**The Quran: A New Interpretation** M. B. Behbudi, Dr Colin Turner, 2013-09-13 This new rendering of the Holy Quran into the English language is the first of its kind since it is a combination of translation and exegesis in which the author opens out the verses of the Holy Book to reveal some of the layers of meaning expounded by the Prophet and transmitted through the ages by the Prophet's companions family and the scholars who followed them The fruit of over thirty years of research into the principles of Quranic exegesis and hadith analysis this work matches a depth of Arabic and Islamic learning with a mastery of English that is lucid and accessible while preserving the integrity of the original text

Translation strategies are the procedures employed by the translator to attempt a solution to the multifarious baffling problems with which translation is indubitably replete Malone 1988 p 78 defines translation The steps selected from a consciously known range of potential procedures taken to solve a translation problem which has been consciously detected and resulting in a consciously applied solution While some strategies are helpful others turn out to be of little avail It follows then that the translator has to sort out the wheat from the chaff in pursuit of a good translation Here the translator may utilize particular strategies in accordance with the method anticipated in the course of translation i e target orientedness or source orientedness Faced with differences in the extralinguistic reality of the two cultures or its lexical mapping the translator tries to reconcile them by relying on the following procedures borrowing definition literal translation substitution lexical creation omission and addition Three comments that need to be made by the researcher in connection with this list First not all of the procedures achieve cultural transfer in the sense of filling the gap but they all serve the purpose of achieving communicative equivalence in translation For instance substitution and omission certainly do not help to make members of the target culture aware of anything that their culture does not already possess and lexical creation is no more enlightening than the use of the source language expression unless accompanied by some other procedure that will make the particular extra linguistic feature part of their experiences Second combinations of procedures rather than single procedures are required for optimum transmission of cultural information e g borrowing and definition borrowing and substitution lexical creation and definition Third in planning his/her translation strategy the translator does not make a one time decision on how he/she will treat unmatched elements of culture rather even if the translator has established an overall order of preferences he/she usually makes a new decision for each element and for its use in an act of communication rather even if he has established an overall order of preferences he usually makes a new decision for each such element and for each use in an act of communication Cohen 1990 p 78      Quran Arabic English - Clear, Pure, Precise Talal Itani,2024-03-05 Discover the Quran Like Never Before A New Horizon in Islamic Scripture Dive deep into the sacred text of the Quran with our revolutionary translation launched in October 2023 This unique rendition a collaborative masterpiece between human scholarship and advanced artificial intelligence offers vivid clarity contemporary relevance and true fidelity

Elimam,2013-10-28 The literature on Balaghah the art of Arabic eloquence and commentaries on the Qur n stress that the style of the Qur n is beautiful eloquent and inimitable This literature identifies word order as one of the most distinctive aspects of Qur nic style One of the main reasons for this is that compared to English Arabic has fewer restrictions on word order thanks to its elaborate verb inflection system and case marking This flexibility allows for the foregrounding of some elements within the sentence resulting in a marked or non canonical word order and fulfilling certain discursive functions including specification restriction emphasis amplification glorification and denial Marked word order is used to highlight or downplay certain elements in speech or writing It constitutes one way of delivering meanings to the addressee as these meanings are ordered in the mind of the speaker in terms of their importance making the style a precise reflection of the speaker s mind and feelings This book is a descriptive study which attempts to examine how translations of the Qur n have handled yahs verses of the Qur n that feature lexical foregrounding focusing on ten published translations into English carried out by translators from different ideological and linguistic backgrounds It offers a systematic comparison of the ways in which the selected translators deal with the linguistic feature of word order variation and examines issues relating to the translator s style Specifically the book identifies and examines the following instances of marked word order discussed by commentators on the Qur n and the function served by each case of lexical foregrounding secondly the options and or patterns employed by translators to render the different functions of marked word order thirdly the recurrent options and or patterns for rendering different types of word order variation Finally the book explores the factors which may have influenced the choice of particular strategies by different translators including the translators motivations and the various historical contexts in which the translations were made
