Quonset Huts On The River Styx The Bomb Shelter Design:

Quonset Huts on the River Styx, 1987 This collection of beautiful humorous ridiculously serious blueprints and drawings is the outcome of a national competition for a radiation proof emergency operation center a nuclear bomb shelter for government officials The book follows the exhibit Give Them Shelter It s Not for Everyone and is made up of 80 photos of art work submitted by architects across the country Because the competition did not require compliance with state and local building codes the result is the free flowing imaginative process of architects at their best and least restricted The thought provoking images on the paradox of nuclear blast and survival offer at once subtlety and wry humor **Bulletin of the Atomic Scientists**, 1989-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Fallout Shelter** David Monteyne, 2013-11-30 In 1961 reacting to U S government plans to survey design and build fallout shelters the president of the American Institute of Architects Philip Will told the organization s members that all practicing architects should prepare themselves to render this vital service to the nation and to their clients In an era of nuclear weapons he argued architectural expertise could preserve us from decimation In *Fallout Shelter* David Monteyne traces the partnership that developed between architects and civil defense authorities during the 1950s and 1960s Officials in the federal government tasked with protecting American citizens and communities in the event of a nuclear attack relied on architects and urban planners to demonstrate the importance and efficacy of both purpose built and ad hoc fallout shelters For architects who participated in this federal effort their involvement in the national security apparatus granted them expert status in the Cold War Neither the civil defense bureaucracy nor the architectural profession was monolithic however and Monteyne shows that architecture for civil defense was a contested and often inconsistent project reflecting specific assumptions about race gender class and power Despite official rhetoric civil defense planning in the United States was ultimately a failure due to a lack of federal funding contradictions and ambiguities in fallout shelter design and growing resistance to its political and cultural implications Yet the partnership between architecture and civil defense Monteyne argues helped guide professional design practice and influenced the perception and use of urban and suburban spaces One result was a much maligned bunker architecture which was not so much a particular style as a philosophy of building and urbanism that shifted focus from nuclear annihilation to urban unrest **Underground Rivers** Richard J. Heggen, 2021-01-01 Underground rivers in science history the arts and any number of sightings elsewhere
