The Thirtymile Fire John N. Maclean, 2013-11-12 A riveting account of the deadly Thirtymile fire and the controversy and recriminations that raged in its aftermath from our premier chronicler of wildfires and those who fight them The Thirtymile fire in the remote North Cascade range near the Canadian border in Washington began as a simple mop up operation In a few hours a series of catastrophic errors led to the entrapment and deaths of four members of the fire crew two teen age girls and two young men Each had brought order and meaning to their lives by joining the fire world Then the very flames they pursued turned on them extinguishing their lives When the victims were blamed for their own deaths the charge brought a storm of controversy that undermined the firefighting community Continuing a tradition established in his previous books and by his father Norman s *Young Men and Fire* John N Maclean serves as an unflinching guide to the rogue fire s unexpected violence which is almost matched by the passions released by the official verdict of the blaze Weaving together the astonishing stories told by the witnesses the victims family members and the official reports Maclean produces a dramatic narrative of a catastrophe that has changed the way fire is fought More than anything it is a story of humanity at risk when wildfire ancient and unpredictable breaks loose **Minor Miracles Second Edition** Ian Uhlmann, 2014-03-30 Ian Uhlmann was born in Bulimba Queensland at the beginning of the Great Depression He went on to serve in the Australian Military in Malaya and Vietnam This book offers insight into sometimes hidden aspects of Australian military history and the conduct of the wars in Malaya and Vietnam Gutsy Leah Katz, 2022-05-03 Western society too often trains women out of

feeling innately confident in who we are and in the wisdom we hold inside Instead we are handed down a set of expectations about our bodies our disposition our religious identification our sexual orientation our mothering and our career choices Dr Leah Katz draws on her training as a psychologist and her experience leaving an ultra Orthodox Jewish faith and culture to offer tools and insights for getting unstuck from society's unrealistic and often harmful expectations for women that we have adopted as our own By learning to identify what is holding us back and adopting a mindset of joy gratitude and resilience we can fulfill our dreams and really fulfill ourselves It's time to get gutsy and create the rich vibrant life we have always wanted

Here and There Stephen J. Pyne, 2018-10-23 Fire is special Even among the ancient elements fire is different because it alone is a reaction It synthesizes its surroundings it takes its character from its context It varies by place by culture and by time It has no single expression There is no single way to understand it In this collection of essays historian and renowned fire expert Stephen J. Pyne offers his reflections on national and global wildland fire management Pyne distills the long saga of fire on Earth and its role in underwriting an Anthropocene that might equally be called a Pyrocene Presented through a mixture of journalism history and literary imagination Here and There moves the discussion of fire beyond the usual formations of science and policy within a national narrative to one of thoughtful interpretation analysis and commentary Centered on the unique complexities of fire management in a global world Here and There offers a punctuation point to our understanding of wildfire Included in this volume How fire policy has changed within the United States How policy in the United States differs from that in other countries The history of one of the most famous fire paintings of all time Suggested next steps for the future of fire research Bradstreet's Weekly, 1910 **Taming Uncertainty** Ralph Hertwig, Timothy J. Pleskac, Thorsten Pachur, 2019-08-13 An examination of the cognitive tools that the mind uses to grapple with uncertainty in the real world How do humans navigate uncertainty continuously making near effortless decisions and predictions even under conditions of imperfect knowledge high complexity and extreme time pressure Taming Uncertainty argues that the human mind has developed tools to grapple with uncertainty Unlike much previous scholarship in psychology and economics this approach is rooted in what is known about what real minds can do Rather than reducing the human response to uncertainty to an act of juggling probabilities the authors propose that the human cognitive system has specific tools for dealing with different forms of uncertainty They identify three types of tools simple heuristics tools for information search and tools for harnessing the wisdom of others This set of strategies for making predictions inferences and decisions constitute the mind's adaptive toolbox The authors show how these three dimensions of human decision making are integrated and they argue that the toolbox its cognitive foundation and the environment are in constant flux and subject to developmental change They demonstrate that each cognitive tool can be analyzed through the concept of ecological
