Biennale Venezia Biennale di Venezia.. Mostra Internazionale di Architettura,1991 Architettura di rara bellezza.  
Documenti del Festival dell'architettura 2006 Enrico Prandi,2006 Possiamo ancora ricercare una valenza estetica dell'architettura Soprattutto quando la componente di una comunicazione stereotipata dell'architettura sembra prevalere e in un certo senso annichilire ogni autenticità di espressione figurativa In una scena mondana sempre più priva di luogo andiamo paradossalmente a rilevare una continua invocazione al bello senza alcuna consapevolezza ulteriore salvo quella a sua volta contraddittoria di riconoscerne solo il limite relativistico soggettivo Il Festival vuole allora misurarsi con questo esteso rilevante quanto superficiale bisogno di bellezza cercando per di reinterpretarne il senso e quindi di conseguenza il ruolo per una possibile architettura Ne deriva una prima riflessione l'espressione della bellezza può concretizzarsi esclusivamente all'interno di una costruzione di identità Ne deriva una riconoscibilità del carattere che trasmette verità non tanto quella ideale di una bellezza assoluta ma quella espressione di un rapporto critico interpretativo con il mondo in divenire Si tratta di un'accezione conoscitiva dell'idea di bellezza che tende a diventare cosmopolita proprio nella ricerca del paesaggio vasto delle differenze più o meno radicate dove la rarità rappresenta la consuetudine dell'autenticità Testi di Matteo Agnoletto Lamberto Amistadi Valter Balducci Paolo Barbaro Luca Boccacci Francesco Bortolini Laura Brignoli Riccarda Cantarelli Domenico Chizzoniti Dario Costi Aldo De Poli Giovanni Luca Ferreri Maria Angela Gelati Gianluca Gelmini Vittorio Gregotti Giovanni Iacometti Giovanni Leoni Elisabetta Modena Matteo Molinari Luca Monica Valentina Orioli Sergio Pace Claudio Pavesi Laura Anna Pezzetti Matteo Porrino Enrico Prandi Carlo Quintelli Enrica Restori Alessandra Ronzoni Alberto Sdegno Oliviero Toscani studio Annalisa Trentin Chiara Visentin Francesca Zanella **L'architettura in Toscana dal 1945 a oggi**, 2001 Unprecedented Realism K. Resisting Postmodern Architecture Stylianos Giamarellos,2022-01-10 Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation Today its main principles such as acknowledging the climate history materials culture and topography of a specific place are integrated in architects education across the globe But at the same time the richer cross cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local Retrieving both the globalising branches and the overlooked cross cultural roots of critical regionalism Resisting Postmodern Architecture resituates critical regionalism within the wider framework of debates around postmodern architecture the diverse contexts from which it emerged and the cultural media complex that conditioned its reception In so doing it explores the intersection of three areas of growing historical and theoretical interest postmodernism critical regionalism and globalisation Based on more than 50 interviews and previously unpublished archival material from six countries the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice Stylianos Giamarellos challenges long held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory history and historiography Giovani Architetti Italiani Mario Campi,Pippo Ciorra,1998 An informative overview for all who desire a well founded orientation within the current Italian architectural scene The most interesting talented young Italian architectural offices are featured in this collection with new and previously unpublished buildings and projects **Forest Policies in the Sierras** California. **Constructing Urban Space with Sounds and Music** Ricciarda Belgiojoso, 2016-05-23 While we are used to looking around us we are less used to listening to what happens around us And yet the noises we produce reveal our way of life and learning to master them is a necessity This book aims at drawing the reader's attention to the sound of the urban environment The topic is by its very nature complex as it involves sounds and noises urban space and social activities Using an interdisciplinary approach it examines a heterogeneous selection of experimentations from the domains of music art and architecture Significant case studies of pieces of music public art works and scientific research in the field of urban planning are analyzed investigating the methods that have been adopted and the aural processes that have been generated It then uses the findings to reconstruct the underlying theories and practices and to show what might be drawn from these procedures applied to urban planning The overall objective is to learn to build and enrich space with sound arguing that there is a need to reconsider architecture and urban planning beyond building and to look to the world of the arts and other disciplines In doing so the book guides the reader toward a sensorial architecture and more generally toward consciously creating environmental architecture which is sustainable and connects with art and which diffuses a culture of sound

