R M Schindler 1887/1953 An Exploration Of Space:

Sex and Buildings Richard J. Williams, 2013-07-15 Massive modern skyscrapers obelisks towers all are structures that thanks to their phallic shape are often associated with sex But other buildings are more subtly connected as they provide the frameworks for our sexual lives and act as reminders of our sexual memories This relationship between sex and buildings mattered more than ever in the United States and Europe during the turbulent twentieth century when a culture of unprecedented sexual frankness and tolerance emerged and came to dominate many aspects of public life Part architectural history part cultural history and part travelogue Sex and Buildings explores how progressive sexual attitudes manifest themselves in architecture asking what progressive sexuality might look like architecturally and exploring the successes and failures of buildings attempts to reflect it In search of structures that reflect the sexual mores of their inhabitants Richard J Williams visits modernist buildings in Southern California the Westin Bonaventure Hotel the Playboy Mansion in Chicago the Seagram in New York communes from the 1960s and more A fascinating and often funny look at a period of extraordinary social change coupled with aesthetic invention Sex and Buildings will change the way we look at the buildings around us

Carbon-Neutral Architectural Design Pablo M. La Roche, 2017-07-14 The energy used to operate buildings is one of the most significant sources of greenhouse gas emissions While it is possible to reduce emissions through climate responsive design many architects are not trained to do this Filling an urgent need for a design reference in this emerging field this book describes how to reduce building related greenhouse gas emissions through appropriate design techniques It presents strategies to achieve CO2 reductions with an emphasis on control of energy flows through the building envelope and passive heating and cooling strategies This new revised edition is updated throughout and includes a new chapter on building simulations

R.M. Schindler Judith Sheine, 1998 More than 70 works and projects with a large number of photographs and drawings specially produced for this edition of the output of one of the most important architectural pioneers of this century R M Schindler 1887 1953 left Vienna in 1914 and emigrated to the United States to work with Frank Lloyd Wright His own work in California combines O Wagner s ideas about modernity Loos Raumplan and Wright s buildings relationship to the landscape putting together the best of Central European architectural culture with what he learned from the American Master Frank Lloyd Wright

R. M. Schindler Rudolph M. Schindler, David Gebhard, 1967 *Schindler* James Steele, 2005 Maverick of mid century American architecture Each of my buildings deal with a different architectural problem the existence of which has been forgotten in this period of Rational Mechanization The question of whether a house is really a house is more important to me than the fact that it is made of steel glass putty or hot air R M Schindler Hailing from Vienna Rudolph Michael Schindler 1887 1953 like his colleague Richard Neutra emigrated to the US and applied his International Style techniques to the movement that would come to be known as California Modernism Influenced by the work of Frank Lloyd Wright and taking cues from spatial notions found in cubism he developed a singular style characterized by

geometrical shapes bold lines and association of materials such as wood and concrete as seen in his own Hollywood home built in 1921 22 and the house he designed for P M Lovell in Newport Beach 1923 24 About the Series Each book in TASCHEN s Basic Architecture Series features an introduction to the life and work of the architect the major works in chronological order information about the clients architectural preconditions as well as construction problems and resolutions a list of all the selected works and a map indicating the locations of the best and most famous buildings approximately 120 illustrations photographs sketches drafts and plans

The Embodied Image Juhani Pallasmaa, 2011-05-16

The Embodied Image The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

Urban Future Manifestos Peter Noever, Kimberli Meyer, 2010 Calls upon leading creative thinkers to address urgent questions about the future of the contemporary city Contributing architects artists designers and urban scholars from around the globe consider the city from a variety of positions and posit their unique and inspiring visions Page 4 of cover
