explain itself to itself that is a way for international society to explain its genesis to itself As regards sovereignty it is shown that Jean Bodin introduced the word in Six Livres for the purpose of having the French ruler enjoy supreme power in the hierarchical organisation structure of society This is the original creative and transforming social effect on the shared consciousness of humanity for which the linguistic sign must be credited which has continued unaltered to this day With respect to Droit des Gens it is demonstrated that Emer de Vattel utilised and actually changed the reality associated with sovereignty also for a specific reason namely to carry out its externalisation the ruling entity was now to enjoy exclusive power to govern which entailed being the sole representative of the people both internally and externally and also meant that it could not be submitted to any foreign state or to any higher law externally Vattel's use of the word has had an extraordinary effect on the shared consciousness of society including that of the emerging international society which is still very much present today These two archetype cases in which sovereignty developed show how this word has really had two paradigms over the years that is it has represented and created the two distinct realities of the internal and the international

The Power of Emotion in Politics, Philosophy, and Ideology Hanna Samir Kassab, 2017-02-14 This book defines political ideology as a structural force that combines ideas emotion and people for the purpose of transforming political discourse It advances a theoretical proposition concerning the creation of alternative modes of governance and proposes a general theory explains the reasons for the creation of political ideologies as an escape from perceived injustice The theory also explains democracy's success and the failure of Communism and the Fascism The purpose of any political ideology whether Democracy Fascism and its varieties or Communism is to escape human suffering by combining ideas emotion and people in the production of fundamental societal change Ideologies must possess these three variables to attain the necessary power to succeed as a political force Power gives the ideology the structural ability to transform society trapping the once free individual into the ideology
