Brand, Assisted by José Corona Núñez.... José Corona Núñez, Donald D. Brand, 1951 Quiroga Donald D. Brand (assisted by José Corona Núñez), 1951 *The Mexican government today* William P. Tucker, The Relación de Michoacán (1539-1541) and the Politics of Representation in Colonial Mexico Angélica Jimena Afanador-Pujol, 2015-07-01 Through close readings of the painted images in a major sixteenth century illustrated manuscript this book demonstrates the critical role that images played in ethnic identity formation and politics in colonial Mexico The Relación de Michoacán 1539-1541 is one of the earliest surviving illustrated manuscripts from colonial Mexico Commissioned by the Spanish viceroy Antonio de Mendoza the Relación was produced by a Franciscan friar together with indigenous noble informants and anonymous native artists who created its forty four illustrations To this day the Relación remains the primary source for studying the pre-Columbian practices and history of the people known as Tarascans or Purhépecha However much remains to be said about how the Relación's colonial setting shaped its final form By looking at the Relación in its colonial context this study reveals how it presented the indigenous collaborators a unique opportunity to shape European perceptions of them while settling conflicting agendas outshining competing ethnic groups and carving a place for themselves in the new colonial society Through archival research and careful visual analysis Angélica Afanador Pujol provides a new and fascinating account that situates the manuscript's images within the colonial conflicts that engulfed the indigenous collaborators These conflicts ranged from disputes over political posts among indigenous factions to labor and land disputes against Spanish newcomers Afanador Pujol explores how these tensions are physically expressed in the manuscript's production and in its many contradictions between text and images as well as in numerous emendations to the images By studying representations of justice landscape conquest narratives and genealogy within the Relación Afanador Pujol clearly demonstrates the visual construction of identity its malleability and its political possibilities **Persistent Oligarchs** Mark Wasserman, 1993 Did the Mexican Revolution do away with the ruling class of the old regime Did a new ruling class rise to take the old one's place and if so what differences resulted In this compelling study the first of its kind Mark Wasserman pursues these questions through an analysis of the history and politics of the northern Mexican state of Chihuahua from 1910 to 1940 Chihuahua boasted one of the strongest pre-revolutionary elite networks the Terrazas-Creel family Wasserman describes this group's efforts to maintain its power after the Revolution including its use of economic resources and intermarriage to forge partnerships with the new revolutionary elite Together the old and new elites confronted a national government that sought to reestablish

centralized control over the states and the masses Wasserman shows how the revolutionary government and the popular classes joined in opposition to the challenge of the elites finally formalized into a national political party during the 1930s Persistent Oligarchs concludes with an account of the Revolution's ultimate outcome largely accomplished by 1940 the national government gaining central control over politics the popular classes obtaining land redistribution and higher wages and regional elites old and new availing themselves of the great opportunities presented by economic development A complex analysis of revolution as a vehicle for both continuity and change this work is essential to an understanding of Mexico and Latin America as well as revolutionary politics and history

The Eighth Day Richard Newbold Adams, 2014-02-04 Can human social evolution be described in terms common to other sciences most specifically as an energy process The Eighth Day reflects a conviction that the human trajectory for all its uniqueness and indeterminism will never be satisfactorily understood until it is framed in dynamics that are common to all of nature The problem in doing this however lies in ourselves The major social theories have failed to treat human social evolution as a component of broader natural processes The Eighth Day argues that the energy process provides a basis for explaining comparing and measuring complex social evolution Using traditional ecological energy flow studies as background society is conceived as a self organization of energy This perspective enables Adams to analyze society in term of the natural selection of self organizing energy forms and the trigger processes basic to it Domestication civilization socioeconomic development and the regulation of contemporary industrial nation states serve to illustrate the approach A principal aim is to explore the limitation that energy process imposes on human social evolution as well as to clarify the alternatives that it allows Richly informed by contemporary anthropological historicism sociobiology and Marxism The Eighth Day avoids simple reductionism and denies facile ideological categorization Adams builds on work in nonequilibrium thermodynamics and theoretical biology and brings three decades of his own work to an analysis of human society that demands an extreme materialism in which human thought and action find a central place

Ritter,2019-09-06 Based on recent archaeological surveys and excavations the chapters in this volume provide current comprehensive area by area summaries of the region s Precolumbian past Research in the last two decades has indicated that the evolution and adaptations of the indigenous cultures of the region parallel those found elsewhere in Mesoamerica from the simple Formative groups to the complex states of the North The topics discussed in the book areal and cultural syntheses and specific problems such as chronology social organization and economic systems present much new information crucial to the understanding of cultural variations in Mesoamerica **Publication** Smithsonian Institution. Institute of Social Anthropology,1952 **Quiroga, a Mexican Municipio** Donald Dilworth Brand,José Corona Núñez,1951 **The Indian Christ, the Indian King** Victoria Reifler Bricker,2014-03-07 Victoria Bricker shows that history sometimes rests on mythological foundations and that myth can contain valid historical information Her book which is a highly original critique of postconquest historiography about the Maya challenges major assumptions about the relationship between myth and history implicit in structuralist interpretations The focus of the book is ethnic conflict a theme that pervades Maya folklore and is also well documented historically The book begins with the Spanish conquest of the Maya In chapters on the postconquest history of the Maya five ethnic conflicts are treated in depth the Cancuc revolt of 1712 the Quisteil uprising of 1761 the Totonicapan rebellion of 1820 the Caste War of Yucatan 1847 1901 and the Chamulan uprising in 1869 Analytical chapters consider the relationship between historical events and modern folklore about ethnic conflict Bricker demonstrates that myths and rituals emphasize structure at the expense of temporal and geographical provenience treating events separated by centuries or thousands of miles as equivalent and interchangeable An unexpected result of Bricker s research is the finding that many seemingly aboriginal elements in Maya folklore are actually of postconquest origin and she shows that it is possible to determine precisely when and more important why they become part of myth and ritual Furthermore she finds that the patterning of the accretion of events in folklore over time provides clues to the function or meaning of myth and ritual for the Maya Bricker has made use of many unpublished documents in Spanish English and Maya as well as standard synthetic historical works The appendices contain extensive samples of the oral traditions that are explained by her analysis **Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library. Research Libraries,1979 **Handbook of Middle American Indians, Volumes 7 and 8** Robert Wauchope,2015-01-16 Ethnology comprises the seventh and eighth volumes in the Handbook of Middle American Indians published in cooperation with the Middle American Research Institute of Tulane University under the general editorship of Robert Wauchope 1909 1979 The editor of the Ethnology volumes is Evon Z Vogt 1918 2004 Professor of Anthropology in the Department of Social Relations Harvard University These two books contain forty three articles all written by authorities in their field on the ethnology of the Maya region the southern Mexican highlands and adjacent regions the central Mexican highlands western Mexico and northwest Mexico Among the topics described for each group of Indians are the history of

ethnological investigations cultural and linguistic distributions major postcontact events population subsistence systems and food patterns settlement patterns technology economy social organization religion and world view aesthetic and recreational patterns life cycle and personality development and annual cycle of life The volumes are illustrated with photographs and drawings of contemporary and early historical scenes of native Indian life in Mexico and Central America The Handbook of Middle American Indians was assembled and edited at the Middle American Research Institute of Tulane University with the assistance of grants from the National Science Foundation and under the sponsorship of the National Research Council Committee on Latin American Anthropology
