*Socialism - An Economic and Sociological Analysis* Ludwig von Mises, 2016-11-24 Socialism is the watchword and the catchword of our day The socialist idea dominates the modern spirit The masses approve of it It expresses the thoughts and feelings of all it has set its seal upon our time When history comes to tell our story it will write above the chapter The Epoch of Socialism As yet it is true Socialism has not created a society which can be said to represent its ideal But for more than a generation the policies of civilized nations have been directed towards nothing less than a gradual realization of Socialism 17 In recent years the movement has grown noticeably in vigour and tenacity Some nations have sought to achieve Socialism in its fullest sense at a single stroke Before our eyes Russian Bolshevism has already accomplished something which whatever we believe to be its significance must by the very magnitude of its design be regarded as one of the most remarkable achievements known to world history Elsewhere no one has yet achieved so much But with other peoples only the inner contradictions of Socialism itself and the fact that it cannot be completely realized have frustrated socialist triumph They also have gone as far as they could under the given circumstances Opposition in principle to Socialism there is none Today no influential party would dare openly to advocate Private Property in the Means of Production The word Capitalism expresses for our age the sum of all evil Even the opponents of Socialism are dominated by socialist ideas In seeking to combat Socialism from the standpoint of their special class interest these opponents the parties which particularly call themselves bourgeois or peasant admit indirectly the validity of all the essentials of socialist thought For if it is only possible to argue against the socialist programme that it endangers the particular interests of one part of humanity one has really affirmed Socialism If one complains that the system of economic and social organization which is based on private property in the means of production does not sufficiently consider the interests of the community that it serves only the purposes of single strata and that it limits productivity and if therefore one demands with the supporters of the various social political and social reform movements state interference in all fields of economic life then one has fundamentally accepted the principle of the socialist programme Or again if one can only argue against socialism that the imperfections of

human nature make its realization impossible or that it is inexpedient under existing economic conditions to proceed at once to socialization then one merely confesses that one has capitulated to socialist ideas The nationalist too affirms socialism and objects only to its Internationalism He wishes to combine Socialism with the ideas of Imperialism and the struggle against foreign nations He is a national not an international socialist but he also approves of the essential principles of Socialism

Rocha,2015-10-08 Mixed race is becoming an

important area for research and there is a growing body of work in the North American and British contexts However understandings and experiences of mixed race across different countries and regions are not often explored in significant depth New Zealand and Singapore provide important contexts for investigation as two multicultural yet structurally divergent societies Within these two countries mixed race describes a particularly interesting label for individuals of mixed Chinese and European parentage This book explores the concept of mixed race for people of mixed Chinese and European descent looking at how being Chinese and or European can mean many different things in different contexts By looking at different communities in Singapore and New Zealand it investigates how individuals of mixed heritage fit into or are

excluded from these communities Increasingly individuals of mixed ancestry are opting to identify outside of traditionally defined racial categories posing a challenge to systems of racial classification and to sociological understandings of race As case studies Singapore and New Zealand provide key examples of the complex relationship between state categorization and individual identities The book explores the divergences between identity and classification and the ways in which identity labels affect experiences of mixed race in everyday life Personal stories reveal the creative and flexible ways in which people cross boundaries and the everyday negotiations between classification heritage experience and nation in defining identity The study is based on qualitative research including in depth interviews with people of mixed heritage in both countries Filling an important gap in the literature by using an Asia Pacific dimension this study of race and ethnicity will appeal to students and scholars of mixed race studies ethnicity Chinese diaspora and cultural anthropology Mexico Megacity James B Pick, 2018-02-23 This book describes and analyzes a wealth of data about Mexico City's growth change and spatial patterns Applying modern techniques of geographic information systems and cluster analysis the authors reveal many previously unknown or unrecognized trends and patterns The authors provide historical background analyze key findings and relationships and tie their results to the literature on Mexico City and other giant cities The United Nations predicts the emergence of many more giant cities worldwide over the next quarter century most of which will appear in the developing world Mexico Megacity may be a milestone from a comparative perspective in increasing knowledge about one developing world megacity and offering analytical tools to study others With a population of 15 million persons in 1990 Mexico City is one of the world's largest cities It is a famous center of civilizations and culture and one of the economic capitals of the Americas but it also has serious social and economic problems including large impoverished zones severe environmental degradation crime and overpopulation This book describes and analyzes growth change and spatial patterns in Mexico City looking at urbanization population marriage and fertility health and mortality migration environment and housing social characteristics the economy labor force and corporate structure Applying modern techniques of geographic information systems and spatial analysis the authors reveal many previously unknown or unrecognized trends and patterns In a capstone chapter they summarize the spatial patterns in a series of cluster analyses that identify distinctive zones within the metropolis a prosperous core surrounding complex ring patterns an impoverished zone and semi rural arms They also compare the pattern of Mexico City's cluster zones to the classical and developmental literature on cities In closing the authors suggest government policies that would foster optimal future development of an even larger metropolis This book addresses a topic of growing importance The United Nations predicts the emergence of many more giant cities worldwide over the next quarter century most of which will appear in the developing world Mexico Megacity is a milestone work that increases our knowledge about one developing world megacity while offering analytical tools for studying others **Critical Realism** Justin Cruickshank, 2003 An introduction to the difference that critical realism can make to contemporary social

