Roberts,2013-09-13 Photography of art has served as a basis for the reconstruction of works of art and as a vehicle for the dissemination and reinterpretation of art This book provides the first definitive treatment of the subject with essays from noted authorities in the fields of art

Peres,2013-05-29 This volume is a complete revision of the 1996 third edition shares the ever changing breadth of photographic topics with a special emphasis on digital imaging and contemporary issues Produced by an international team of photographic and imaging experts with collaboration from the George Eastman House the world s oldest photography museum this fourth edition contains essays and photographic reproductions sharing information where photography and imaging serve a primary role ranging from the atomic to the cosmic *Photography* Bert Krages,2012-02-21 Since the beginning of the twentieth century photographic composition has been taught mostly by applying the principles from the field of graphic design But the factor that distinguishes the work of master photographers is their ability to see and describe scenes visually This book follows contemporary educational methods used to teach fine arts such as drawing and painting concentrating on teaching the perception of critical visual elements and understanding how they will be rendered photographically In many respects this book can do for photography what Betty Edwards best selling *Drawing on the Right Side of the Brain* did for drawing Many people believe that seeing is a mysterious gift the so called artist s eye says Krages The core of the book is a group of sixty exercise that readers perform to learn how to perceive points lines and shapes in static and dynamic settings These

exercises are structured enough to push photographers to develop their cognitive abilities while at the same time flexible enough to allow for individual creative expression They also show the importance of knowing about the subject and provide some history about the specific genres at the heart of each exercise

Framed Spaces Monica E. McTighe, 2012 While earlier theorists held up experience as the defining character of installation art few people have had the opportunity to walk through celebrated installation pieces from the past Instead installation art of the past is known through archival photographs that limit define and frame the experience of the viewer Monica E McTighe argues that the rise of photographic based theories of perception and experience coupled with the inherent closeness of installation art to the field of photography had a profound impact on the very nature of installation art leading to a flood of photography and film based installations With its close readings of specific works Framed Spaces will appeal to art historians and theorists across a broad spectrum of the visual arts

The Impressionists and Photography Paloma Alarcó, 2019 How photography served as both source and foil for the birth of impressionism From the first announcement in 1839 of the daguerreotype process at a joint meeting of the French Academy of Sciences and the Acad mie des Beaux Arts photography found itself suspended uneasily between science and the arts a new technology that offered previously unimaginable possibilities for pictorial representation While photography's capacity for naturalistic reproduction threatened one traditional function of painting the camera's artificial eye could offer new models for looking at the world In the work of pioneering photographers such as Gustave Le Gray Eug ne Cuvelier Nadar Atget and Andr Adolphe Eug ne Disd ri impressionist artists such as Manet Corot Monet Pissarro and Degas found new ways of seeing The key position that photography now occupies in contemporary art has encouraged a renewed interest in photography's historical relationship to the other visual arts The Impressionists and Photography pursues this line of research Luxuriously produced and lavishly illustrated this volume reexamines the lively debate that photography's emergence generated among critics and artists and offers a critical reflection on the affinities and mutual influences between photography and painting in France in the second half of the 19th century
