Bad Girls Amanda H. Littauer,2015-07-17 In this innovative and revealing study of midcentury American sex and culture Amanda Littauer traces the origins of the sexual revolution of the 1960s She argues that sexual liberation was much more than a reaction to 1950s repression because it largely involved the mainstreaming of a counterculture already on the rise among girls and young women decades earlier From World War II era victory girls to teen lesbians in the 1940s and 1950s these nonconforming women and girls navigated and resisted intense social and interpersonal pressures to fit existing mores using the upheavals of the era to pursue new sexual freedoms Building on a new generation of research on postwar society Littauer tells the history of diverse young women who stood at the center of major cultural change and helped transform a society bound by conservative sexual morality into one more open to individualism plurality and pleasure in modern sexual life

The Arabs and the Stars Paul Kunitzsch,2017-05-15 The influence of Arabic Islamic science on European astronomy is still evident in the number of terms and star names which derive from the Arabic These articles examine what the Arabs and other peoples of the Islamic world knew about the fixed stars and the constellations and the astrological traditions they associated with them Professor Kunitzsch shows how the early folk astronomy of the Arabs was radically altered without being swept away by the discovery of ancient Greek also Indian and Persian sources by far the most important of these was the Almagest of Ptolemy This knowledge was then transmitted to medieval Europe to Byzantium and especially to Spain as the articles go on to describe and was a vital factor in stimulating the development of scientific thought in the West

The Black Stars Who Made Baseball Whole Rick Swaine,2014-09-24 For major league baseball the decade following Jackie Robinson s 1947 debut was one of slow yet persistent change Four other black players made their first brief big league appearances that year followed by only two in 1948 and four in 1949 But by the end of 1959 122 black ballplayers

had made it to the big leagues Like Robinson their lives were made difficult off the field and on it they dodged beanballs and spikes This book brings attention to the accomplishments of this transitional generation of African American players made up of men like Luscious Luke Easter Sam The Jet Jethroe and Sad Sam Jones many of whom spent years in the minors the Negro leagues or both before getting their shot Chapters on each season from 1947 to 1959 incorporate biographical and career profiles for 25 players who stood out during baseball s integration A final chapter covers the outstanding minor league players who for various reasons never got a real chance to play major league ball Appendices include a roster of black major leaguers from 1947 through 1959 a list of black player firsts and statistics on the year by year population of black players in the majors **Science Abstracts** ,1927 [High Energy Phenomena Around Collapsed Stars](#) F. Lada,N.D. Kylafis,2012-12-06 A few years after the publication of *The Physics of Star Formation and Early Stellar Evolution* we received a request from the publisher for an up dated second edition of this popular reference book As originally intended the volume had proved to be a useful text book for graduate astronomy courses and seminars which dealt with topics related to stellar origins The book was based on a series of lectures delivered by a distinguished group of leading researchers at a NATO Advanced Study Institute ASI held in May 1990 on the island of Crete Greece The primary goal of the ASI was in fact to produce a book which would simultaneously provide a broad and systematic overview of as well as a rigorous introduction to the fun damental physics and astronomy at the heart of modern research in star formation and early stellar evolution However by 1995 concern had arisen among those who used the text as a reference for graduate seminars and courses that the book would need to be updated to stay abreast of the discoveries and progress in this rapidly evolving field After some discussion we concluded that a new edition of the book was warranted and that the goal of producing a new edition would be best accomplished by organizing a second ASI in Crete to review the progress in star formation research **Official Baseball Annual** National Baseball Congress of America,1972 [The Nature of Dusty Star-Forming Galaxies](#) William Cowley,2017-10-02 This thesis combines a theoretical model of galaxy formation with a treatment of the radiative transfer in

the titular dusty star forming galaxies Embedding this within the well established CDM Lambda cold dark matter cosmology the author was able to simulate galaxy populations from which realistic observational images were synthesised Based on further analysis he shows that there is a good correspondence with observations from new instruments such as the SCUBA2 bolometric camera and the Atacama Large Millimeter Array ALMA interferometer and reveals some novel aspects of this exciting galaxy population In particular he shows that blending of these galaxies in the imaging produces an artificial enhancement in their clustering which he dubs blending bias This implies that the host dark matter halo masses for these galaxies have previously been significantly overestimated He also presents amongst the first predictions from a galaxy formation model for observations of these galaxies that will be made by the James Webb Space Telescope the successor to the Hubble Space Telescope

McCluskey,Y.
