Química elemental básica 1 Brian Cane, James Sellwood, 2025-06-19 Este libro va dirigido a estudiantes de un Curso general de Ciencias de edades comprendidas entre los 11-15 años de escuelas integradas o secundarias. Estos textos suministran muchas indicaciones para un desarrollo de la enseñanza de materias generales como pueden ser los cristales, la acidez, la atmósfera, el agua, etc. La característica de estos textos es su agrupamiento en Unidades didácticas. Cada Unidad tiene su contenido propio a fin de que sirva de ayuda al profesor en su labor cotidiana. **Curso de química elemental e industrial** M. Payen, 1842 *Lecciones de química elemental ... explicadas los domingos en la Escuela Municipal de Ruan, 1* Jean Girardin, 1854 **Tratado de química elemental y nociones de análisis cualitativo mineral** José Casares Gil, 1917

Termodinámica química fundamental Jürg Waser, 1972 La presente exposición de la Termodinámica química procede de notas de clase de primer curso en el California Institute of Technology. Con la excelente preparación que actualmente reciben los estudiantes, este texto se puede utilizar con alumnos seleccionados del primero y segundo curso. **Communicating Chemistry** Anders Lundgren, Bernadette Bensaude-Vincent, 2000. Historians and philosophers of science offer 18 papers from a European Science Foundation workshop held in Uppsala, Sweden, in February 1996, explore such questions as how textbooks differ from other forms of chemical literature, under what conditions they become established as a genre, whether they develop a specific rhetoric, how their audiences help shape the profile of chemistry translations, and other topics. Only names are indexed. *Nuevos elementos de química* Francisco Álvarez, 1838 **Tratado elemental de química general y aplicada** Jesualdo Martínez Vivas, José Fernández-Ladreda, 1912 *Elementos de química* Apollinaire Bouchardat, 1845

Tratado elemental de química moderna Conrado Granell, 1915 Elementos de química orgánica Diego Antonio Torres, 1871 Principios de química Richard E. Dickerson, 1992-11 Esta tercera edición de Principios de Química se ha proyectado para ser utilizada en un curso universitario de Química general que debe servir tanto como una visión de la Química para los especialistas como de una buena base para los estudios posteriores de las disciplinas de Química. Por consiguiente, hay varios capítulos que pretenden introducir las diferentes áreas de la Química, incluida la inorgánica, nuclear, orgánica y Bioquímica, y se intenta a lo largo de todo el libro colocar a la Química en su marco histórico y cultural. Al mismo tiempo, se presentan los aspectos cuantitativos de la Química de forma consecuente con su importancia de manera que resulte fácil apoyarse en ellos en los cursos posteriores. **Curso elemental de física experimental y aplicada y nociones de química inorgánica para uso de los establecimientos de 2ª enseñanza, seminarios y escuelas especiales** Bartolomé Feliú y Pérez, 1878 *Introducción a la Fisicoquímica: Termodinámica* Thomas Engel, Philip J. Reid, 2007 Fundamentos de Química Ralph A. Burns, 2003 Universities and Science in the Early Modern Period

Mordechai Feingold, Victor Navarro-Brotons, 2006-10-03 This book includes most of the contributions presented at a conference on Universities and Science in the Early Modern Period held in 1999 in Valencia Spain The conference was part of the Five Centuries of the Life of the University of Valencia Cinc Segles celebrations and from the outset we had the generous support of the Patronato Foundation overseeing the events In recent decades as a result of a renewed attention to the institutional political social and cultural context of scientific activity we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science In essence the following conclusions have been reached 1 the attitudes regarding scientific progress or novelty differed from country to country and follow different trajectories in the course of the early modern period 2 institutions of higher learning were the main centers of education for most scientists 3 although the universities were sometimes slow to assimilate new scientific knowledge when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity 4 the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters botanical gardens and expensive instruments 5 the universities provided professional employment and a means of support to many scientists and 6 although the relations among the universities and the academies or scientific societies were sometimes antagonistic the two types of institutions often worked together in harmony performing complementary rather than competing functions moreover individuals moved from one institution to another as did knowledge methods and scientific practices
