Zakir Naik, 2007 Ever since the dawn of human life on this planet Man has always sought to understand Nature his own place in the scheme of Creation and the purpose of Life itself In this quest for Truth spanning many centuries and diverse civilizations organized religion has shaped human life and determined to a large extent the course of history While some religions have been based on books claimed by their adherents to be divinely inspired others have relied solely on human experience Al Qur aan the main source of the Islamic faith is a book believed by Muslims to be of completely Divine origin Muslims also believe that it contains guidance for all mankind Since the message of the Qur aan is believed to be for all times it should be relevant to every age Does the Qur aan pass this test In this booklet I intend to give an objective analysis Forthcoming Books Rose Arny, 1992 *Sexuality Education from an Islamic Perspective* G. Hussein Rassool, Muhammad Aftab Khan, Shaikh Abdul Mabud, Muhammad Ahsan, 2020-02-13 We live in an over sexualised culture where sex and sexuality have become part of the public domain This sexual revolution challenges

Judeo Christian and Islamic norms and boundaries As such sexuality education is a sensitive and extremely important issue and its current implementation in schools has raised public concerns This book explores the subject contextualising it within the matrix of Islamic beliefs and practices Islam binds sexuality and sexual education to a moral grid with rights and obligations justice and equity There is a dominant discourse and stereotype around Islamic sexuality which presents sex and sexuality as the biggest taboo fraught with fear and seldom discussed This book dispels such myths and misconceptions providing an overview of sexuality education in the modern world and the need for such education

Countering Violent Extremism and Terrorism Stéfanie vonHlatky,2020-02-20 Since 9 11 counterterrorism has become a national and international priority Research on violent extremism and terrorism from homegrown threats to foreign fighters has adapted accordingly but has not always translated into policymaking Extremism can be traced to no single cause and yet governments and law enforcement agencies continue to spend millions on prevention efforts Contributors to this book identify persistent challenges for counterterrorism and countering violent extremism and provide analysis from a variety of academic and professional perspectives Countering Violent Extremism and Terrorism cautions against adopting a causal model to understand violent extremism and takes a critical look at how states have managed to cope with the global phenomenon of terrorism By drawing on the expertise of researchers and practitioners from government law enforcement and the military contributors identify past failures and offer guidance on how to correct these mistakes With the collective goal of developing more effective strategies the authors dispel common myths discard counterproductive tactics and point to countries in which policies have functioned as intended As some terrorist organizations influence wanes others innovate and thrive further challenging a state apparatus that is slow to adapt to these mutating threats An essential and timely book Countering Violent Extremism and Terrorism seeks to change how governments and policymakers consider and respond to security threats

Subject Guide to Books in Print ,1997 *The Concept* ,2003 *Scientific and Political Freedom in Islam* Uriya Shavit,2017-02-24 The modernist apologetic approach to the relation between revelation and science and politics has been a central part of Arab discourses on the future of Muslim societies for over a century This approach introduced historical and theological narratives and interpretative mechanisms that contextualize reason and freedom in Islamic terms to argue that unlike with Christianity it is possible for Muslim societies to be technologically and politically advanced without forfeiting revelation as an all encompassing legally binding guide *Scientific and Political Freedom in Islam* critically examines the coherence and consistency of modernist apologetic scholars This is done through a discussion of their general theorizing on reason and freedom which is then followed by discussions of their commentaries on specific scientific and political issues in light of their general theorizing Regarding the former the focus is Darwin s theory of evolution while the universality of the Biblical flood the heliocentric model the Big Bang model and Freudianism are also discussed Regarding the latter the focus is Islam s desired structure of government and concept of participatory politics while individual freedoms are also discussed

The book argues that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory. Introducing a significant body of new information on the reasons for the failure of secularism and democracy and the attitudes towards Darwinism in the Arab world, this book is a valuable resource for students and scholars of Islamic Studies, comparative religion, democracy studies, and evolution studies. **Encyclopaedia of Quranic Studies: Education under Quran**, 2006

Islam in the West Mohamed Abattouy, 2007

Abe W. Ata, Jan A. Ali, 2018-08-28

The bombings in New York and Washington in 2001 and subsequent terrorist attacks in different countries of the West have led to fast changing socio cultural and political contexts where Islam has been depicted as a global threat. The meaning of being a Muslim has undergone rapid transformation with the interplay of perceptions and misperceptions impacted by for instance the Iranian Revolution of 1978, the Lockerbie bombing in 1988, the Gulf War of 1990, and the clash of civilizations thesis propagated by Samuel Huntington in 1993. This book examines the way Muslims and mainstream societies in the West perceive each other by taking into account themes like cultural pluralism, media, religious education, interfaith dialogue, and so on. It argues that Muslims are not defined solely by their faith but as an emerging group which is self critical, reflective, and focused on clearing the misconceptions associated with their identity. Further, it posits that Westerners who are more knowledgeable about Muslims usually express positive opinions about Islam, thereby arguing that the knowledge about and attitudes towards Islam are interrelated. **Encyclopaedia of Quranic Studies: Law under Quran**, 2006
