Race And Politics In Chicago:

Race and Ethnicity in Chicago Politics Dianne Marie Pinderhughes,1987 Chicago on the Make Andrew J. Diamond,2017-11-07 Heralded as America s most quintessentially modern city Chicago has attracted the gaze of journalists novelists essayists and scholars as much as any city in the nation And yet few historians have attempted big picture narratives of the city s transformation over the twentieth century Chicago on the Make traces the evolution of the city s politics culture and economy as it grew from an unruly tangle of rail yards slaughterhouses factories tenement houses and fiercely defended ethnic neighborhoods into a truly global urban center Reinterpreting the familiar narrative that Chicago s autocratic machine politics shaped its institutions and public life Andrew J Diamond demonstrates how the grassroots politics of race crippled progressive forces and enabled an alliance of downtown business interests to promote a neoliberal agenda that created stark inequalities Chicago on the Make takes the story into the twenty first century chronicling Chicago s deeply entrenched social and urban problems as the city ascended to the national stage during the Obama years Black on the Block Mary Pattillo,2010-04-02 In Black on the Block Mary Pattillo a Newsweek Woman of the 21st Century uses the historic rise alarming fall and equally dramatic renewal of Chicago s North Kenwood Oakland neighborhood to explore the politics of race and class in contemporary urban America There was a time when North Kenwood Oakland was plagued by gangs drugs violence and the font of poverty from which they sprang But in the late 1980s activists rose up to tackle the social problems that had plagued the area for decades Black on the Block tells the remarkable story of how these residents laid the groundwork for a revitalized and self consciously black neighborhood that continues to flourish today But theirs is not a tale of easy consensus and political unity and here Pattillo teases out the divergent class interests that have come to define black communities like North Kenwood Oakland She explores the often heated battles between haves and have nots home owners and apartment dwellers and newcomers and old timers as they clash over the social implications of gentrification Along the way Pattillo highlights the conflicted but crucial role that middle class blacks play in transforming such districts as they negotiate between established centers of white economic and political power and the needs of their less fortunate black neighbors A century from now when today s sociologists and journalists are dust and their books are too those who want to understand what the hell happened to Chicago will be finding the answer in this one Chicago Reader To see how diversity creates strange and sometimes awkward bedfellows turn to Mary Pattillo s Black on the Block Boston Globe Fire on the Prairie Gary Rivlin,1992 Explains how Harold Washington and his associates overcame the Daley political machine and built an administration that crossed racial lines and transformed Chicago politics **The Unfinished Politics of Race** Les Back,Michael Keith,Kalbir Shukra,John Solomos,2022-12 A novel history of the politics of race in British society over the past few decades that draws on original research at local and national levels Race and American Political Development Joseph E. Lowndes,Julie Novkov,Dorian T. Warren,2012-11-12 Race has been present at every critical moment in American political

development shaping political institutions political discourse public policy and its denizens political identities But because of the nature of race its evolving and dynamic status as a structure of inequality a political organizing principle an ideology and a system of power we must study the politics of race historically institutionally and discursively Covering more than three hundred years of American political history from the founding to the contemporary moment the contributors in this volume make this extended argument Together they provide an understanding of American politics that challenges our conventional disciplinary tools of studying politics and our conservative political moment s dominant narrative of racial progress This volume the first to collect essays on the role of race in American political history and development resituates race in

American politics as an issue for sustained and broadened critical attention **Race Politics in Britain and France** Erik

Bleich,2003-05-26 Britain and France have developed substantially different policies to manage racial tensions since the 1960s in spite of having similar numbers of post war ethnic minority immigrants This book provides the first detailed

historical exploration of race policy development in these two countries In this path breaking work Bleich argues against common wisdom that attributes policy outcomes to the role of powerful interest groups or to the constraints of existing institutions instead emphasizing the importance of frames as widely held ideas that propelled policymaking in different directions British policymakers framing of race and racism principally in North American terms of color discrimination

encouraged them to import many policies from across the Atlantic For decades after WWII by contrast French policy leaders framed racism in terms influenced largely by their Vichy past which encouraged policies designed primarily to counter hate speech while avoiding the recognition of race found across the English Channel **21st Century Urban Race Politics** Ravi

