Architecture and Its Photography Julius Shulman,Peter Gössel,1998 American photographer Julius Shulman s images of Californian architecture have burned themselves into the retina of the 20th century A book on modern architecture without Shulman is inconceivable Some of his architectural photographs like the iconic shots of Frank Lloyd Wright s or Pierre Koenig s remarkable structures have been published countless times The brilliance of buildings like those by Charles Eames as well as those of his close Friend Richard Neutra was first brought to light by Shulman s photography The clarity of his work demanded that architectural photography had to be considered as an independent art form Each Schulman image unites perception and understanding for the buildings and their place in the landscape The precise compositions reveal not just the architectural ideas behind a building s surface but also the visions and hopes of an entire age A sense of humanity is always present in his work even when the human figure is absent from the actual photographs Today a great many of the buildings documented by Shulman have disappeared or been crudely converted but the thirst for his pioneering images is stronger than ever before This is a vivid journey across six decades of great architecture and classic photography through the famously incomparable eyes of Julius Shulman <u>A Constructed View</u> Joseph Rosa,Esther McCoy,1994 Julius Shulman one of the great masters of modern architectural photography is the preeminent recorder of early California modernism By 1927 when he was sixteen Shulman was already using the family Brownie box camera to document his Southern California surroundings and experiences in 1936 his professional career was launched when he sent Richard Neutra some uncommissioned photographs of the architect s Kun House Shulman went on to document the famous Case Study House Program architects included Charles and Ray Eames Pierre Koenig and Eero Saarinen and also the architecture of the 1930s through the 1980s especially that of Southern California but also country and worldwide His subjects included the buildings of R M Schindler John Lautner Raphael Soriano Frank Lloyd Wright Mies van der Rohe and Oscar Niemeyer among many others Through his work Shulman defined the image of Los Angeles and framed the architecture of the time for a global audience In addition to an overview of Shulman s career and photographic oeuvre this book emphasizes Shulman s method of constructing photographic views These constructions which complemented his innate ability to compose striking photographs often transcend reality to capture the spirit time and place of a work of architecture An analysis of architecture s visual presentation examines not only the media of the era John Entenza s Arts Architecture for instance but also the work of Shulman s photographic contemporaries *Architecture in Nineteenth-Century Photographs* Micheline Nilsen,2017-07-05 Revealing that nineteenth century photography goes beyond the functional to reflect the aesthetic intellectual and cultural concerns of the time this study proposes that each photographic image of architecture be studied both as a primary visual document and an object of aesthetic inquiry This multi faceted approach drives Architecture in

Nineteenth Century Photographs Essays on Reading a Collection Despite three decades of post colonial post structuralist and gender conscious criticism the study of architectural photography continues to privilege technical virtuosity This volume offers a thematic exploration of the material and a socio historical examination that allows consideration of questions that have not been addressed comprehensively before in a single publication Themes include exoticism and armchair tourism the absence of women from architectural photography the role of photographs as commodities vernacular architecture and the picturesque and historic preservation urban renewal and nationalism Micheline Nilsen analyzes photographs from France and England the two countries where photography was invented and from around the world representing a corpus of over 10 000 photographs from the Janos Scholz Collection of Nineteenth Century Photographs of the Snite Museum of Art at the University of Notre Dame   **Photography and Architecture** Eric Samuel De Maré,1961   **Follow the Sun** James Ewing (Photographer),2016 12 2 How Much Is Too Much Choosing a Look 12 3 Lightroom Local Adjustments Gradients and Brushes 12 4 Compositing with Masked Adjustment Layers 12 5 Lens Corrections 12 6 Spotting and Sharpening 13 Presenting the Work 13 1 Editing a Portfolio 13 2 Portfolio Website 13 3 Print Portfolio PART 5 WORK IN ACTION 14 Voices from the Field 14 1 Peter Aaron 14 2 Magda Biernat 14 3 Ty Cole 14 4 Elizabeth Felicella Index   **Camera Constructs** Mr Andrew Higgott,Mr Timothy Wray,2014-09-28 Camera Constructs reflects critically on the varied interactions of the different practices by which photographers artists architects theorists and historians engage with the relationship of the camera to architecture the city and the evolution of Modernism Including twenty three essays by a wide range of historians and theorists this book provides a rich and highly original analysis of the relationship of photography to built form from the early modern period to the present day   **Framing Architecture** Nithi Sthapitanond,2010-11-20   *Photographing Architecture* John Siskin,2012 Essential for professional commercial photographers but with appeal for anyone who enjoys architectural photography this book explains how to build better light indoors while finding the optimal positions for capturing images Beginning with advice on understanding angles controlling perspective and becoming familiar with the tools necessary for capturing interiors this guidebook then progresses onto explanations of various types of light methods for manipulating them and circumstances under which different lights should be utilized Also included throughout the book are example shots of homes businesses and public spaces followed from start to finish illustrating the challenges of the shoot how these problems were solved and any work that required editing after the shoot   **Ezra Stoller** Pierluigi Serraino,2019-11-01 A captivating history of 20th century Modern American architecture as seen through the eyes of a legendary photographer It is impossible to overstate the importance of photography s role in shaping the world s perception of architecture And towering above the ever growing crowd of image makers is Ezra Stoller an architectural photographer of immeasurable consequence in documenting the history of modern architecture both known and unknown in the United States and beyond This book is one of the first to present the breadth of Stoller s largely unseen archive of images brought to life

through exquisite color and duotone black and white reproductions   *ARCHITECTURE TRANSFORMED.* Cervin Robinson,Joel Herschman,1987   Steven Brooke - Architectural Photography and Composition Steven Brooke,2020-04-22 A complete guide to the history practice and techniques of depicting architecture interiors and landscape and the applications for digital photography With over 300 illustrations and workflows this book is the most complete guide to architectural photography ever produced The author Steven Brooke is an internationally recognized leader in the field of architectural photography He is the photographer of over 40 books on architecture on the faculty of the University of Miami School of Architecture and winner of the Rome Prize from the American Academy in Rome and the National American Institute of Architects Honor Award in Photography   **Nineteenth-Century Photographs and Architecture** Micheline Nilsen,2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic
