**Origins of the Magdalene Laundries** Rebecca Lea McCarthy, 2010-03-08 The convents asylums and laundries that once comprised the Magdalene institutions are the subject of this work Though originally half way homes for prostitutes in the Middle Ages these homes often became forced labor institutions particularly in Ireland Examining the laundries within the context of a growing world capitalist economy the work argues that the process of colonization and of defining a national image determined the nature and longevity of the Magdalene Laundries This process developed differently in Ireland where the last laundry closed in 1996 The book focuses on the devolution of the significance of Mary Magdalene as a metaphor for the organization from an affluent strong supporter of Jesus to a simple fallen woman

*The Second Generation of African American Pioneers in Anthropology* Ira E. Harrison, Deborah Johnson-Simon, Erica Lorraine Williams, 2018-11-15 After the pioneers the second generation of African American anthropologists trained in the late 1950s and 1960s Expected to study their own or similar cultures these scholars often focused on the African diaspora but in some cases they also ranged further afield both geographically and intellectually Yet their work remains largely unknown to colleagues and students This volume collects intellectual biographies of fifteen accomplished African American anthropologists of the era The authors explore the scholars diverse backgrounds and interests and look at their groundbreaking methodologies ethnographies and theories They also place their subjects within their tumultuous times when antiracism and anticolonialism transformed the field and the emergence of ideas around racial vindication brought forth new worldviews Scholars profiled George Clement Bond Johnnetta B Cole James Lowell Gibbs Jr Vera Mae Green John Langston Gwaltney Ira E Harrison Delmos Jones Diane K Lewis Claudia Mitchell Kernan Oliver Osborne Anselme Remy William Alfred Shack Audrey Smedley Niara Sudarkasa and Charles Preston Warren II

**Race and the Genetic Revolution** Sheldon Krinsky, Kathleen Sloan, 2011-09-27 Do advances in genomic biology create a scientific rationale for long discredited racial categories Leading scholars in law medicine biology sociology history anthropology and psychology examine the impact of modern genetics on the concept of race Contributors trace the interplay between genetics and race in forensic DNA databanks the biology of intelligence DNA ancestry markers and racialized medicine Each essay explores commonly held and unexamined assumptions and misperceptions about race in science and popular culture This collection begins with the historical origins and current uses of the concept of race in science It follows with an analysis of the role of race in DNA databanks and racial disparities in the criminal justice system Essays then consider the rise of recreational genetics in the form of for profit testing of genetic ancestry and the introduction of racialized medicine specifically through an FDA approved heart drug called BiDil marketed to African American men Concluding sections discuss

the contradictions between our scientific and cultural understandings of race and the continuing significance of race in educational and criminal justice policy

*Americans Without Law* Mark S. Weiner, 2008-12 *Americans Without Law* shows how the racial boundaries of civic life are based on widespread perceptions about the relative capacity of minority groups for legal behavior which Mark S. Weiner calls juridical racialism. The book follows the history of this civic discourse by examining the legal status of four minority groups in four successive historical periods: American Indians in the 1880s, Filipinos after the Spanish American War, Japanese immigrants in the 1920s, and African Americans in the 1940s and 1950s. Weiner reveals the significance of juridical racialism for each group and in turn Americans as a whole by examining the work of anthropological social scientists who developed distinctive ways of understanding racial and legal identity and through decisions of the U.S. Supreme Court that put these ethno-legal views into practice. Combining history, anthropology, and legal analysis, the book argues that the story of juridical racialism shows how race and citizenship served as a nexus for the professionalization of the social sciences, the growth of national state power, economic modernization, and modern practices of the self.

*Social Inequality and Difference in the Ancient Greek World* Anna Lagia, Sofia Voutsaki, 2024-12-17 In this volume, bioarchaeologists, osteologists, archaeologists, and paleopathologists examine the ways social inequalities and differences affected health and wellbeing in ancient Greece.

**Conceptualizing Racism** Noel A. Cazenave, 2015-11-19 *Conceptualizing Racism* is a provocative book that confronts the language we use to discuss and understand racism. Author Noel A. Cazenave argues that American social science has since its inception practiced linguistic racial accommodation that blurs our understanding of systemic racism and makes it difficult to effect meaningful change. *Conceptualizing Racism* highlights how words matter in racism studies. The author traces the history of linguistic racial accommodation through the development of sociology as a discipline and illustrates how it is at play today, not only within the discipline but in public life.

**Race** Alan H. Goodman, Yolanda T. Moses, Joseph L. Jones, 2019-12-31 The second edition of the bestselling title on modern notions of race, providing a timely examination of perspectives on race, racism, and human biological variation. In this fully updated second edition of this popular text on the study of race, Alan Goodman, Yolanda Moses, and Joseph Jones take a timely look at modern ideas surrounding race, racism, and human diversity and consider the ways that ideas about race have changed over time. New material in the second edition covers recent history and emerging topics in the study of race. The second edition has also been updated to account for advancements in the study of human genetic variation, which provide further evidence that race is an entirely social phenomenon. *RACE* compels readers to carefully consider their own ideas about race and the role that race plays in the world around them. Examines the ways perceptions of race influence laws, customs, and social institutions in the US and around the world. Explores the impact of race and racism on health, wealth, education, and other domains of life. Includes guest essays by noted scholars, a complete bibliography, and a full glossary. **Precolonial African Material Culture** , V. Tarikhu Farrar,2020-01-20 The idea of an inherent backwardness of technology and material culture in early sub Saharan Africa is a persistent and tenacious myth in the scholarly and popular imagination Due to the emergence of the field of African studies and the upsurge in historical and archaeological research in recent decades the stridency of this myth has weakened and the overtly racist content of arguments mustered in its defense have tended to disappear But more important are transformations in social political and cultural consciousness which have worked to reshape conceptualizations of African peoples their histories and their cultures Precolonial African Material Culture offers a thorough challenge to the myth of technological backwardness V Tarikhu Farrar revisits the early technology of sub Saharan Africa as revealed by recent research and reconsiders long possessed primary historical sources He then explores the ways that indigenous African technologies have influenced the world beyond the African continent

**American Heathens** Joshua Paddison,2012-06-01 In the 19th century debate over whether the United States should be an explicitly Christian nation California emerged as a central battleground Racial groups that were perceived as godless and uncivilized were excluded from suffrage and evangelism among Indians and the Chinese was seen as a politically incendiary act Joshua Paddison sheds light on Reconstruction's impact on Indians and Asian Americans by illustrating how marginalized groups fought for a political voice refuting racist assumptions with their lives words and faith Reconstruction he argues was not merely a remaking of the South but rather a multiracial and multiregional process of reimagining the nation

ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene: *Unequal Treatment* offers recommendations for improvements in medical care, financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students, as well as advocates for people of color.

Race and Racism Carolyn Fluehr-Lobban, 2018-04-12. *Race and Racism* examines the foundations of race in American society from an anthropological perspective. The book offers an accessible overview of a variety of perspectives and theories on the biology of race, the social context of race, ethnicity, and ethnocentrism, and more. The second edition features significant updates throughout, including more discussion of critical race theory, new biophysical research on human origins, new material on media and racism, new global examples, and additional material on how racism impacts a variety of ethnic groups.
