Recognizing Race and Ethnicity Kathleen J. Fitzgerald, 2014-02-18 Despite radical changes over the last century race remains a central organizing principle in U S society a key arena of inequality and the subject of ongoing conflict and debate In a refreshing new introduction to the sociology of race *Recognizing Race and Ethnicity* encourages students to think differently by challenging the notion that we are or should even aspire to be color blind In this text Kathleen Fitzgerald considers how the continuing significance of race manifests in both significant and obscure ways by looking across all racial ethnic groups within the socio historical context of institutions and arenas rather than discussing each group by group Incorporating recent research and contemporary theoretical perspectives she guides students to examine racial ideologies and identities as well as structural racism at the same time she covers topics like popular culture sports and interracial relationships that will keep students engaged *Recognizing Race and Ethnicity* provides unparalleled coverage of white privilege while remaining careful to not treat white as the norm against which all other groups are defined *Recognizing Race and Ethnicity* makes it clear that in a time when race and racism are constantly evolving in response to varied social contexts societal demands and political climates we all must learn to recognize race if we are to get beyond it

War on the American Republic Kevin Slack, 2023-03-21 Kevin Slack sounds the alarm on how America's failed neoliberal regime has given way to a woke oligarchy that has deployed a radical toolkit to rapidly strip away the rights of citizens Americans often use the words progressive liberal and radical more or less interchangeably without reference to their place in our nation's history Kevin Slack clarifies the distinct aims of the movements they represent and weighs their consequences for the American Republic Each of the three movements rejected older republican principles of governance in favor of an administrative state But there were substantial differences between Teddy Roosevelt's Anglo Protestant progressive social gospellers who battled trusts and curbed immigration Franklin Roosevelt and Lyndon Johnson's secular liberals who initiated government business partnership and a civil rights agenda and the 1960s radicals who protested corporate influence in the Great Society liberal hypocrisy on race and gender and the war in Vietnam Each movement arose in criticism of what came before Following the revolution of the 1960s elites on both left and right turned against the industrial middle class to erect an oligarchy at home and advance globalization abroad Each side claimed to serve the interests of disadvantaged or underrepresented groups Radicals ensconced themselves in bureaucracy and academia to fulfill their vision of social justice for women and minorities while neoliberal elites promoted monopoly finance open borders and outsourcing of jobs to benefit consumers The administrative state had become a global American empire but the neoliberals' economic and military failures precipitated a crisis of legitimacy In the great awakening that began under Barack Obama neoliberal elites including establishment conservatives openly broke with the populist base of the Republican Party embraced identity politics and used Covid 19 and myths of insurrection to strip away the rights of American citizens Today an incompetent kleptocracy is draining the wealthiest and most powerful people in history thus eroding the foundations of its own empire This book traces the rise and fall of the American Republic

*Brown Beauty* Laila Haidarali, 2018-09-25 Examines how the media influenced ideas of race and beauty among African American women from the Harlem Renaissance to World War II Between the Harlem Renaissance and the end of World War II a complicated discourse emerged surrounding considerations of appearance of African American women and expressions of race class and status Brown Beauty considers how the media

created a beauty ideal for these women emphasizing different representations and expressions of brown skin Haidarali contends that the idea of brown as a respectable shade was carefully constructed through print and visual media in the interwar era Throughout this period brownness of skin came to be idealized as the real representational and respectable complexion of African American middle class women Shades of brown became channels that facilitated discussions of race class and gender in a way that would develop lasting cultural effects for an ever modernizing world Building on an impressive range of visual and media sources from newspapers journals magazines and newsletters to commercial advertising Haidarali locates a complex and sometimes contradictory set of cultural values at the core of representations of women envisioned as brown skin She explores how brownness affected socially mobile New Negro women in the urban environment during the interwar years showing how the majority of messages on brownness were directed at an aspirant middle class By tracing brown s changing meanings across this period and showing how a visual language of brown grew into a dynamic racial shorthand used to denote modern African American womanhood Brown Beauty demonstrates the myriad values and judgments compromises and contradictions involved in the social evaluation of women This book is an eye opening account of the intense dynamics between racial identity and the influence mass media has on what and who we consider beautiful