K. Perry,2013-04-16 With case studies from across the country in medium sized and large cities and mayors of various backgrounds this volume provides an account of how different minority mayors have handled minority representation in historically majority Caucasian cities and what lessons academics and politicians can learn from them **Us Versus Them**

Jan Doering,2020 Crime and gentrification are hot button issues that easily polarize racially diverse neighborhoods How do residents activists and politicians navigate the thorny politics of race as they fight crime or resist gentrification And do conflicts over competing visions of neighborhood change necessarily divide activists into racially homogeneous camps or can they produce more complex alliances and divisions In Us versus Them Jan Doering answers these questions through an in depth study of two Chicago neighborhoods Drawing on three and a half years of ethnographic fieldwork Doering examines how activists and community leaders clashed and collaborated as they launched new initiatives built coalitions appeased critics and discredited opponents At the heart of these political maneuvers he uncovers a ceaseless battle over racial meanings that unfolded as residents strove to make local initiatives and urban change appear racially benign or malignant A thoughtful and clear eyed contribution to the field Us versus Them reveals the deep impact that competing racial meanings have on the fabric of community and the direction of neighborhood change **Black Chicago's First Century** Christopher

Robert Reed, 2005-07-25 In *Black Chicago's First Century* Christopher Robert Reed provides the first comprehensive study of an African American population in a nineteenth century northern city beyond the eastern seaboard. Reed's study covers the first one hundred years of African American settlement and achievements in the Windy City encompassing a range of activities and events that span the antebellum, Civil War, Reconstruction and post Reconstruction periods. The author takes us from a time when black Chicago provided both workers and soldiers for the Union cause to the ensuing decades that saw the rise and development of a stratified class structure and growth in employment, politics and culture. Just as the city was transformed in its first century of existence so were its black inhabitants. Methodologically relying on the federal pension records of Civil War soldiers at the National Archives as well as previously neglected photographic evidence, manuscripts, contemporary newspapers and secondary sources, Reed captures the lives of Chicago's vast army of ordinary black men and women. He places black Chicagoans within the context of northern urban history, providing a better understanding of the similarities and differences among them. We learn of the conditions African Americans faced before and after Emancipation. We learn how the black community changed and developed over time; we learn how these people endured, how they educated their children, how they worked, organized and played. *Black Chicago's First Century* is a balanced and coherent work. Anyone with an interest in urban history or African American studies will find much value in this book. **The Expanding**

Boundaries of Black Politics Georgia A. Persons, 2011-12-31 This volume joins the preceding volumes in this distinguished series in presenting contemporary research by leading political scientists addressing topics of interest to those concerned with African American affairs. It captures the expanding boundaries of black politics and the persistent interests of the black community at large. The anchoring symposium, *The Expanding Boundaries of Black Politics*, presents the scholarship of a cadre of young black political scientists actively engaged in the critical tasks of moving forward the study of black politics. Their concerns include expanding the boundaries of black politics along the lines of epistemology and methodology, especially in regard to core issues and areas within this field. In an introductory essay by Todd Shaw, the work of these scholars is situated within the context of temporal shifts in scholarly emphases. Overlapping issues and concerns across time as well as black political scholarship as defined in the field since its beginning are addressed. The second part of this volume, entitled *Maximizing the Black Vote: Recognizing the Limits of Electoral Politics*, concentrates on serious, lingering social concerns. These include the policy significance of black mayors, affecting the concomitant impact of the black vote, the boundaries being pushed concerning the conjunction of black theology and sexual identity, a gendered analysis of familial policies and the deepening social and economic plight of young black males, including felon disfranchisement. *The Expanding Boundaries of Black Politics* carries forth the search for an understanding of the relationship between religion, the black church and black political behavior, cross racial group coalitions as concerns matters of immigration, growing multiculturalism and the impact on black politics, maximizing the impact of the black vote, focusing on voting rights enforcement, the black vote in presidential

