Photography In America:

Photography in America William Welling, 1978 Reprint of the respected Crowell edition of 1978 **Pictorial Photography in America**, 1919 **Photography in Nineteenth-century America** Alan Trachtenberg, Amon Carter Museum of Western Art, 1991 Analyse Contributions de Barbara MacAndless Keith F Davis Peter Bacon Hales Sarah Greenhough **Pictorial Photography in America** Pictorial Photographers of America, 2022-10-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Pictorial Photography in America 1920-1922** Pictorial Photographers of America, 2008-01-01 To many people photography is merely a mechanical process To an increasing number however photography is being seen as an art by which personal impressions of nature or human life may be expressed as truly as by the brush These workers in photography see in it a medium by which the action of light upon sensitive surfaces may be so controlled as really to interpret scenes and persons in the individualistic spirit of a true art From every part of our country come evidences of the growing appreciation of photography as a pictorial medium Exhibitions in many museums which have hitherto been indifferent to pictures made with the lens have opened the eyes of the public to the possibilities of the camera Clubs of photographic workers in various cities have maintained or fostered the movement The lure of the moving picture has stimulated the interest of countless multitudes in photography and the occasional presentation of fine pictorial work in this direction has given a prophecy of better things to come The time therefore seems ripe to present in this book a collection of the work of American pictorial photographers in all sections of the country Many of these workers are members of the organization known as the Pictorial Photographers of America but the appeal for photographic material for this book has been confined to no one society or club but has been widely inclusive of associations and individuals and it is believed that the work here presented is fairly representative of the best American effort along these lines at the present time It is the hope and intention of the organization that publishes this book to stimulate interest in this branch of pictorial art This is believed to be the first attempt in America to give a comprehensive presentation of the status of pictorial photography as illustrated by the product of many of its best workers As such it is commended to the consideration of photographers both professional and amateur of artists and art lovers and of the public generally Documenting America, 1935-1943 Carl Fleischhauer, Beverly W. Brannan, 1989-01-18 Between 1935 and 1943 a group of photographers under the direction of Roy Emerson Stryker set out to photograph the United States for the Farm Security Administration and the Office of War

Information Photographs taken by this celebrated group whose ranks included Dorothea Lange Ben Shahn Gordon Parks Russell Lee and Walker Evans have since become icons of the 1930s and 1940s In recent years however their work has been reproduced with little discussion of the particular circumstances surrounding its creation Documenting America takes a fresh look at these remarkable photographs The book opens with two incisive essays by Lawrence Levine and Alan Trachtenberg that examine issues central to photography and American culture While Levine explains how the pictures portray the complexity of life in the period balancing scenes of Depression hard times with images of the pleasures of life Trachtenberg analyzes the way in which viewers read photographs and the role of the government picture file that stands between the creation of the photographs and their use Both essayists raise important questions about Stryker s grand ambition of a photographic record of America about the ways of seeing that have grown up around the most famous of these photographs and about the whole enterprise of documentary photography and the conventions of realism The images themselves are presented in series selected from groups of pictures created by single photographers A documentary photographer often makes dozens of exposures to portray different elements of the subject experiment with camera angles and cover the stages of an event or steps of a process By studying these pictures in series we come closer to the photographer working in the field We see a tenant farming community in Gee s Bend Georgia the activities of the Salvation Army in San Francisco and the hubbub and commotion that filled Chicago s Union Railway Station in 1943 Texts accompanying each of the book s fifteen series describe the circumstances that gave rise to the creation of the pictures and discuss the relation between government policy and the subjects of the photographs The nearly three hundred images included vividly portray America in the last bitter years of the Great Depression and the first years of the Second World War
