Quicksilver Heritage Paul Screeton,1977-01-01 **The Rebirth of Witchcraft** Doreen Valiente,2018-01-31 This classic work is now available for the first time in paperback Since 1951 when the last of the Witchcraft Acts was repealed many books have been written about the reappearance of witchcraft and the development of a pagan theology Churchmen have denounced it Sociologists have wondered at it Journalists have penned sensational stories about it But until the publication of this book no one had told the real story of it from the inside as frankly as it is told here Doreen Valiente one of witchcraft s most widely known figures was a close friend of the late Gerald Gardner generally regarded as the founder of present day witchcraft Initiated by him and for a time High Priestess of his coven Doreen Valiente helped him rewrite his seminal Book of Shadows She records the break with Gardner that split his coven the controversy surrounding Alex Sanders King of the Witches and memories of many other witches whom she has known including the lady called Dafo Robert Cochrane Leslie Roberts and Sybil Leek Doreen Valiente took part in many witchcraft rituals and had strange psychic experiences as a result Described here are the clairvoyant communications she received purporting to come from John Brakespeare an eighteenth century witch The Rebirth of Witchcraft traces the lineage of the present day witchcraft from its forerunners through to modern feminist neo paganism and the new wave of interest in ecology and holistic medicine

Exploring Archaeoastronomy Liz Henty,2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology s approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy s marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy s often troubled relationship with archaeology and its appropriation by

Andrew Collins,2009-03 What is the mystery of the crop circles Are they manmade or supernatural Today the majestic crop formations grace the very same pastures of southern England that in the past were the haunts of fairies hobgoblins and mysterious lights Here too are some of Britain s most spectacular prehistoric landscapes Stonehenge Avebury and Silbury Hill all act as ominous backdrops to the crop circle phenomenon Did our ancestors know something about this beguiling enchanting landscape that we are only now waking up to for the first time Is there a higher intelligence responsible for such creations and if so who are they and what are they trying to tell us Bizarrely the answer might lie not here on earth but 37 000 light years away in the constellation of Cygnus the Northern Cross where lurks a star perhaps responsible not only for the foundation of the world s earliest stone monuments but for the emergence of humanity itself *Catalog of Copyright Entries.
