The Eagle and the Phoenix - Coventry Stories for Young People Sheila Woolf, 2020-10-19 Coventry's coat of arms shows an eagle and a phoenix on either side of the famous elephant and castle why The eagle was the emblem of Lady Godiva's husband Leofric Earl of Mercia The earl and his countess are forever remembered in Coventry's distant past The phoenix a mythical bird which is born again from fire has become the symbol of the new Coventry rising from the ashes after so much of the city was destroyed by war In *The Eagle and the Phoenix* you can witness some of the dramatic moments in the history of Coventry through nine stories told by children who saw them Marcus the young Roman training horses at the Lunt Fort Thomas and Anne plotting with the imprisoned Mary Queen of Scots Daniel and William viewing a terrible hanging at Gibbet Hill Tilly the weaver and Amit the Sky Blues fan Take a journey into Coventry's past and imagine yourself there **A History of the Church through its Buildings** Allan Doig, 2020-12-10 The History of the Church through its Buildings takes the reader to meet people who lived through momentous religious changes in the very spaces where the story of the Church took shape Buildings are about people the people who conceived designed financed and used them Their stories become embedded in the very fabric itself and as the fabric is changed through time in response to changing use relationships and beliefs the architecture becomes the standing history of passing waves of humanity This process takes on special significance in churches where the arrangement of the space places members of the community in relationship with one another for the performance of the church's rites and ceremonies Moreover architectural forms and building materials can be used to establish relationships with other buildings in other places and other times Coordinated systems of signs symbols and images proclaim beliefs and doctrine and in a wider sense carry extended narratives of the people and their faith Looking at the history of the church through its buildings allows us to establish a tangible connection to the lives of the people involved in some of the key moments and movements that shaped that history and perhaps even a degree of intimacy with them Standing in the same place where the worshippers of the past preached and taught or in a space they built as a memorial touching the stone they placed or marking their final resting place holding a keepsake they treasured or seeing a relic they venerated probably comes as close to a shared experience with these people as it is possible to come Perhaps for a fleeting

moment at such times their faces may come more clearly into focus The Living Church ,1963 **Building the Modern Church** Robert Proctor,2016-05-23 Fifty years after the Second Vatican Council architectural historian Robert Proctor examines the transformations in British Roman Catholic church architecture that took place in the two decades surrounding this crucial event Inspired by new thinking in theology and changing practices of worship and by a growing acceptance of modern art and architecture architects designed radical new forms of church building in a campaign of new buildings for new urban contexts A focussed study of mid twentieth century church architecture Building the Modern Church considers how architects and clergy constructed the image and reality of the Church as an institution through its buildings The author examines changing conceptions of tradition and modernity and the development of a modern church architecture that drew from the ideas of the liturgical movement The role of Catholic clergy as patrons of modern architecture and art and the changing attitudes of the Church and its architects to modernity are examined explaining how different strands of post war architecture were adopted in the field of ecclesiastical buildings The church building s social role in defining communities through rituals and symbols is also considered together with the relationships between churches and modernist urban planning in new towns and suburbs Case studies analysed in detail include significant buildings and architects that have remained little known until now Based on meticulous historical research in primary sources theoretically informed fully referenced and thoroughly illustrated this book will be of interest to anyone concerned with the church architecture art and theology of this period Our Distance from God James D.
