The Publishers' Trade List Annual ,1982 Unraveling Dyslexia Kristin L. Sayeski,2023-12-06 Despite being the most common learning disability dyslexia is widely misunderstood Shrouded by myths and misperceptions a lack of direct practical information on dyslexia leaves many teachers and families frustrated Well intentioned teachers tell parents that all kids learn differently and at a different pace but as the months turn

into years the gap between skilled readers and those who struggle widens The antidote to wait and see and more of the same is information In this book Sayeski translates research from neuroscience cognitive psychology linguistics and education into accessible information to help teachers and parents unravel the complexities of skilled reading Unraveling dyslexia requires an understanding of what it means to read both the accurate recognition of words and the capacity to bring meaning to those words and identifying where and how difficulty can occur with these processes To do this Sayeski situates the challenges some students experience in learning to read within the context of the development of English orthography i e written language and the history of reading instruction in the schools Sayeski then presents what reading science has revealed about individual differences in reading Within the book s final chapters readers will find practical information on how to provide the type of structured literacy instruction required to put students with dyslexia on the path to reading This book is designed for teachers administrators and parents seeking information that can be immediately applied to improve the outcomes of students with dyslexia or who struggle learning to read It is never too soon to address signs of difficulty with reading The aim of this book is to provide readers with the knowledge they need to act now to provide students with the gift of literacy

Intentional From the Start Carolyn Helmers,Susan Vincent,2023-10-10 Intentional from the Start Guiding Emergent Readers in Small Groups Carolyn Helmers and Susan Vincent take a concentrated look at the often underestimated reading and writing work that occurs during the emergent reading stages of literacy development PreA D and the seemingly simplistic books we use to teach them in small group guided reading Though both may appear unsophisticated these earliest readers and the texts we use to meet their needs are each unique and full of nuances that generally go overlooked The

authors explore how emergent readers learn best and position text levels appropriately in the service of students They also turn their attention to a comprehensive exploration of the particular needs of emergent readers and how the work they do at text levels PreA D lays a critical foundation necessary for them to continue growing successfully into text levels E and beyond As they examine the needs of learners working at each emergent text level individually the authors Detail specific demands books in that text level make on young readers and the best ways to coach students as they work through them Highlight instructional procedures for reading writing and word study that can be implemented immediately at your small group table Suggest optimal schedules techniques and formats for efficient instruction at that level Unpack the book characteristics specific to that level and demonstrate ways to capitalize on them to intentionally support emergent readers and writers With plenty of useful classroom examples as well as additional online resources with literacy center ideas that correlate directly with the work students are doing at particular levels this book is a resource your emergent reading teacher heart will reach for again and again