Rocha, Melinda Webber, 2017-11-09 This volume explores mixed race mixed ethnic identities in Aotearoa New Zealand Mixed race and mixed ethnic identity are growing in popularity as research topics around the world This edited collection looks at mixed race and mixed ethnic identity in New Zealand a unique context as multiple ethnic identities have been officially recognised for more than 30 years The book draws upon research across a range of disciplines exploring the historical and contemporary ways in which official and social understandings of mixed race and ethnicity have changed It focuses on the interactions between race ethnicity national identity indigeneity and culture especially in terms of visibility and self defined identity in the New Zealand context Mana Tangatarua situates New Zealand in the existing international scholarship positioning experiences from New Zealand within theoretical understandings of mixedness The chapters develop wider theories of mixed race and mixed ethnic identity at macro and micro levels looking at the interconnections between the two The volume as a whole reveals the diverse ways in which mixed race is experienced and understood providing a key contribution to the theory and development of mixed race globally *Designing Critical Literacy Education through Critical Discourse Analysis* Rebecca Rogers, Melissa Mosley Wetzels, 2013-06-26 Uniquely bringing together discourse analysis critical literacy and teacher research this book invites teacher educators literacy researchers and discourse analysts to consider how discourse analysis can be used to foster critical literacy education It is both a guide for conducting critical discourse analysis and a look at how the authors alongside their teacher education students used the tools of discourse analysis to inquire into critique and design critical literacy practices Through an intimate look at the workings of a university teacher education course and the discourse analysis tools that teacher researchers use to understand their classrooms the book provides examples of both pre service teachers and teacher educators becoming critically literate The context rich examples highlight the ways in which discourse analysis aids teachers decision making in the moment and reflections on their practice over time Readers learn to conduct discourse analysis as they read about critical literacy practices at the university level Designed to be interactive each chapter features step by step procedures for conducting each kind of discourse analysis narrative critically oriented multimodal sample analyses and additional readings and resources By attending to the micro interactions as well as processes that unfold across time the book illustrates the power and potential of discourse analysis as a pedagogical and research tool **Rednecks, Eggheads and Blackfellas** Gillian Cowlishaw, 2020-08-02 This lively book brings the reader close to the people from a remote cattle station in far north Australia where black and white peoples lives

have been intertwined over the span of 80 years Tracing the humorous savage and ordinary ways in which race structured intimate and everyday relationships across a great divide Gillian Cowlshaw makes startling and original arguments about race relations By investigating specific patterns of interaction on Australia s cultural frontier *Rednecks Eggheads and Blackfellas* illustrates how anthropologists pastoralists and government officials squabbled about Aborigines as they intruded into their country controlled aspects of their lives and dominated the way they were represented in the public realm The ironic title hints that the difference between redneck pastoralists and egghead anthropologists is not so great as might be imagined Aborigines were central to the projects of both kinds of whitefellas Weaving the shifts in government policy and public opinion with accounts of their sometimes ludicrous impact on outback communities this book brings to life the complexities of living with racial categories And it asks why increasingly enlightened anti racist policies seldom seem to have worked as intended even in this era of self determination This thought provoking work will speak not only to anthropologists and those interested in Aboriginal Australia but to scholars of race more generally especially in the burgeoning field of whiteness studies

*Class and Stratification Analysis* Gunn Elisabeth Birkelund,2013-02-06 Emphasizes unsolved issues and developments within class and stratification analysis discussing both theoretical and methodological innovations and revisions In this book comparative analysis has also revealed cross national differentiation in stratification processes partly related to welfare state arrangements and national policies
