Origins of the Magdalene Laundries Rebecca Lea McCarthy, 2010-03-08 The convents asylums and laundries that once comprised the Magdalene institutions are the subject of this work Though originally half way homes for prostitutes in the Middle Ages these homes often became forced labor institutions particularly in Ireland Examining the laundries within the context of a growing world capitalist economy the work argues that the process of colonization and of defining a national image determined the nature and longevity of the Magdalene Laundries This process developed differently in Ireland where the last laundry closed in 1996 The book focuses on the devolution of the significance of Mary Magdalene as a metaphor for the organization from an affluent strong supporter of Jesus to a simple fallen woman

The Anthropology of White Supremacy Aisha M. Beliso-De Jesús, Jemima Pierre, Junaid Rana, 2025-01-28 White supremacy has shaped cultural anthropology from its inception yet the discipline also offers powerful tools for understanding how this corrosive force structures societies around the world The Anthropology of White Supremacy explores how this phenomenon works around the globe and within anthropology itself Gathering original essays from a diverse international group of anthropologists this collection illustrates that white supremacy far from being only a fringe belief of white nationalists and fascists is a core mainstream ideology The book includes essays about many countries including Brazil Mexico Nigeria Norway Senegal South Africa and the United States and takes up such topics as American advertising the Belgian Congo South Asian philosophies police cadets U S immigration courts Guantanamo memoirs Palestinian feminism Hollywood paparazzi and how Indigenous anthropologists can counter the damage of settler colonialism The result reveals not only how

Racism in the Modern World Manfred Berg,Simon Wendt,2011-04-01 Emphasizing the global nature of racism this volume brings together historians from various regional specializations to explore this phenomenon from comparative and transnational perspectives The essays shed light on how racial ideologies and practices developed changed and spread in Europe Asia the Near East Australia and Africa focusing on processes of transfer exchange appropriation and adaptation To what extent for example were racial beliefs of Western origin Did similar belief systems emerge in non Western societies independently of Western influence And how did these societies adopt and adapt Western racial beliefs once they were exposed to them Up to this point the few monographs or edited collections that exist only provide students of the history of racism with tentative answers to these questions More importantly the authors of these studies tend to ignore transnational processes of exchange and transfer Yet as this volume shows these are crucial to an understanding of the diffusion of racial belief systems around the globe Science, Sexuality, and Race in the United States and Australia, 1780s-1890s Gregory D. Smithers,2013-02-01 This book combines transnational history with the comparative analysis of racial formation and reproductive sexuality in the settler colonial spaces of the United States and British Australia Specifically the book places whiteness and the changing definition of what it meant to be white in nineteenth century America and Australia at the center of our historical understanding of racial and sexual identities In both the United States and Australia whiteness was defined in opposition to the imagined cultural and biological inferiority of the Indian Negro and Aboriginal savage Moreover Euro Americans and Euro Australians shared a common belief that whiteness was synonymous with the extension of settler colonial civilization Despite this two very different understandings of whiteness emerged in the nineteenth century The book therefore asks why these different racial understandings of whiteness and the quest to create culturally and racially

homogeneous settler civilizations developed in the United States and Australia *Intelligence, Race, And Genetics* Frank Miele,2018-03-05 In a series of provocative conversations with Skeptic magazine Ssenior editor Frank Miele renowned University of California Berkeley psychologist Arthur R Jensen details the evolution of his thoughts on the nature of intelligence tracing an intellectual odyssey that leads from the programs of the Great Society to the Bell Curve Wars and beyond Miele cross examines Jensen s views on general intelligence the g factor racial differences in IQ cultural bias in IQ tests and whether differences in IQ are due primarily to heredity or to remediable factors such as poverty and discrimination With characteristic frankness Jensen also presents his view of the proper role of scientific facts in establishing public policy such as Affirmative Action Jensenism the assertion that heredity plays an undeniably greater role than environmental factors in racial and other IQ differences has entered the dictionary and also made Jensen a bitterly controversial figure Nevertheless *Intelligence Race and Genetics* carefully underscores the dedicated lifetime of scrupulously scientific research that supports Jensen s conclusions *Integrations* Lawrence Blum,Zoë Burkholder,2021-05-12 Education plays a central part in the history of racial inequality in America with people of color long advocating for equal educational rights and opportunities Though school desegregation initially was a boon for educational equality schools began to resegregate in the 1980s and schools are now more segregated than ever In *Integrations* historian Zo Burkholder and philosopher Lawrence Blum set out to shed needed light on the enduring problem of segregation in American schools From a historical perspective the authors analyze how ideas about race influenced the creation and development of American public schools Importantly the authors focus on multiple marginalized groups in American schooling African Americans Native Americans Latinxs and Asian Americans In the second half of the book the authors explore what equal education should and could look like They argue for a conception of educational goods including the development of moral and civic capacities that should and can be provided to every child through schooling including integration itself Ultimately the authors show that in order to grapple with integration in a meaningful way we must think of integration in the plural both in its multiple histories and the many possible meanings of and courses of action for integration **Native Americans, Christianity, and the Reshaping of the American Religious Landscape** Joel W. Martin,Mark A. Nicholas,2010 The essays here explore a variety of post contact identities including indigenous Christians mission friendly non Christians and ex Christians thereby exploring the shifting world of Native white cultural and religious exchange Rather than questioning the authenticity of Native Christian experiences these scholars reveal how indigenous peoples negotiated change with regard to missions missionaries and Christianity This collection challenges the pervasive stereotype of Native Americans as culturally static and ill equipped to navigate the roiling currents associated with colonialism and missionization pub desc *Constructing Race* Tracy Teslow,2014-07-21 *Constructing Race* helps unravel the complicated and intertwined history of race and science in America Tracy Teslow explores how physical anthropologists in the twentieth century struggled to understand the complexity of

human physical and cultural variation and how their theories were disseminated to the public through art museum exhibitions books and pamphlets In their attempts to explain the history and nature of human peoples anthropologists persistently saw both race and culture as critical components This is at odds with a broadly accepted account that suggests racial science was fully rejected by scientists and the public following World War II This book offers a corrective showing that both race and culture informed how anthropologists and the public understood human variation from 1900 through the decades following the war The book offers new insights into the work of Franz Boas Ruth Benedict and Ashley Montagu as well as less well known figures including Harry Shapiro Gene Weltfish and Henry Field *Race and Racism* Carolyn Fluehr-Lobban,2018-04-12 Race and Racism examines the foundations of race in American society from an anthropological perspective The book offers an accessible overview of a variety of perspectives and theories on the biology of race the social context of race ethnicity and ethnocentrism and more The second edition features significant updates throughout including more discussion of critical race theory new biophysical research on human origins new material on media and racism new global examples and additional material on how racism impacts a variety of ethnic groups **Race** Alan H. confident facade of white racial supremacy in the age of empire and race slavery as well as the ways in which racist ideas left their mark upon new forms of religiosity This is essential reading for anyone interested in the histories of race or religion