**Enhancing the City.** Giovanni Maciocco, Silvia Serreli, 2009-09-30 Departing from a survey on the post modern landscapes of tourism this book explores the transformations the city has undergone and the way it has become a simulacrum offered to tourists spectacularised with the aim of increasing its capacity for attraction The experiences dealt with in the papers of authors belonging to different disciplinary fields emphasise the city's tendencies to create stage set contexts of the private type be it historic quarters theme parks or hypermarkets Issues like aestheticisation thematisation and genericity are dealt with conceptual categories that highlight the weak resistance cities put up against the rules of the leisure industry and more generally speaking the consumer economy The book inquires into the capacity of the urban and territorial project to construct a perspective for a public dimension of space This is linked with ethical action of the project involving an active relationship with places and a capacity to understand the dynamics of different urban populations In this sense capacity for innovation and creativity can contribute to transforming islands of leisure into places of the city and consumers into citizens

**Venezia** Alison Bing, Robert Landon, 2012      **Japan in Analysis** I. Parker, 2008-06-17 This book is about the development of psychoanalysis and modern subjectivity in Japan and addresses three key questions Why is there psychoanalysis in Japan What do we learn about Japan from its own forms of analysis and What do we learn about ourselves from Japan      *Moderne architetture romane* Marco Stefano Orsini, 2016-01-03 T00:00:00+01:00 Collana Archinauti diretta da Claudio D Amato Archinauti series edited by Claudio D Amato Questo percorso di ricerca intorno al linguaggio architettonico nel secondo ventennio del ventesimo secolo in Italia prende le mosse dalla figura dimenticata di Giovanni Battista Milani per diversi motivi Innanzitutto per la convinzione che una figura come quella di Milani possa servire a gettare una luce sulla difficile fase di passaggio alla modernità a Roma dalla oscura stagione precedente solo da poco oggetto di studio

Sono proprio queste fasi di passaggio le più fervide di indicazioni metodologiche proprio per la natura complessa delle relazioni tra progetto costruzione e pensiero formale. In secondo luogo perché Milano fa parte della fazione che risulta perdente nella congerie del dibattito architettonico che porta i cosiddetti accademici all'ostracismo professionale. L'accademismo di Milano offre la possibilità di legare il pensiero ottocentesco alle figure emergenti leggendo i caratteri di continuità e di innovazione della ricerca romana. Come legare l'innovazione delle forme conseguente l'adozione di nuovi materiali con le esigenze della continuità ambientale con le forme della tradizione classica nella costruzione della città. Quale era la via italiana alla modernità quale il linguaggio rispondente alle istanze di coerenza strutturale e di convenienza ambientale nel senso più ampio del termine dalle problematiche legate al clima a quelle legate al contesto urbano. Questi temi saranno affrontati a partire da edifici o complessi architettonici esemplari andando ad indagare gli etimi del linguaggio nel rapporto tra forma struttura e costruzione per poi allargarsi a scuole progettisti dibattiti intorno ai temi dello stile. Stile su cui questo studio intende fornire in ultima analisi un contributo per una architettura moderna mediterranea che sappia legare tradizione e costruzione storia e natura.

Marco Stefano Orsini, Castellana Grotte 1976, laureato a Bari nel 2006 con una tesi sulla stereotomia del legno in Spagna. Ha conseguito nel 2009 il titolo di Dottore di ricerca in Progettazione Architettonica. Nel 2011 vince una borsa di studio di post dottorato con uno studio intorno ai caratteri tipologici formali e costruttivotecnologici delle grandi coperture voltate in calcestruzzo armato o a struttura metallica dell'altra modernità romana. Nel 2014 vince una borsa di studio su Strategie di recupero innovazione e valorizzazione di alcuni moderni complessi edilizi del Mediterraneo presso il Politecnico di Bari dove dal 2009 collabora ai corsi di progettazione architettonica al III anno della Facoltà di Architettura.

### **Post-Western Histories of Architecture**

Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23. This book seeks to provide an alternative post-Western perspective to the history of contemporary architecture. It puts forward detailed critical analyses of various areas of the world including Europe.

Latin America Africa China Australia India and Japan where particular movements of architecture have developed as active political acts The authors focus on a broad spectrum of countries architectures and architects that have developed a design approach closely linked to the building context The concept of context is broad and includes various economic social cultural political and natural aspects In all cases the architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book s main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies
