Marine and Industrial Biofouling Hans-Curt Flemming, P. Sriyutha Murthy, R. Venkatesan, Keith E. Cooksey, 2008-12-11 Biofouling is a costly problem and it is encountered in a wide spectrum of technical systems ranging from the shipping industry power industry water purification automobile industry paint and pharmaceuticals to the microelectronics and food industries Micro and macroorganisms attach to surfaces and accumulate there forming biofilms that cause interferences a fundamentally natural process Usually a medical paradigm is applied kill biofilms and the problem is solved This leads to excessive biocide use However the success of this strategy is very limited furthermore it leads to equipment damage and environmental pollution Simply trying to kill the fouling organisms is clearly not seen as a successful strategy while cleaning is put forward as much more important In this book strategies to prevent adhesion to mitigate the extent and effects of biofouling and to detect and remove fouling layers are presented Holistic approaches to the fouling process are elaborated taking into account options such as nutrient limitation repellent and easy to clean surfaces for fouling layer limitation and replacing biocides with more environmentally friendly methods in other words learning how to live with fouling biofilms without suffering the damage they can do