elections and the voice of the Congressional Black Caucus in American foreign policy and persistent social inequalities especially as it concerns ideology federalism and social welfare policy *Mayor Harold Washington* Roger Biles, 2018-05-10 Raised in a political family on Chicago's South Side Harold Washington made history as the city's first African American mayor His 1983 electoral triumph fueled by overwhelming black support represented victory over the Chicago Machine and business as usual Yet the racially charged campaign heralded an era of bitter political divisiveness that obstructed his efforts to change city government Roger Biles's sweeping biography provides a definitive account of Washington and his journey from the state legislature to the mayoralty Once in City Hall Washington confronted the back room deals aldermanic thuggery open corruption and palm greasing that fueled the city's autocratic political regime His alternative a vision of fairness transparency neighborhood empowerment and balanced economic growth at one with his emergence as a dynamic champion for African American uplift and a crusader for progressive causes Biles charts the countless infamies of the Council Wars era and Washington's own growth through his winning of a second term a promise of lasting reform left unfulfilled when the mayor died in 1987 Original and authoritative *Mayor Harold Washington* redefines a pivotal era in Chicago's modern history **Neighborhood Politics** Larry Bennett, 2013-11-26 First Published in 1997 This book is the outcome of a small project that grew and grew In the fall of 1990 the Chicago based Policy Research Action Group PRAG commissioned the author to do a study of the Uptown area to which he had moved in 1988 Meanwhile in conjunction with his university's Foreign Study Program he spent the fall of 1991 in Sheffield England **American Apartheid** Douglas S. Massey, Nancy A. Denton, 1998-07-15 This powerful and disturbing book clearly links persistent poverty among blacks in the United States to the unparalleled degree of deliberate segregation they experience in American cities **Political Creativity** Gerald Berk, Dennis C. Galvan, Victoria Hattam, 2013-12-05 Political Creativity intervenes in the lively debate currently underway in the social sciences on institutional change Editors Gerald Berk Dennis C Galvan and Victoria Hattam along with the contributors to the volume show how institutions inevitably combine order and change because formal rules and roles are always available for reconfiguration Creative action is not the exception but the very process through which all political formations are built promulgated and changed Drawing on the rich cache of antidualist theoretical traditions from poststructuralism and ecological theory to constructivism and pragmatism a diverse group of scholars probes acts of social innovation in many locations land boards in Botswana Russian labor relations international statistics global supply chains Islamic economics in Algeria Islamic sects and state authority in Senegal and civil rights reform colonization industrial policy and political consulting in the United States These political scientists reconceptualize agency as a relational process that continually reorders the nature and meaning of people and things order as an assemblage that necessitates creative tinkering and interpretation and change as the unruly politics of time that confounds the conventional ordering of past present and future Political Creativity offers analytical tools for reimagining order and change as entangled processes

A Post-Racial Change Is Gonna Come J. Wharton, 2013-11-12 This work offers a political and historical analysis of Newark's modern politics since 1950 culminating with Mayor Cory Booker's rise to power and prominence both in the city and in American political consciousness Newark's recent political history offers an interesting case study in mayoral elections community development and coalition building politics While Newark is the quintessential post industrial city Booker has received critical attention for his post racial politics since he frequently bypasses racial and traditional urban politics At the same time relations between the mayor the municipal council and Newark's diverse communities were often so fractious that sustainable coalition building proved to be an elusive goal to resolve longstanding crime education and other social problems Based on original interviews with Cory Booker city council members and other prominent Newark politicians **A Post Racial Change is Gonna Come** is a powerful history of how Newark became the focal point for transformative politics in urban America

Beyond the Boundaries Georgia A. Persons, 2017-09-29 In the past African American aspirations for political office were assumed to be limited to areas with sizeable black population bases By and large black candidates have rarely been successful in statewide or national elections This has been attributed to several factors limited resources available to African American candidates or identification with a black liberationist ideological thrust Other factors have been a relatively small and spatially concentrated primary support base of black voters and the persistent resistance of many white voters to support black candidates For these reasons the possibility of black candidates winning elections to national office was presumably just a dream Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics This volume is anchored by a symposium that focuses on new possibilities in African American politics Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates
